TO THE PUBLIC WORKS SUBCOMMITTEE

DATE: June 19, 2024

FROM: Carlos Zamano, City Manager *CZ*

PREPARED BY: Matt Bennett, Assistant Public Works Director *MM*

SUBJECT: Greenspot Road and Blossom Way Median Improvements
(Project No. str23005)

RECOMMENDATION: It is recommended that the Public Works Subcommittee:

1. Review the findings of Willdan's Traffic Signal Warrant Analysis and Left Turn Access Analysis report for the intersection of Greenspot Road and Blossom Way,
2. Approve Greenspot Road and Blossom Way Concept 1 Southbound Left-Turn Restriction Improvements for Blossom Way recommended by Willdan, and
3. Direct staff to seek professional services and construction bids to construct Concept 1 left-turn restriction improvements.

FISCAL IMPACT: The estimated cost for construction of Concept 1 southbound left-turn restriction improvements is approximately \$8,625 which would be funded with American Rescue Plan Act (ARPA) funds.

PUBLIC NOTICE: The agenda for this item was posted at the three locations per Resolution No. 2011-047 and on the City's website.

BACKGROUND: The City received complaints from Highland residents who reside on Blossom Way that observed high-speed traffic on Greenspot Road exceeding the posted speed limit on multiple occasions. In response to the submitted complaints, the City took the following actions:

- 1) Staff coordinated with Highland Sheriff's Department to have law enforcement presence at the intersection of Blossom Way and Greenspot Road.
- 2) Sheriff's Department set up a temporary feedback trailer on Greenspot Road near the intersection for motorists to be aware of their driving speed.
- 3) The City installed a permanent speed feedback signage on Greenspot Road near the intersection.
- 4) Public Works maintains motorist sight distance by keeping median and parkway landscape trimmed low and removing obstructing objects, signage, etc.
- 5) Public Works installed "KEEP CLEAR" pavement marking on Greenspot Road at the intersection.

- 6) Public Works requested and reviewed Statewide Integrated Traffic Records System (SWITRS) traffic reporting.
- 7) City confirmed with Redlands Unified School District the bus drivers have no difficulty with school bus access in and out of Blossom Way.

The City held a Public Works Subcommittee meeting on December 21, 2022 where Blossom Way residents voiced their concerns of the observed high-speed traffic on Greenspot Road and requested the City install a traffic signal at the intersection of Greenspot Road and Blossom Way to calm the traffic. The Blossom Way residents also indicated they had a safety concern with making a southbound Blossom Way left turn at Greenspot Road. As a result of the meeting, the Subcommittee took the following actions:

- 1) The option for a proposed speed reduction for Greenspot Road under Assembly Bill AB-43 is being considered.
- 2) Public Works Director/City Engineer Zamano to consider the installation of signage signaling autistic children present within the neighborhood.
- 3) The extension of the center median to restrict southbound left-turn movements out of Blossom Way and designated eastbound left-turn pocket into Blossom Way.

FINDINGS: City staff has evaluated roadway segments City-wide that experience high-speed traffic that exceeds posted speed limits and finds that the roadway segment on Greenspot Road between Boulder Avenue and Weaver Street is a candidate for implementing a speed reduction per Assembly Bill AB-43. With support from the Highland Police Department, City staff will be recommending a reduction of the posted speed limit from 45 mph to 40 mph on Greenspot Road between Boulder Avenue and Weaver Street for both eastbound and westbound directions. Reducing the speed limit on Greenspot Road and other segments does, however, require an Engineering and Traffic Survey Report. The previous study of Greenspot Road showed the existing 85th percentile speed is about 5-12 mph over the posted speed limit. City staff is working with an on-call engineering firm to determine if this segment of roadway can be designated as a safety corridor or a segment that generates high concentrations of pedestrian and bicyclists to justify the speed reduction in accordance with AB-43. We anticipate completion of this task in the 3rd quarter of 2024.

City staff does not recommend the installation of autistic children signage within public right-of-way because it is not the City's practice. Blossom Way is a cul-de-sac with a very low volume of traffic.

Staff retained Willdan Engineering to analyze the traffic patterns on Greenspot Road and Blossom Way, conduct a traffic signal warrant analysis for the intersection, analyze the left-turn access for Blossom Way and report their findings and recommendations. Willdan began traffic data collection after the SBVMWD SNRC pipeline construction was completed along Greenspot near Blossom Way and local traffic resumed its normal function.

Willdan presents their findings in their traffic study titled "Traffic Signal Warrant Analysis and Left Turn Access Analysis at the Intersection of Greenspot Road and Blossom Way" dated June 6, 2024 and recommends the following:

- 1) The intersection fails to meet any of the nine traffic signal warrants under the latest edition of California Manual of Uniform Traffic Control Devices (CAMUTCD); therefore, a traffic signal is not warranted for this intersection.

- 2) The intersection is improved by restricting the Blossom Way southbound left-turn movement. Willdan presents 3 concept left-tun restriction improvements options as shown in Attachment D of the traffic study to address the safety concern raised by the residents of Blossom Way.
- 3) With the understanding that a traffic signal will be installed by the future Blossom Trails Development project, Willdan recommends implementing Concept 1 left-tun restriction improvements. Of the 3 concepts presented, Concept 1 improvement is the easiest to remove from the intersection when future signal improvements are constructed and is the most cost-effective approach for restricting southbound left turn movements.

RECOMMENDATION: It is recommended that the Subcommittee approve a Concept 1 left-turn restriction improvements at the intersection of Greenspot Road and Blossom Way and direct staff to seek professional services and construction bids to construct the intersection improvements.

Subject: Traffic Signal Warrant Analysis and Left Turn Access Analysis at the Intersection of Greenspot Road and Blossom Way

Dear Mr. Zamano:

Willdan Engineering is pleased to submit this traffic signal warrant analysis study and subsequent left turn access analysis for the intersection of Greenspot Road and Blossom Way in the City of Highland. This analysis is based on the combination of the existing traffic conditions at the intersection and on the guidelines presented in the California Manual on Uniform Traffic Control Devices (CA-MUTCD) dated November 2014 Rev 8 (January 2024).

EXISTING CONDITIONS

Greenspot Road and Blossom Way is a 3-legged intersection that is currently stop controlled on the southern approach of Blossom Way. Greenspot Road runs east-west and Blossom Road runs north-south.

Greenspot Road is approximately 78- to 84-foot-wide major arterial roadway, due to the roadway becoming wider east of the intersection. The eastbound approach to the intersection has a double yellow painted median and the westbound approach has a raised median island. Eastbound Greenspot Road has a left-turn pocket and two through lanes. Westbound Greenspot Road has a through lane and a shared through/right-turn lane. On-street parking is not permitted on both sides of Greenspot Road and there are bike lanes on both sides. The posted speed limit is 45 miles per hour.

The southbound approach of Blossom Way is a 36-foot wide unstriped roadway with one lane in each direction and allows parking on both sides of the road. There is no posted speed limit.

DATA

Traffic Counts

Twenty-four (24) hour approach counts were collected for the intersection of Greenspot Road and Blossom Way on Tuesday, February 13, 2024. The following table summarizes the data collected:

Blossom Way	Approach Volume	AM Peak Hour	PM Peak Hour
North Leg (Southbound)	77	11 (7:15 AM)	10 (4:45 PM)

Greenspot Road	Approach Volume	AM Peak Hour	PM Peak Hour
West Leg (Eastbound)	10500	587 (7:45 AM)	1122 (5:00 PM)
East Leg (Westbound)	10065	1210 (7:15 AM)	766 (2:45 PM)

Attachment A summarizes the 24-hour approach counts.

Collision Data

Collision data was obtained from the California Highway Patrol’s Statewide Integrated Traffic Records System (SWITRS) and the San Bernardino County Sheriff’s Department collision database. For this warrant, collision data was analyzed from January 1, 2020, to February 21, 2024 (the latest available). The existing thirteen lot residential subdivision was occupied in the first quarter of 2020. During this time period, there were no reported collisions at the study intersection. The collision data can be found in **Attachment B**.

TRAFFIC ANALYSIS

The results of the analysis of the CA-MUTCD traffic signal warrants as they apply to the intersection of Greenspot Road and Blossom Way are summarized below. The CA-MUTCD states that an intersection can be analyzed at a 70% reduction factor if the major street has a critical speed over 40 MPH. The major street, Greenspot Road has a posted speed limit of 45 MPH. Therefore, the 70% reduction factor was used in the following traffic signal warrant study. **Attachment C** provides the completed traffic signal warrant analysis.

- Warrant 1 – Eight-Hour Vehicular Volume = **Not Satisfied**
- Warrant 2 – Four Hour Vehicular Volume Traffic = **Not Satisfied**
- Warrant 3 – Peak Hour = **Not Satisfied**
- Warrant 4 – Pedestrian Volume = **Not Satisfied**
- Warrant 5 – School Crossing = **Not Applicable**
- Warrant 6 – Coordinated Signal Systems = **Not Satisfied**
- Warrant 7 – Crash Experience = **Not Satisfied**
- Warrant 8 – Roadway Network = **Not Satisfied**
- Warrant 9 – Intersection Near Grade Crossing = **Not Applicable**

LEFT TURN ANALYSIS

Since the installation of a new traffic signal at Greenspot Road and Blossom Way is not warranted, an analysis follows of the southbound left turn from Blossom Way to eastbound Greenspot Road.

Collision Data

As indicated before, there are no records of crashes at the intersection within the last four years.

Video Surveillance

A camera was set up with a clear view of southbound Blossom Way turning movements on February 13, 2024, for 24 hours. Vehicles were observed making right and left turns from Blossom Way. The video was reviewed, particularly in the AM and PM peak hours, and, as reflected in the count data, there were very few turning movements throughout the day.

RECOMMENDATIONS

The intersection of Greenspot Road and Blossom Way failed to meet any of the nine MUTCD Traffic Signal Warrants. Therefore, the analysis of the southbound left-turn from Blossom Way onto eastbound Greenspot Road was performed. The data collected, including numbers of vehicles, surveillance, and collision history, revealed there are a

limited number of southbound left-turns are being made throughout the day and there does not appear to be any recent history of collisions.

During a Public Works Subcommittee meeting held at City Hall on December 21, 2022, Blossom Way residents expressed their concerns for traffic safety when making southbound Blossom Way left turn movements at Greenspot Road. In response, Willdan collected southbound left turn traffic data and analyzed the vehicular left turn movements through the intersection. After a review of all the data combined with engineering judgement, it is recommended that southbound Blossom Way at Greenspot Road be improved to deter the left-turn movement. The basic design for this improvement would be the installation of a right-turn only sign (R3-5R) and a right-turn arrow pavement marking. Three options for more restrictive improvements follow below. All three would include the installation of the right-turn only sign and right-turn arrow pavement marking. It should be noted that the sketches are conceptual and, if selected, the improvement would need detailed design plans approved by the City of Highland.

Concept 1 would include the installation of bollards (flexible plastic delineators) extending the existing left turn striping and restricting southbound left-turns. A sketch of this improvement is attached in **Appendix D-1**. The estimated cost for this improvement is approximately \$8,625.

Concept 2 would include the installation of a triangular raised median that directs vehicles right and allows cars to turn left from eastbound Greenspot Road. A sketch of this improvement is attached in **Appendix D-2**. The estimated cost for this improvement is approximately \$36,915.

Concept 3 would modify the existing median island and extend it, preventing southbound left-turns. A sketch of this improvement is attached in **Appendix D-3**. The estimated cost for this improvement is approximately \$95,450.

Willdan Engineering recommends the installation of **Concept 1** to accommodate future demand at the intersection, which should warrant a new traffic signal as a result of anticipated new development on the south side of Greenspot Road and in the area in general.
