HARP2 - HRACalc (dated 22118) 1/9/2023 2:26:18 PM - Output Log

GLCs loaded successfully
Pollutants loaded successfully
Pathway receptors loaded successfully
****
RISK SCENARIO SETTINGS

Receptor Type: Resident
Scenario: Cancer
Calculation Method: Derived

****
EXPOSURE DURATION PARAMETERS FOR CANCER

Start Age: 3
Total Exposure Duration: 3

Exposure Duration Bin Distribution
3rd Trimester Bin: 0
0<2 Years Bin: 0
2<9 Years Bin: 3
2<16 Years Bin: 0
16<30 Years Bin: 0
16 to 70 Years Bin: 0

****
PATHWAYS ENABLED

NOTE: Inhalation is always enabled and used for all assessments. The remaining pathways are only used for cancer and noncancer chronic assessments.

Inhalation: True
Soil: True
Dermal: True
Mother's milk: True
Water: False
Fish: False
Homegrown crops: True
Beef: False
Dairy: False
Pig: False
Chicken: False
Egg: False

****
INHALATION

Daily breathing rate: RMP

Worker Adjustment Factors
Worker adjustment factors enabled: NO

Fraction at time at home
3rd Trimester to 16 years: OFF
16 years to 70 years: ON

****
SOIL & DERMAL PATHWAY SETTINGS

Deposition rate (m/s): 0.02
Soil mixing depth (m): 0.01
Dermal climate: Warm

****
HOMEGROWN CROP PATHWAY SETTINGS

Household type: HouseholdsthatGarden
Fraction leafy: 0.137
Fraction exposed: 0.137
Fraction protected: 0.137
Fraction root: 0.137

****
TIER 2 SETTINGS

Tier2 adjustments were used in this assessment. Please see the input file for details.
Tier2 - What was changed: ED or start age changed|
Calculating cancer risk
Cancer risk breakdown by pollutant and receptor saved to:
C:\Users\dlarocca\Desktop\Air Quality Work\HARP2\5thVictoriaOp\hra\5thVicCancerOpStudentCancerRisk.csv
Cancer risk total by receptor saved to: C:\Users\dlarocca\Desktop\Air Quality Work\HARP2\5thVictoriaOp\hra\5thVicCancerOpStudentCancerRiskSumByRec.csv

HARP2 - HRACalc (dated 22118) 1/9/2023 2:24:55 PM - Output Log

GLCs loaded successfully
Pollutants loaded successfully
Pathway receptors loaded successfully
****
RISK SCENARIO SETTINGS

Receptor Type: Resident
Scenario: NCChronic
Calculation Method: Derived

****
EXPOSURE DURATION PARAMETERS FOR CANCER
Exposure duration are only adjusted for cancer assessments

****
PATHWAYS ENABLED

NOTE: Inhalation is always enabled and used for all assessments. The remaining pathways are only used for cancer and noncancer chronic assessments.

Inhalation: True
Soil: True
Dermal: True
Mother's milk: True
Water: False
Fish: False
Homegrown crops: True
Beef: False
Dairy: False
Pig: False
Chicken: False
Egg: False

****
INHALATION

Daily breathing rate: LongTerm24HR

Worker Adjustment Factors
Worker adjustment factors enabled: NO

Fraction at time at home
NOTE: Exposure duration (i.e., start age, end age, ED, & FAH) are only adjusted for cancer assessments.

****
SOIL & DERMAL PATHWAY SETTINGS

Deposition rate (m/s): 0.02
Soil mixing depth (m): 0.01
Dermal climate: Warm

****
HOMEGROWN CROP PATHWAY SETTINGS

Household type: HouseholdsthatGarden
Fraction leafy: 0.137
Fraction exposed: 0.137
Fraction protected: 0.137
Fraction root: 0.137

****
TIER 2 SETTINGS

Tier2 adjustments were used in this assessment. Please see the input file for details.
Tier2 - What was changed: ED or start age changed
Calculating chronic risk
Chronic risk breakdown by pollutant and receptor saved to:
C:\Users\dlarocca\Desktop\Air Quality Work\HARP2\5thVictoriaOp\hra\5thVicChronicOpNCChronicRisk.csv
Chronic risk total by receptor saved to: C:\Users\dlarocca\Desktop\Air Quality Work\HARP2\5thVictoriaOp\hra\5thVicChronicOpNCChronicRiskSumByRec.csv
HRA ran successfully

*HARP - HRACalc v22118 1/9/2023 2:24:55 PM - Chronic Risk - Input File: C:\Users\dlarocca\Desktop\Air Quality Work\HARP2\5thVictoriaOp\hra\5thVicChronicOpHRAInput.hra

Appendix B
Biological Constraints Analysis

DUDEK
38 NORTH MARENGO AVENUE
PASADENA, CALIFORNIA 91101
T 626.204.9800 F 626.204.9834

MEMORANDUM

To:	Kevin Rice, Patriot Development Partners
From:	Michael Cady, Dudek
Subject:	Biological Constraints Analysis for the 5th Street Warehouse Project in Highland, California
Date:	November 2025
Attachments:	A – Figures B – Photo Exhibit C – Assessment of Special-Status Plant Species Potentially Occurring in the Study Area D – Assessment of Special-Status Wildlife Species Potentially Occurring in the Study Area

Patriot Development Partners is proposing to construct an industrial/warehouse building (project) on a 7.87-acre property (project site) in Highland, California. The proposed work will involve demolition of existing residential structures and construction of a 176,066 square foot warehouse building, including loading docks, truck and vehicle parking, and landscaping, fencing, and street/sidewalk improvements. This memorandum (memo) details the methodology and results of Dudek's site visit and analysis of biological resources within the property (project site) and a 300-foot buffer (study area) in Highland, California (Attachment A: Figure 1, Project Location).

1 Project Location

Regionally, the project site is situated within the City of Highland in San Bernardino County, located in the western extent of the Inland Empire area near the southern slope of the San Bernadino Mountains (Figure 1). The project site occurs on the *Redlands* U.S. Geological Survey (USGS) 7.5-minute quadrangle map within Section 00 of Township 01S South, Range 03 West[1].

Locally, the project site is located directly east of Victoria Avenue, between 3rd and 5th street, approximately 1.4 miles west of State Route 210 and directly north of the San Bernardino International Airport (Figure 1). The project site is composed of 11 parcels (Assessor's Parcel Number 1192-551-01, 1192-551-14, 1192-551-15, 1192-551-02, 1192-551-03, 1192-551-04, 1192-551-05, 1192-551-06, 1192-551-07, 1192-551-12 and 1192-551-13).

2 Methodology

Dudek conducted a literature review and field visit to determine the existing biotic and abiotic conditions, and the presence of sensitive biological resources within the project site and a 300-foot buffer (study area). The field visit

[1] United States Public Land Survey System

was limited only to accessible public areas without trespassing on private property. Binoculars were used to survey inaccessible areas as feasible and aerial imagery was reviewed to complete mapping of potential resources.

2.1 Literature Review

Prior to conducting the field investigation, the California Department of Fish and Wildlife (CDFW) California Natural Diversity Database (CNDDB) and California Native Plant Society (CNPS) inventory were queried based on the USGS 7.5-minute topographic quadrangle map for Redlands, California where the study area is located, as well as the adjacent USGS 7.5-minute quadrangle maps (i.e., Yucaipa, San Bernardino South, Harrison Mountain, San Bernardino North, Keller Peak, Sunnymead, El Casco, and Riverside East). The purpose of this review was to determine whether special-status plant and wildlife species are known to occur in the vicinity of or within the study area.

The following data sources were reviewed to assist with the assessment of biological resources:

- CDFW CNDDB (CDFW 2022a)
- CNPS Inventory of Rare and Endangered Plants (CNPS 2022a)
- U.S. Fish and Wildlife Service (USFWS) Information for Planning and Consultation (USFWS 2022a)
- U.S. Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey (USDA 2022a)
- CDFW Biogeographic Information and Observation System (CDFW 2022b)

Other literature reviewed included A Manual of California Vegetation, Online Edition (CNPS 2022b); the California Natural Community List (CDFW 2022c); State and Federally Listed Endangered, Threatened, and Rare Plants of California (CDFW 2022d); State and Federally Listed Endangered and Threatened Animals of California (CDFW 2022e); and the CDFW California Wildlife Habitat Relationships Life History Accounts and Range Maps (CDFW 2022f). The following available resources were reviewed to assess the potential for jurisdictional waters: aerial photographs (Google 2022; National Environmental Title Research LLC [NETR] 2022); the USGS *Redlands* 7.5-minute topographic quadrangle map (USGS 2015); the National Hydrography Dataset and Watershed Boundary Dataset (USGS 2022); and the USFWS National Wetland Inventory (USFWS 2022b).

2.2 Field Visit

Dudek biologist Lily Sam performed the field survey on October 19, 2022 between 1130 and 1230 hours. The temperature during the survey was 92-degrees Fahrenheit (°F), clear skies, and wind speeds ranging between 3 and 5 miles per hour. The biological survey included vegetation mapping, the mapping of sensitive biological resources, if present, within the project site and an evaluation of the potential for special-status species to occur.

2.2.1 Vegetation Community and Land Cover Mapping

Vegetation communities and land uses within the study area were mapped in accordance with CDFW's Protocols for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Natural Communities (CDFW 2018) and CNPS' Guideline for Mapping Rare Vegetation (CNPS 2011). Vegetation community classifications used in this report follow A Manual of California Vegetation, online edition (CNPS 2022b), and California Natural Community List (CDFW 2022c), where feasible, with modifications made to accommodate the lack of conformity of

the observed communities (e.g., developed/disturbed land uses) using Draft Vegetation Communities in San Diego County (Oberbauer et al. 2008) or in *Methods Used to Survey the Vegetation of Orange County Parks and Open Space Areas and The Irvine Company Property* (Jones and Stokes 1993).

Vegetation communities and land uses within the study area were mapped in the field using ESRI Collector, a mobile data collection application, on a digital aerial-based background. Following completion of the fieldwork, all vegetation linework was finalized using ArcGIS and geographic information system coverage was created. Once in ArcGIS, the acreage of each vegetation community and land cover present within the study area was determined.

2.2.2 Plants

All native and naturalized plant species encountered during pedestrian transects within the study area were identified and recorded to the extent feasible given the available plant phenology. Latin and common names for plant species with a California Rare Plant Rank (CRPR) follow the CNPS Online Inventory of Rare and Endangered Plants (CNPS 2022a). For plant species without a CRPR, Latin names follow the Jepson Interchange List of Currently Accepted Names of Native and Naturalized Plants of California (Jepson Flora Project 2022), and common names follow the USDA NRCS Plants Database (USDA 2022b).

2.2.3 Wildlife

The Dudek biologist walked the entire project site to identify and record all wildlife species as detected during field surveys by sight, calls, tracks, scat, or other signs. In addition to species observed, expected wildlife usage of the site was determined according to known habitat preferences of regional wildlife species and knowledge of their relative distributions in the area. No trapping or focused surveys for nocturnal species were conducted. Latin and common names of animals follow Crother (2012) for reptiles and amphibians, American Ornithologists' Society (AOS 2022) for birds, Wilson and Reeder (2005) for mammals, North American Butterfly Association (NABA 2018) for butterflies, and Moyle (2002) for fish.

2.3 Special-Status Species Habitat Assessment

Special-Status Plant Species

Endangered, rare, or threatened plant species as defined in Section 15380(b) of the CEQA Guidelines (14 CCR 15000 et seq.) are referred to as "special-status plant species" and, as used in this report, include (1) plant species listed, proposed for listing, or candidates for listing as endangered or threatened recognized in the context of California Endangered Species Act (CESA) and the federal Endangered Species Act (FESA) (CDFW 2022d); and/or (2) plant species with a CRPR 1B (plants that are rare, threatened, or endangered in California and elsewhere) or 2B (Plants rare, threatened, or endangered in California but more common elsewhere) as designated by the CNPS (2022a). CRPR list 3 (plants about which more information is needed) and 4 (plants of limited distribution) are not defined as species that are identified as a candidate, sensitive, or special status species.

For each species listed, a determination was made regarding the potential for the species to occur within the study area based on site-specific information gathered during the field reconnaissance, such as the location of the site, vegetation communities and soils present, current site conditions, and each species' known range, habitat associations, preferred soil substrate, life form, elevation, and blooming period.

Special-Status Wildlife Species

Endangered, rare, or threatened wildlife species as defined in CEQA Guidelines, Section 15380(b) (14 CCR 15000 et seq.), are referred to as "special-status wildlife species" and, as used in this report, include (1) wildlife species listed, proposed for listing, or candidates for listing as endangered or threatened recognized in the context of CESA and FESA (CDFW 2022e); (2) California Species of Special Concern (SSC) as designated by CDFW (2022g); and (3) mammals and birds that are fully protected species as described in the California Fish and Game Code, Sections 4700 and 3511 (CDFW 2022h).

For each species listed, a determination was made regarding potential use within the study area based on site-specific information gathered during the field reconnaissance, such as the location of the site, vegetation communities and soils present, current site conditions, and each species' known range, habitat preferences, and knowledge of the species' relative distributions in the area.

3 Environmental Setting

The study area is in the western extent of the Inland Empire region of San Bernardino County near the southern slope of the San Bernardino Mountains, approximately 0.8 miles north of the Santa Ana River and 1.1 miles south of the Warm Creek wash. Western San Bernardino County has a hot-summer Mediterranean climate with mild winters and hot, dry summers. August is the average warmest month with an average high temperature of 96.2˚F and January is the coolest month on average with a low of 38.5˚F (WRCC 2022). Rainfall occurs primarily between November and April, with the maximum average precipitation occurring in February and the mean annual rainfall for the region is 16.12 inches of rain per year (WRCC 2022).

The proposed project is in a residential area, situated just north of the San Bernardino International Airport. The surrounding tracts are mostly developed and zoned as residential, industrial, or commercial. There are several undeveloped tracts to the immediate west and a flood control channel (City Creek) that is directed underground at the immediate southeast corner of the property, continues southwest below 3rd street for 0.15 miles, and is directed aboveground at the southwest corner of 3rd Street and Victoria Avenue. There is a large area of undeveloped land to the southeast owned by the San Bernardino International Airport. The Santa Ana River floodplain is just southeast of this area, 0.8 miles from the project site.

3.1 Topography

The topography of the study area is gentle sloping with no changes in the surrounding area. The project site sits between 1,141-1,149 feet above mean sea level (AMSL) (Google 2022).

3.2 Soils

According to the USDA NRCS Web Soil Survey (USDA 2022a), the study area contains two soil types: Tujunga gravely loamy sand, 0 to 9 percent slopes association and Psamments, Fluvents and Frequently flooded soils. The two soil types are described below according to its official soil description (USDA 2022c).

Tujunga Gravely Loamy Sand, 0 to 9 percent slopes

This soil mapping unit is nearly level to slightly sloping and is found on alluvial fans and floodplains. The primary soil type within this mapping unit is Tujunga gravely loamy sand, which is a somewhat excessively drained soil formed in alluvium of granitic rock. This soil mapping unit is found in most of the project site (approximately 80%) except for a small region in the southeast corner.

Psamments, Fluvents and Frequently flooded soils

This soil mapping unit is found in drainageways. It is composed of approximately 55% psamments and 45% fluvents, which are both somewhat excessively drained soils formed in alluvium. Psamments and fluvents are both suborders of the Entisol soil group, which do not form pedogenic horizons (USDA 2022d). This soil mapping unit is found in approximately 20% of the project site in the southeast corner, directly adjacent to a flood control channel (City Creek).

4 Results

Representative photos of the study area are included in Attachment B, Photo Exhibit.

4.1 Vegetation Communities and Land Covers

No vegetation communities were identified in the study area. The land cover types present in the study area are described below, their acreages are presented in Table 1, and their spatial distributions are presented in Figure 2, Land Cover (Attachment A).

Table 1. Land Cover Types in the Study Area

Land Cover	Acreage within the Study Area[1]
Disturbed Habitat	17.36
Non-Vegetated Channel of Floodway	0.28
Urban/Developed	12.73
Total[2]	**30.37**

Notes:
1 Project site and a 300-foot buffer.
2 Totals may not add up due to rounding.

4.1.1 Disturbed Habitat

Although not recognized by the Manual of California Vegetation, Online Edition (CNPS 2020b) or the Natural Communities List (CDFW 2020b), disturbed habitat is described in *Draft Vegetation Communities of San Diego County* (Oberbauer et al. 2008). Disturbed habitat is described as areas generally lacking vegetation due to high levels of existing or historical human disturbance and are no longer recognizable as a native or naturalized vegetation association. Areas mapped as disturbed habitat may include unpaved roads, trails, and graded areas (Oberbauer et al. 2008). Vegetation in these areas, if present at all, is usually sparse and dominated by non-native weedy herbaceous species (Oberbauer et al. 2008). The disturbed habitat consists of most of the project site and surrounding 300-foot

buffer. Apart from one western sycamore tree (*Platanus racemose*), all native and non-native vegetation listed in 4.2 below was found in the disturbed regions of the project site. Historical imagery and observations during the field visit provided evidence of regular maintenance and discing in the disturbed regions of the study area. These regions were overall sparsely vegetated with patches of dry grassland.

4.1.2 Non-Vegetated Channel

Natural flood channel, also described as non-vegetated channel or floodway (Oberbauer et al. 2008), is the sandy, gravelly, or rocky fringe of waterways or flood channels that are earthen-bottom, and unvegetated on a relatively permanent basis. Vegetation may be present but is usually less than 10% total cover and grows on the outer edge of the channel. This natural flood channel was mapped in the southeast corner of the study area, outside of the project site. The channel is directed underground approximately 12 feet from the project site.

4.1.3 Urban/Developed

Although not recognized by the Manual of California Vegetation, Online Edition (CNPS 2022b), or the Natural Communities List (CDFW 2022c), urban/developed lands are described by Oberbauer et al. (2008). According to Oberbauer et al. (2008), urban/developed land represents areas that have been constructed upon or otherwise physically altered to an extent that native vegetation communities are not supported. This land cover type generally includes permanent or semi-permanent structures, pavement or hardscape, landscaped areas, and areas with a large amount of debris or other materials (Oberbauer et al. 2008). Typically, this land cover type is unvegetated or only supports a variety of ornamental plants and landscaping. Developed land within the project site and 300-foot buffer consists of residential housing and paved streets. One native western sycamore tree (*Platanus racemose*) was found in the developed land within the project site.

4.2 Plants

Two native plant species, two ornamental trees, and various non-native annual/perennial herbs were observed within the project site and the surrounding 300-foot buffer. The ornamental trees include one Peruvian pepper tree (*Schinus mole*) and one chinaberry tree (*Melia azedarach*) located in the Disturbed southwestern region of the property. One native western sycamore tree (*Platanus racemose*) is located at the southern end of the property between two buildings. Native telegraph weed (*Heterotheca grandiflora*) and various non-native herbaceous plants including cowpen daisy (*Verbesina encelioides*), puncture vine (*Tribulus terrestris*), short-pod mustard (*Hirschfeldia incana*), and spotted spurge (*Euphorbia maculata*) are located along the border of the property. The study area was otherwise devoid of vegetation. The vegetation classified within the study area can be found in the vegetation community descriptions above.

4.2.1 Special-Status Plant Species Assessment

57 plant species that meet the special-status definition in Section 2.3 above have recorded occurrences in the USGS Redlands 7.5-minute quadrangle and eight surrounding quadrangles (CDFW 2022a, CNPS 2022a) or are included in the IPaC report for the study area (USFWS 2022a). Each special-status plant species is assessed in Attachment C. The study area is not within any designated critical habitat (USFWS 2022a). No special-status species were observed during the site visit. Due to the disturbed and developed conditions of the site and lack of suitable vegetation, microhabitat conditions, and topographic setting, none of the special status species are expected to

occur within the project site. Species that occur in similar soil types as the project site are not expected to occur due to the impacted and compacted conditions of the soil.

4.3 Wildlife

Three species of wildlife were observed during the survey. Bird species observed were common raven (*Corvus corax*), house finch (*Haemorhous mexicanus*), and house sparrow (*Passer domesticus*). No reptiles were observed. No amphibians were observed. No mammal species were observed. However, evidence of burrows was observed during the site visit.

4.3.1 Special-Status Wildlife Species Assessment

50 wildlife species that meet the special-status definition in Section 2.3 above have recorded occurrences in the USGS Redlands 7.5-minute quadrangle and eight surrounding quadrangles (CDFW 2022a) or are included in the IPaC report for the study area (USFWS 2022a). Each special-status wildlife species is assessed in Attachment E. The study area is not within any designated critical habitat (USFWS 2022a). No special-status wildlife species were observed during the site visit. One special-status wildlife species has a moderate potential to occur: burrowing owl (*Athene cunicularia*).

Burrowing owl is a candidate for listing under the California Endangered Species Act, a USFWS Bird of Conservation Concern and a CDFW Species of Special Concern. The burrowing owl is an opportunistic species that can move onto a site once a suitable burrow is established and unoccupied. Grassland habitat within the disturbed area of the project site and small mammal burrows found during the site visit may provide suitable habitat for this species. While the grassland habitat is highly disturbed and regularly maintained, there is one known occurrence of this species less than one mile from the project site. All other mentioned special-status species are not expected to occur at the project site due to the disturbed habitat conditions and the lack of suitable habitat, soils, and vegetation.

4.4 Jurisdictional Aquatic Resources

A formal delineation of aquatic resources was not conducted as part of this survey effort. There are no jurisdictional aquatic resources or connectivity to any aquatic habitat within the Project site. However, a flood control channel (City Creek) is located within the Study Area, directly to the east of the project site. This feature is expected to carry waters of the U.S. regulated by the Clean Water Act and be defined as a stream that is regulated under California Fish and Game Code. While construction activities will not directly impact this channel, erosion, and chemical pollution (releases of fuel, oil, lubricants, paints, release agents, and other construction materials) may affect jurisdictional waters. The release of chemical pollutants can reduce the water quality downstream and degrade adjacent habitats.

4.5 Wildlife Movement, Corridors, and Nursery Sites

Wildlife corridors are linear features that connect large patches of natural open space and provide avenues for the migration of animals. Corridors can also be aquatic resources that provide passage for fish. Habitat linkages are small patches that join larger blocks of habitat and help reduce the adverse effects of habitat fragmentation; they may be continuous habitat or discrete habitat islands that function as steppingstones for wildlife dispersal.

On a regional level, the study area does not occur within any designated wildlife corridors or habitat linkages identified in the South Coast Missing Linkages analysis conducted by South Coast Wildlands (2008). The study area is not mapped as an area of essential habitat connectivity in CDFW's California Essential Habitat Connectivity Project (Spenser et al. 2010) as shown in the CDFW BIOS (CDFW 2022b) and is identified as an area with Limited Connectivity. Though no essential habitat occurs at the vicinity level, the study area is located 2.8 miles south of the foothills of the San Bernardino National Forest, which is mapped as an Essential Connectivity Area and Irreplaceable and Essential Corridors. The project site is surrounded by developed areas consisting of buildings, parking lots, and paved/asphalt roads. Due to the disturbed and developed nature of the project site and surrounding area, project activities are not expected to have any negative impacts on wildlife movement.

The study area lacks aquatic habitat and is isolated from streams that do support habitat. Therefore, the study area does not support fish or their movement. Three trees occur within the project site; however, they are isolated from one another; therefore, it is unlikely for the project site to support large wildlife nursery sites. The study area contains some vegetation that could provide nesting habitat for birds protected under the Migratory Bird Treaty Act and California Fish and Game Code Sections 3503, 3503.5, and 351. The surrounding open areas can support ground nesting species such as killdeer.

5 Recommendations

Based upon Dudek's experience with other projects in the Inland Empire region, San Bernardino Mountains, and San Bernardino County, in addition to what the resource agencies typically request, the following surveys and measures are recommended to ensure impacts to special-status plants, special-status wildlife, nesting birds, jurisdictional waters and City-protected trees are avoided.

- **Focused Burrowing Owl Surveys:** The project site contains potentially suitable habitat for burrowing owl and therefore a presence/absence survey should be conducted in accordance with the Staff Report on Burrowing Owl Mitigation (CDFW 2012). The burrowing owl breeding season presence/absence survey requires four crepuscular surveys, with a 500-foot buffer as legally able, using 7-20 meter transects. Four survey passes must be conducted with at least one site visit between February 15 and April 15, and a minimum of three survey visits, spaced at least three weeks apart, between April 15 and July 15, with at least one visit after June 15. If the Project timeline does not allow for the breeding season surveys to occur, then four surveys spread evenly through the non-breeding season (October 1 through February 1) should be conducted using the same methodology.

  If burrowing owl or diagnostic sign of the species (burrows with pellets, feather, and whitewash) are observed, the applicant will consult with CDFW to see if take authorization through the California Endangered Species Act Incidental Take Permit (ITP) process is needed.

  In the event an ITP is needed, mitigation for direct impacts to burrowing owl shall be fulfilled through compensatory mitigation at a minimum 1:1 habitat replacement of equal or better functions and values to those impacted by the Project, or as otherwise determined through the ITP process. Mitigation shall be accomplished either through off-site conservation or through a CDFW-approved mitigation bank. If mitigation is not purchased through a mitigation bank, and lands are conserved separately, a cost estimate shall be prepared to estimate the initial start-up costs and ongoing annual costs of management activities for the management of the conservation easement area(s) in perpetuity. The funding source shall be in the form of an endowment to help the qualified natural lands management entity that is ultimately selected to

hold the conservation easement(s). The endowment amount shall be established following the completion of a Project-specific Property Analysis Record to calculate the costs of in-perpetuity land management. The Property Analysis Record shall take into account all management activities required in the Incidental Take Permit to fulfill the requirements of the conservation easement(s), which are currently in review and development.

- **Pre-Construction Burrowing Owl Survey:** A qualified biologist shall conduct a pre-construction burrowing owl survey within 30 days of ground disturbing activities regardless of the results of the focused surveys (CDFW 2012). Surveys should be conducted in all portions of the project site and 500-foot buffer that contain suitable habitat for the species, where legally accessible. If burrowing owl is detected, the applicant shall consult with CDFW to determine if an ITP is necessary. If an ITP is necessary then the mitigation would be the same as the aforementioned ITP requirements.
- **City of Highland Tree Ordinance:** If the trees located within the project site are to be removed during construction activities, a tree inventory must be taken to determine whether they are considered "heritage trees" and thereby subject to the City of Highland's tree ordinance. The City of Highlands's Municipal Code, Section 16.64.040 addresses the preservation of heritage trees and specifies required conditions and permits necessary for removal of heritage trees (City of Highland 2022). Section 16.06.080 defines heritage trees as any live tree, shrub, or plant which meets at least one for the following criteria: 1) All woody plants in excess of 15 feet in height and having a single trunk circumference of 24 inches or more, as measures 4 and one-half feet above ground level; or 2) Multitrunked trees having a total circumference of 30 inches or more, as measured four and one-half feet from the ground; 3) A stand of trees, the nature of which makes each dependent upon the others for survival; or 4) Any other tree as may be deemed historically or culturally significant by the Community Development Director or designee because of size, condition, location, or aesthetic value (Title 16, Chapter 16 of the City's Municipal Code). Removal of heritage trees requires a permit application and approval by the City's Community Development Director. Any heritage tree removal subject to a tree removal permit shall require replacement at a ratio of two to or (2:1) with size and species to be determined by the Community Development Director.
- **Stormwater Pollution Prevention Plan (SWPPP): D**uring construction, erosion-control measures would be implemented as part of the Storm Water Pollution Prevention Plan (SWPPP) for the Project. Prior to the start of construction activities, the Contractor is required to file a Permit Registration Document with the State Water Resources Control Board (SWRCB) in order to obtain coverage under the National Pollutant Discharge Elimination System (NPDES) General Permit for Storm Water Discharges Associated with the Construction and Land Disturbance Activities (Order No 2009-009-DWQ, NPDES No. CAS000002) or the latest approved general permit. This permit is required for earthwork that results in the disturbance of one acre or more of total land area. The required SWPPP will mandate the implementation of best management practices to reduce or eliminate construction-related pollutants in the runoff, including sediment. Therefore, temporary indirect impacts would be less than significant due to compliance with regulations.
- **Pre-Construction Nesting Bird Survey:** Trees and residential buildings within the project site may provide nesting habitat for native migratory birds protected by the federal Migratory Bird Treaty Act (MBTA) and California Fish and Game Code Sections 3500 and 3513. Project construction should be conducted in compliance with the conditions set forth in the MBTA and California Fish and Game Code to protect active bird/raptor nests. To the maximum extent feasible, construction of the warehouse facility and disturbance to the project site should occur during the non-breeding season for nesting birds (generally late September to early March) and nesting raptors (generally early July to late January) to avoid impacts

to nesting birds and raptors. If the project requires that work be initiated during the breeding season for nesting birds (March 1–September 30) and nesting raptors (February 1–June 30), in order to avoid direct impacts on active nests, a pre-construction survey should be conducted in the study area by qualified Biologists (someone who has more than three years of experience of conducting nesting bird surveys in the project region) for nesting birds and/or raptors within three days prior to project activities. If the Biologist does not find any active nests within or immediately adjacent to the impact areas, the vegetation clearing/construction work should be allowed to proceed.

If the Biologist finds an active nest within or immediately adjacent to the construction area and determines that the nest may be impacted or breeding activities substantially disrupted, the Biologist should delineate an appropriate buffer zone around the nest depending on the sensitivity of the species and the nature of the construction activity. At the discretion of the biologist, a no-work buffer zone shall be established suitable to the particular bird species and location of the nest until the nest is vacated and juveniles have fledged, and there is no evidence of a second attempt at nesting. Limits of construction to avoid an active nest shall be established in the field with flagging, fencing, or other appropriate barriers, and construction personnel shall be instructed on the sensitivity of nest areas. The results of the surveys, showing the locations of any active nests detected, and documentation of any avoidance measures taken, shall be submitted to the CEQA lead agency to document compliance with applicable state and federal laws.

Attachment C

Assessment of Special-Status Plant Species Potentially Occurring in the Study Area

Scientific Name	Common Name	Status[1] (Federal/State/CRPR)	Primary Habitat Associations	Potential to Occur
Abronia villosa var. *aurita*	chaparral sand-verbena	None/None/1B.1	Chaparral, Coastal scrub, Desert dunes; Sandy/annual herb/(Jan)Mar–Sep/245–5,245	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, there are no known occurrences within 10 miles of the study area (CDFW 2022).
Allium howellii var. *clokeyi*	Mt. Pinos onion	None/None/1B.3	Great Basin scrub, Meadows and seeps, Pinyon and juniper woodland/perennial bulbiferous herb/Apr–June/4,265–6,065	Not expected to occur. The site is outside of the species' known elevation range.
Allium marvinii	Yucaipa onion	None/None/1B.2	Chaparral/perennial bulbiferous herb/Apr–May/2,490–3,490	Not expected to occur. The site is outside of the species' known elevation range.
Ambrosia pumila	San Diego ambrosia	FE/None/1B.1	Chaparral, Coastal scrub, Valley and foothill grassland, Vernal pools; Alkaline (sometimes), Clay (sometimes), Disturbed areas (often), Loam (sometimes), Sandy (sometimes)/perennial rhizomatous herb/Apr–Oct/65–1,360	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, there are no known occurrences within 10 miles of the study area (CDFW 2022).
Arenaria paludicola	marsh sandwort	FE/SE/1B.1	Marshes and swamps; Openings, Sandy/perennial stoloniferous herb/May–Aug/10–560	Not expected to occur. The site is outside of the species' known elevation range.
Astragalus hornii var. *hornii*	Horn's milk-vetch	None/None/1B.1	Meadows and seeps, Playas; Alkaline, Lake Margins/annual herb/May–Oct/195–2,785	Not expected to occur. Project site lacks suitable micro-habitat (i.e., alkaline soils).
Astragalus pachypus var. *jaegeri*	Jaeger's milk-vetch	None/None/1B.1	Chaparral, Cismontane woodland, Coastal scrub, Valley and foothill grassland; Rocky (sometimes), Sandy (sometimes)/perennial shrub/Dec–June/1,195–3,195	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, there are no known occurrences within 10 miles of the study area (CDFW 2022).
Atriplex coronata var. *notatior*	San Jacinto Valley crownscale	FE/None/1B.1	Playas, Valley and foothill grassland, Vernal pools; Alkaline/annual herb/Apr–Aug/455–1,640	Not expected to occur. Project site lacks suitable micro-habitat (i.e., alkaline soils).
Atriplex serenana var. *davidsonii*	Davidson's saltscale	None/None/1B.2	Coastal bluff scrub, Coastal scrub; Alkaline/annual herb/Apr–Oct/35–655	Not expected to occur. The site is outside of the species' known elevation range.

Scientific Name	Common Name	Status[1] (Federal/State/CRPR)	Primary Habitat Associations	Potential to Occur
Berberis nevinii	Nevin's barberry	FE/SE/1B.1	Chaparral, Cismontane woodland, Coastal scrub, Riparian scrub; Gravelly (sometimes), Sandy (sometimes)/perennial evergreen shrub/(Feb)Mar–June/230–2,705	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, the closest known location is 5.2 miles from the study area (CDFW 2022).
Bouteloua trifida	three-awned grama	None/None/2B.3	Mojavean desert scrub/perennial herb/(Apr)May–Sep/2,295–6,560	Not expected to occur. The site is outside of the species' known elevation range.
Brodiaea filifolia	thread-leaved brodiaea	FT/SE/1B.1	Chaparral, Cismontane woodland, Coastal scrub, Playas, Valley and foothill grassland, Vernal pools; Clay (often)/perennial bulbiferous herb/Mar–June/80–3,670	Not expected to occur. Project site lacks suitable micro-habitat (i.e., clay soils).
Calochortus palmeri var. *palmeri*	Palmer's mariposa-lily	None/None/1B.2	Chaparral, Lower montane coniferous forest, Meadows and seeps; Mesic/perennial bulbiferous herb/Apr–July/2,325–7,840	Not expected to occur. The site is outside of the species' known elevation range.
Calochortus simulans	La Panza mariposa-lily	None/None/1B.3	Chaparral, Cismontane woodland, Lower montane coniferous forest, Valley and foothill grassland; Granitic (often), Sandy, Serpentinite (sometimes)/perennial bulbiferous herb/Apr–June/1,065–3,770	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, there are no known occurrences within 10 miles of the study area (CDFW 2022).
Carex comosa	bristly sedge	None/None/2B.1	Coastal prairie, Marshes and swamps, Valley and foothill grassland/perennial rhizomatous herb/May–Sep/0–2,050	Not expected to occur. Project site lacks suitable wetland habitat preferred by this species (Jepson 2022).
Castilleja cinerea	ash-gray paintbrush	FT/None/1B.2	Meadows and seeps, Mojavean desert scrub, Pebble (Pavement) plain, Pinyon and juniper woodland, Upper montane coniferous forest/perennial herb (hemiparasitic)/June–Aug/5,905–9,710	Not expected to occur. The site is outside of the species' known elevation range.

Scientific Name	Common Name	Status[1] (Federal/State/CRPR)	Primary Habitat Associations	Potential to Occur
Castilleja lasiorhyncha	San Bernardino Mountains owl's-clover	None/None/1B.2	Chaparral, Meadows and seeps, Pebble (Pavement) plain, Riparian woodland, Upper montane coniferous forest; Mesic/annual herb (hemiparasitic)/May–Aug/4,265–7,840	Not expected to occur. The site is outside of the species' known elevation range.
Centromadia pungens ssp. *laevis*	smooth tarplant	None/None/1B.1	Chenopod scrub, Meadows and seeps, Playas, Riparian woodland, Valley and foothill grassland; Alkaline/annual herb/Apr–Sep/0–2,095	Not expected to occur. Project site lacks suitable micro-habitat (i.e., alkaline soils).
Chloropyron maritimum ssp. *maritimum*	salt marsh bird's-beak	FE/SE/1B.2	Coastal dunes, Marshes and swamps/annual herb (hemiparasitic)/May–Oct(Nov)/0–100	Not expected to occur. The site is outside of the species' known elevation range.
Chorizanthe parryi var. *parryi*	Parry's spineflower	None/None/1B.1	Chaparral, Cismontane woodland, Coastal scrub, Valley and foothill grassland; Openings, Rocky (sometimes), Sandy (sometimes)/annual herb/Apr–June/900–4,000	Low potential to occur. Sandy soils are present, however the project site has been landscaped and regularly maintained since 1959 (NETR 2022). There are 12 known occurrences within 5 miles of the study area but all were in or before year 2006.
Chorizanthe xanti var. *leucotheca*	white-bracted spineflower	None/None/1B.2	Coastal scrub, Mojavean desert scrub, Pinyon and juniper woodland; Gravelly (sometimes), Sandy (sometimes)/annual herb/Apr–June/985–3,935	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, the closest known location is 9.3 miles from the study area (CDFW 2022).
Cuscuta obtusiflora var. *glandulosa*	Peruvian dodder	None/None/2B.2	Marshes and swamps/annual vine (parasitic)/July–Oct/50–920	Not expected to occur. The site is outside of the species' known elevation range.
Dodecahema leptoceras	slender-horned spineflower	FE/SE/1B.1	Chaparral, Cismontane woodland, Coastal scrub; Sandy/annual herb/Apr–June/655–2,490	Low potential to occur. Sandy soils are present at the site and the closest known occurrence is 2.3 miles away (CDFW 2022). However, the project site has been landscaped and regularly maintained since 1959 (NETR 2022).

Scientific Name	Common Name	Status[1] (Federal/State/CRPR)	Primary Habitat Associations	Potential to Occur
Eriastrum densifolium ssp. *sanctorum*	Santa Ana River woollystar	FE/SE/1B.1	Chaparral, Coastal scrub; Gravelly (sometimes), Sandy (sometimes)/perennial herb/Apr–Sep/300–2,000	Not expected to occur. Project site lacks the suitable habitat for this species to occur.
Erythranthe exigua	San Bernardino Mountains monkeyflower	None/None/1B.2	Meadows and seeps, Pebble (Pavement) plain, Upper montane coniferous forest; Clay, Mesic/annual herb/May–July/5,905–7,595	Not expected to occur. The site is outside of the species' known elevation range.
Fimbristylis thermalis	hot springs fimbristylis	None/None/2B.2	Meadows and seeps/perennial rhizomatous herb/July–Sep/360–4,395	Not expected to occur. Project site lacks suitable freshwater wetland habitat preferred by this species (Calflora 2022).
Galium californicum ssp. *primum*	Alvin Meadow bedstraw	None/None/1B.2	Chaparral, Lower montane coniferous forest; Granitic, Sandy/perennial herb/May–July/4,425–5,575	Not expected to occur. The site is outside of the species' known elevation range.
Helianthus nuttallii ssp. *parishii*	Los Angeles sunflower	None/None/1A	Marshes and swamps/perennial rhizomatous herb/Aug–Oct/35–5,000	Not expected to occur. Project site lacks suitable freshwater or saltwater wetland habitat preferred by this species (Calflora 2022).
Heuchera parishii	Parish's alumroot	None/None/1B.3	Alpine boulder and rock field, Lower montane coniferous forest, Subalpine coniferous forest, Upper montane coniferous forest; Carbonate (sometimes), Rocky/perennial rhizomatous herb/June–Aug/4,920–12,465	Not expected to occur. The site is outside of the species' known elevation range.
Horkelia cuneata var. *puberula*	mesa horkelia	None/None/1B.1	Chaparral, Cismontane woodland, Coastal scrub; Gravelly (sometimes), Sandy (sometimes)/perennial herb/Feb–July(Sep)/230–2,655	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, all three known occurrences within 10 miles of the study area were prior to year 1910 (CDFW 2022).

Scientific Name	Common Name	Status[1] (Federal/State/CRPR)	Primary Habitat Associations	Potential to Occur
Imperata brevifolia	California satintail	None/None/2B.1	Chaparral, Coastal scrub, Meadows and seeps, Mojavean desert scrub, Riparian scrub; Mesic/perennial rhizomatous herb/Sep–May/0–3,985	Not expected to occur. Project site lacks suitable mesic conditions.
Ivesia argyrocoma var. *argyrocoma*	silver-haired ivesia	None/None/1B.2	Meadows and seeps, Pebble (Pavement) plain, Upper montane coniferous forest/perennial herb/June–Aug/4,795–9,710	Not expected to occur. The site is outside of the species' known elevation range.
Lasthenia glabrata ssp. *coulteri*	Coulter's goldfields	None/None/1B.1	Marshes and swamps, Playas, Vernal pools/annual herb/Feb–June/5–4,000	Not expected to occur. Project site lacks suitable freshwater or saltwater wetland habitat preferred by this species (Calflora 2022).
Lilium parryi	lemon lily	None/None/1B.2	Lower montane coniferous forest, Meadows and seeps, Riparian forest, Upper montane coniferous forest; Mesic/perennial bulbiferous herb/July–Aug/4,000–9,005	Not expected to occur. The site is outside of the species' known elevation range.
Lycium parishii	Parish's desert-thorn	None/None/2B.3	Coastal scrub, Sonoran desert scrub/perennial shrub/Mar–Apr/445–3,280	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, there are no known occurrences within 10 miles of the study area (CDFW 2022).
Malacothamnus parishii	Parish's bush-mallow	None/None/1A	Chaparral, Coastal scrub/perennial deciduous shrub/June–July/1,000–1,490	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, there are no known occurrences within 10 miles of the study area (CDFW 2022).
Monardella macrantha ssp. *hallii*	Hall's monardella	None/None/1B.3	Broadleafed upland forest, Chaparral, Cismontane woodland, Lower montane coniferous forest, Valley and foothill grassland/perennial rhizomatous herb/June–Oct/2,395–7,200	Not expected to occur. The site is outside of the species' known elevation range.

Scientific Name	Common Name	Status[1] (Federal/State/CRPR)	Primary Habitat Associations	Potential to Occur
Monardella pringlei	Pringle's monardella	None/None/1A	Coastal scrub/annual herb/May–June/985–1,310	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, there are no known occurrences within 10 miles of the study area (CDFW 2022).
Nama stenocarpa	mud nama	None/None/2B.2	Marshes and swamps/annual/perennial herb/Jan–July/15–1,640	Not expected to occur. Project site lacks suitable freshwater wetland habitat preferred by this species (Calflora 2022).
Nasturtium gambelii	Gambel's water cress	FE/ST/1B.1	Marshes and swamps/perennial rhizomatous herb/Apr–Oct/15–1,080	Not expected to occur. Project site lacks suitable wetland habitat preferred by this species (Calflora 2022).
Packera bernardina	San Bernardino ragwort	None/None/1B.2	Meadows and seeps, Pebble (Pavement) plain, Upper montane coniferous forest/perennial herb/May–July/5,905–7,545	Not expected to occur. The site is outside of the species' known elevation range.
Pelazoneuron puberulum var. *sonorensis*	Sonoran maiden fern	None/None/2B.2	Meadows and seeps/perennial rhizomatous herb/Jan–Sep/165–2,000	Not expected to occur. Project site lacks suitable wetland habitat preferred by this species (Calflora 2022).
Perideridia parishii ssp. *parishii*	Parish's yampah	None/None/2B.2	Lower montane coniferous forest, Meadows and seeps, Upper montane coniferous forest/perennial herb/June–Aug/4,805–9,840	Not expected to occur. The site is outside of the species' known elevation range.
Phacelia stellaris	Brand's star phacelia	None/None/1B.1	Coastal dunes, Coastal scrub/annual herb/Mar–June/5–1,310	Not expected to occur. Project site lacks suitable coastal dune habitat.
Pseudorontium cyathiferum	Deep Canyon snapdragon	None/None/2B.3	Sonoran desert scrub/annual herb/Feb–Apr/0–2,620	Not expected to occur. Project site has been landscaped and regularly maintained since 1959 (NETR 2022). In addition, there are no known occurrences within 10 miles of the study area (CDFW 2022).
Ribes divaricatum var. *parishii*	Parish's gooseberry	None/None/1A	Riparian woodland/perennial deciduous shrub/Feb–Apr/215–985	Not expected to occur. The site is outside of the species' known elevation range.

Scientific Name	Common Name	Status[1] (Federal/State/CRPR)	Primary Habitat Associations	Potential to Occur
Schoenus nigricans	black bog-rush	None/None/2B.2	Marshes and swamps/perennial herb/Aug–Sep/490–6,560	Not expected to occur. Project site lacks suitable wetland habitat preferred by this species (Calflora 2022).
Senecio aphanactis	chaparral ragwort	None/None/2B.2	Chaparral, Cismontane woodland, Coastal scrub; Alkaline (sometimes)/annual herb/Jan–Apr(May)/50–2,620	Not expected to occur. Project site lacks suitable micro-habitat (i.e. alkaline soils).
Sidalcea hickmanii ssp. *parishii*	Parish's checkerbloom	None/SR/1B.2	Chaparral, Cismontane woodland, Lower montane coniferous forest/perennial herb/(May)June–Aug/3,280–8,195	Not expected to occur. The site is outside of the species' known elevation range.
Sidalcea malviflora ssp. *dolosa*	Bear Valley checkerbloom	None/None/1B.2	Lower montane coniferous forest, Meadows and seeps, Riparian woodland, Upper montane coniferous forest/perennial herb/May–Aug/4,900–8,805	Not expected to occur. The site is outside of the species' known elevation range.
Sidalcea neomexicana	salt spring checkerbloom	None/None/2B.2	Chaparral, Coastal scrub, Lower montane coniferous forest, Mojavean desert scrub, Playas; Alkaline, Mesic/perennial herb/Mar–June/50–5,015	Not expected to occur. Project site lacks suitable micro-habitat (i.e. alkaline, mesic soils).
Sidalcea pedata	bird-foot checkerbloom	FE/SE/1B.1	Meadows and seeps, Pebble (Pavement) plain/perennial herb/May–Aug/5,245–8,200	Not expected to occur. The site is outside of the species' known elevation range.
Sphenopholis obtusata	prairie wedge grass	None/None/2B.2	Cismontane woodland, Meadows and seeps; Mesic/perennial herb/Apr–July/985–6,560	Not expected to occur. Project site lacks suitable mesic habitat.
Streptanthus campestris	southern jewelflower	None/None/1B.3	Chaparral, Lower montane coniferous forest, Pinyon and juniper woodland; Rocky/perennial herb/(Apr)May–July/2,950–7,545	Not expected to occur. The site is outside of the species' known elevation range.

Scientific Name	Common Name	Status[1] (Federal/State/CRPR)	Primary Habitat Associations	Potential to Occur
Symphyotrichum defoliatum	San Bernardino aster	None/None/1B.2	Cismontane woodland, Coastal scrub, Lower montane coniferous forest, Marshes and swamps, Meadows and seeps, Valley and foothill grassland; Streambanks/perennial rhizomatous herb/July–Nov/5–6,690	Not expected to occur. Project site lacks suitable wetland habitat preferred by this species (Calflora 2022).
Trichocoronis wrightii var. *wrightii*	Wright's trichocoronis	None/None/2B.1	Marshes and swamps, Meadows and seeps, Riparian forest, Vernal pools; Alkaline/annual herb/May–Sep/15–1,425	Not expected to occur. Project site lacks suitable wetland habitat preferred by this species (Calflora 2022).
Yucca brevifolia	western Joshua tree	None/SC/CBR	Great Basin grassland, Great Basin scrub, Joshua tree woodland, Mojavean desert scrub, Pinyon and juniper woodland, Sonoran desert scrub, Valley and foothill grassland/perennial leaf succulent/Apr–May/1,310–6,560	Not expected to occur. The site is outside of the species' known elevation range.

Attachment D

Assessment of Special-Status Wildlife Species Potentially Occurring in the Study Area

Scientific Name	Common Name	Status[1] (Federal/State)	Primary Habitat Associations	Potential to Occur
Amphibians				
Rana draytonii	California red-legged frog	FT/SSC	Lowland streams, wetlands, riparian woodlands, livestock ponds; dense, shrubby or emergent vegetation associated with deep, still or slow-moving water; uses adjacent uplands	Not expected to occur. Project site lacks suitable aquatic habitat.
Rana muscosa	mountain yellow-legged frog	FE/SE	Lakes, ponds, meadow streams, isolated pools, and open riverbanks; rocky canyons in narrow canyons and in chaparral	Not expected to occur. Project site lacks suitable aquatic habitat.
Spea hammondii	western spadefoot	None/SSC	Primarily grassland and vernal pools, but also in ephemeral wetlands that persist at least 3 weeks in chaparral, coastal scrub, valley–foothill woodlands, pastures, and other agriculture	Not expected to occur. Project site lacks suitable aquatic habitat.
Reptiles				
Anniella stebbinsi	southern California legless lizard	None/SSC	Coastal dunes, stabilized dunes, beaches, dry washes, valley–foothill, chaparral, and scrubs; pine, oak, and riparian woodlands; associated with sparse vegetation and moist sandy or loose, loamy soils	Not expected to occur. Project site lacks suitable habitat (dunes or moist, loose soils).
Arizona elegans occidentalis	California glossy snake	None/SSC	Arid scrub, rocky washes, grasslands, chaparral, open areas with loose soil	Low potential to occur. There are three known occurrences between 2013-2015 within 5 miles of project site (CDFW 2022A). The grassland within the project site is highly disturbed and regularly maintained. additionally, suitable loose soils are not present.

Scientific Name	Common Name	Status[1] (Federal/State)	Primary Habitat Associations	Potential to Occur
Aspidoscelis tigris stejnegeri	San Diegan tiger whiptail	None/SSC	Hot and dry areas with sparse foliage, including chaparral, woodland, and riparian areas.	Low potential to occur. There are three known occurrences within 5 miles of the project site (CDFW 2022A). However, the project site is developed/disturbed and lacks suitable habitat.
Charina umbratica	southern rubber boa	None/ST	Montane oak–conifer and mixed-conifer forests, montane chaparral, wet meadows; usually in vicinity of streams or wet meadows	Not expected to occur. Project site lacks suitable habitat.
Coleonyx variegatus abbotti	San Diego banded gecko	None/SSC	Rocky areas within coastal scrub and chaparral	Not expected to occur. Project site lacks suitable habitat. No known occurrences within 5 miles (CDFW 2022A).
Crotalus ruber	red diamondback rattlesnake	None/SSC	Coastal scrub, chaparral, oak and pine woodlands, rocky grasslands, cultivated areas, and desert flats	Low potential to occur. Two known occurrences within 5 miles of project site in 2015 and 2017 (CDFW 2022A). Site and surrounding areas are disturbed/developed which reduces likelihood of occurence. However, grassy cover and small mammal burrows are present and may provide suitable foraging habitat.
Emys marmorata	western pond turtle	None/SSC	Slow-moving permanent or intermittent streams, ponds, small lakes, and reservoirs with emergent basking sites; adjacent uplands used for nesting and during winter	Not expected to occur. Aquatic resources are not present within the project site.
Phrynosoma blainvillii	Blainville's horned lizard	None/SSC	Open areas of sandy soil in valleys, foothills, and semi-arid mountains including coastal scrub, chaparral, valley–foothill hardwood, conifer, riparian, pine–cypress, juniper, and annual grassland habitats	Not expected to occur. Suitable habitat is not present within the project site. Three known occurrences within 5 miles were between 1926-1991 (CDFW 2022A).
Salvadora hexalepis virgultea	coast patch-nosed snake	None/SSC	Brushy or shrubby vegetation; requires small mammal burrows for refuge and overwintering sites	Not expected to occur. While small mammal burrows are present within the project site, , there are no known occurrences within 5 miles (CDFW 2022A).

Scientific Name	Common Name	Status[1] (Federal/State)	Primary Habitat Associations	Potential to Occur
Thamnophis hammondii	two-striped gartersnake	None/SSC	Streams, creeks, pools, streams with rocky beds, ponds, lakes, vernal pools	Not expected to occur. Aquatic resources are not present within the project site.
Birds				
Agelaius tricolor (nesting colony)	tricolored blackbird	BCC/SSC, ST	Nests near freshwater, emergent wetland with cattails or tules, but also in Himalayan blackberrry; forages in grasslands, woodland, and agriculture	Not expected to occur. Suitable nesting habitat is not present within the project site.
Aquila chrysaetos (nesting & wintering)	golden eagle	None/FP, WL	Nests and winters in hilly, open/semi-open areas, including shrublands, grasslands, pastures, riparian areas, mountainous canyon land, open desert rimrock terrain; nests in large trees and on cliffs in open areas and forages in open habitats	Not expected to occur. No suitable nesting habitat present within the project site and the area is too developed to support foraging and overwintering. In addition, there are no known occurrences within 5 miles of the project site (CDFW 2022A).
Athene cunicularia (burrow sites & some wintering sites)	burrowing owl	BCC/SSC	Nests and forages in grassland, open scrub, and agriculture, particularly with ground squirrel burrows	Moderate potential to occur. The grassland onsite is highly disturbed, however, small mammal burrows were observed during the 2022 biological reconnaissance visit. In addition, there is one known recent occurrence in 2006 less than a mile from the project site (CDFW 2022A).
Buteo swainsoni (nesting)	Swainson's hawk	None/ST	Nests in open woodland and savanna, riparian, and in isolated large trees; forages in nearby grasslands and agricultural areas such as wheat and alfalfa fields and pasture	Not expected to occur. While isolated trees are present within the project site, the only known occurrence within 10 miles occurred prior to 1920 (CDFW 2022A).
Coccyzus americanus occidentalis (nesting)	western yellow-billed cuckoo	FT/SE	Nests in dense, wide riparian woodlands and forest with well-developed understories	Not expected to occur. No suitable nesting habitat present within the project site.

Scientific Name	Common Name	Status[1] (Federal/State)	Primary Habitat Associations	Potential to Occur
Elanus leucurus (nesting)	white-tailed kite	None/FP	Nests in woodland, riparian, and individual trees near open lands; forages opportunistically in grassland, meadows, scrubs, agriculture, emergent wetland, savanna, and disturbed lands	Not expected to occur. While individual trees and disturbed land may provide suitable nesting/foraging habitat, there are no known occurrences within 10 miles of project site (CDFW 2022A).
Empidonax traillii extimus (nesting)	southwestern willow flycatcher	FE/SE	Nests in dense riparian habitats along streams, reservoirs, or wetlands; uses variety of riparian and shrubland habitats during migration	Not expected to occur. No suitable riparian nesting habitat present within the project site.
Haliaeetus leucocephalus (nesting & wintering)	bald eagle	FPD/FP, SE	Nests in forested areas adjacent to large bodies of water, including seacoasts, rivers, swamps, large lakes; winters near large bodies of water in lowlands and mountains	Not expected to occur. No suitable nesting or overwintering habitat present within the project site.
Icteria virens (nesting)	yellow-breasted chat	None/SSC	Nests and forages in dense, relatively wide riparian woodlands and thickets of willows, vine tangles, and dense brush	Not expected to occur. No suitable nesting habitat present within the project site.
Lanius ludovicianus (nesting)	loggerhead shrike	None/SSC	Nests and forages in open habitats with scattered shrubs, trees, or other perches	Not expected to occur. While scattered trees and open habitat is present at/near project site, there are no known occurrences within 10 miles (CDFW 2022A).
Laterallus jamaicensis coturniculus	California black rail	None/FP, ST	Tidal marshes, shallow freshwater margins, wet meadows, and flooded grassy vegetation; suitable habitats are often supplied by canal leakage in Sierra Nevada foothill populations	Not expected to occur. Suitable aquatic habitat is not present within the project site.

Scientific Name	Common Name	Status[1] (Federal/State)	Primary Habitat Associations	Potential to Occur
Polioptila californica californica	coastal California gnatcatcher	FT/SSC	Nests and forages in various sage scrub communities, often dominated by California sagebrush and buckwheat; generally avoids nesting in areas with a slope of greater than 40%; majority of nesting at less than 1,000 feet above mean sea level	Not expected to occur. Suitable habitat is not present within the project site. In addition, the project site is above the typical nesting elevation.
Setophaga petechia (nesting)	yellow warbler	None/SSC	Nests and forages in riparian and oak woodlands, montane chaparral, open ponderosa pine, and mixed-conifer habitats	Not expected to occur. Suitable nesting habitat is not present within the project site.
Spinus lawrencei (nesting)	Lawrence's goldfinch	BCC/None	Nests and forages in open oak, arid woodlands, and chaparral near water	Not expected to occur. Suitable nesting habitat and nearby water source are not present within the project site.
Vireo bellii pusillus (nesting)	least Bell's vireo	FE/SE	Nests and forages in low, dense riparian thickets along water or along dry parts of intermittent streams; forages in riparian and adjacent shrubland late in nesting season	Not expected to occur. No suitable riparian nesting habitat present within the project site.
Fishes				
Catostomus santaanae	Santa Ana sucker	FT/None	Small, shallow, cool, clear streams less than 7 meters (23 feet) in width and a few centimeters to more than a meter (1.5 inches to more than 3 feet) in depth; substrates are generally coarse gravel, rubble, and boulder	Not expected to occur. Project site lacks suitable aquatic habitat.

Scientific Name	Common Name	Status[1] (Federal/State)	Primary Habitat Associations	Potential to Occur
Gila orcuttii	arroyo chub	None/SSC	Warm, fluctuating streams with slow-moving or backwater sections of warm to cool streams at depths >40 centimeters (16 inches); substrates of sand or mud	Not expected to occur. Project site lacks suitable aquatic habitat.
Oncorhynchus mykiss irideus pop. 10	southern steelhead - southern California DPS	FE/None	Clean, clear, cool, well-oxygenated streams; needs relatively deep pools in migration and gravelly substrate to spawn	Not expected to occur. Project site lacks suitable aquatic habitat.
Rhinichthys osculus ssp. 8	Santa Ana speckled dace	None/SSC	Headwaters of the Santa Ana and San Gabriel Rivers; may be extirpated from the Los Angeles River system	Not expected to occur. Project site lacks suitable aquatic habitat.
Mammals				
Antrozous pallidus	pallid bat	None/SSC	Grasslands, shrublands, woodlands, forests; most common in open, dry habitats with rocky outcrops for roosting, but also roosts in man-made structures and trees	Not expected to occur. While man-made structures and trees within the project site may provide suitable roosting habitat, this species is intolerant of nearby urban development (Miner and Stokes 2005) and is not likely to roost. There is one known occurrence within 5 miles in 1928 (CDFW 2022A).
Chaetodipus fallax fallax	northwestern San Diego pocket mouse	None/SSC	Coastal scrub, mixed chaparral, sagebrush, desert wash, desert scrub, desert succulent shrub, pinyon–juniper, and annual grassland	Not expected to occur. The disturbed grassland habitat onsite and the surrounding areas are regularly disced. within the project
Dasypterus xanthinus	western yellow bat	None/SSC	Valley–foothill riparian, desert riparian, desert wash, and palm oasis habitats; below 2,000 feet above mean sea level; roosts in riparian and palms	Not expected to occur. Suitable riparian/palm roosting habitat is not present within the project site.

Scientific Name	Common Name	Status[1] (Federal/State)	Primary Habitat Associations	Potential to Occur
Dipodomys merriami parvus	San Bernardino kangaroo rat	FE/SSC, SCE	Sparse scrub habitat, alluvial scrub/coastal scrub habitats on gravelly and sandy soils near river and stream terraces	Not expected to occur. The Project site lacks suitable alluvial/coastal scrub habitat for this species to occur. within the project
Dipodomys stephensi	Stephens' kangaroo rat	FE/ST	Annual and perennial grassland habitats, coastal scrub or sagebrush with sparse canopy cover, or in disturbed areas	Not expected to occur. While disturbed, grassland habitat is present at the project site there are no known occurrences within 5.0 miles (CDFW 2022A).
Eumops perotis californicus	western mastiff bat	None/SSC	Chaparral, coastal and desert scrub, coniferous and deciduous forest and woodland; roosts in crevices in rocky canyons and cliffs where the canyon or cliff is vertical or nearly vertical, trees, and tunnels	Not expected to occur. While trees at project site may provide roosting habitat, the surrounding area is developed. This species prefers to roost in extensive, open areas which are not present at or near the project site (CDFW 2022Ab). In addition, the three known occurrences within 5 miles occurred prior to 1993 (CDFW 2022A).
Glaucomys oregonensis californicus	San Bernardino flying squirrel	None/SSC	Coniferous and deciduous forests, including riparian forests	Not expected to occur. Suitable forest habitat is not present within the project site.
Leptonycteris yerbabuenae	lesser long-nosed bat	FPD/SSC	Sonoran desert scrub, semi-desert grasslands, lower oak woodlands	Not expected to occur. Suitable habitat is not present within the project site. In addition, there are no known occurrences within 5 miles (CDFW 2022A).
Neotoma lepida intermedia	San Diego desert woodrat	None/SSC	Coastal scrub, desert scrub, chaparral, cacti, rocky areas	Not expected to occur. Suitable habitat is not present within the project site. Two known occurrences within 5 miles. Both occurrences were associated with scrub habitat (CDFW 2022A).
Nyctinomops femorosaccus	pocketed free-tailed bat	None/SSC	Pinyon–juniper woodlands, desert scrub, desert succulent shrub, desert riparian, desert wash, alkali desert scrub, Joshua tree, and palm oases; roosts in high cliffs or rock outcrops with drop-offs, caverns, and buildings	Not expected to occur. Project site and surrounding areas lack suitable foraging and roosting habitat. One known occurrence within 5 miles occurred in 1985 (CDFW 2022A).

Scientific Name	Common Name	Status[1] (Federal/State)	Primary Habitat Associations	Potential to Occur
Onychomys torridus ramona	southern grasshopper mouse	None/SSC	Grassland and sparse coastal scrub	Not expected to occur. While grassland habitat is present within the project site, there are no known occurrences within 5 miles (CDFW 2022A).
Perognathus alticola alticolus	white-eared pocket mouse	None/SSC	Arid ponderosa pine communities	Not expected to occur. Suitable habitat is not present within the project site.
Perognathus longimembris brevinasus	Los Angeles pocket mouse	None/SSC	Lower-elevation grassland, alluvial sage scrub, and coastal scrub	Not expected to occur. There is no suitable habitat present. The highly disturbed grassland onsite is regularly disced.
Taxidea taxus	American badger	None/SSC	Dry, open, treeless areas; grasslands, coastal scrub, agriculture, and pastures, especially with friable soils	Not expected to occur. While grassland habitat is present at the project site, frequent disturbance and nearby development likely prevents presence. One known occurrence within 5 miles of project site, though date of occurrence is unknown (CDFW 2022A).
Invertebrates				
Danaus plexippus	monarch	FC/None	Wind-protected tree groves with nectar sources and nearby water sources	Not expected to occur. Suitable wind-protective tree groves and nearby water sources are not present within the project site.
Euphydryas editha quino	quino checkerspot butterfly	FE/SCE	Annual forblands, grassland, open coastal scrub and chaparral; often soils with cryptogamic crusts and fine-textured clay; host plants include Plantago erecta, Antirrhinum coulterianum, and Plantago patagonica (Silverado Occurrence Complex)	Not expected to occur. Suitable habitat is not present within the project site. One known occurrence within 5 miles occurred in 1914 (CDFW 2022A).
Rhaphiomidas terminatus abdominalis	Delhi Sands flower-loving fly	FE/None	Delhi fine sandy soils and dunes, scrub and ruderal vegetation in the sand verbena series with <50% cover	Not expected to occur. Delhi fine sands are not present. And CNDDB shows project site is northeast of known occurrences.
Streptocephalus woottoni	Riverside fairy shrimp	FE/None	Vernal pools, non-vegetated ephemeral pools	Not expected to occur. Project site lacks suitable aquatic habitat.

Subject: Draft Archaeological Resources Assessment for the 5th Street and Victoria Avenue Warehouse Project, City of Highland, San Bernardino County, California

Dear Mr. Kevin Rice:

This letter documents the archaeological resources assessment conducted by Dudek for the 5th Street and Victoria Avenue Warehouse Project (Project), located within the City of Highland, San Bernardino County, California. The present study documents the results of a California Historical Resources Information System (CHRIS) records search conducted at the South Central Coastal Information Center (SCCIC), Native American coordination with the Native American Heritage Commission (NAHC) for a Sacred Lands File (SLF) review, an archaeological pedestrian survey, an analysis of the potential for the proposed Project site to contain archaeological resources, as well as management recommendations. The City of Highland (City) is the lead agency responsible for compliance with California Environmental Quality Act (CEQA).

Project Location

The proposed Project site is located within the southwestern area of the City of Highland, in western San Bernardino County, California. The proposed Project site falls on public land survey system (PLSS) Section 5 of Township 1 South, Range 3 West on the *Redlands*, California 7.5-minute USGS Quadrangle (Appendix A: Figure 1). The approximately 7.23-acre rectangular-shaped proposed Project site, located at the southeastern corner of 5th Street and Victoria Avenue, is composed of ten (10) parcels (Assessor's Parcel Numbers [APNs], 1192-551-14, 1192-551-15, 1192-551-02, 1192-551-03, 1192-551-04, 1192-551-05, 1192-551-06, 1192-551-07, 1192-551-12 and 1192-551-13) within the City of Highland. Additionally, one (1) parcel (APN 1192-551-01) located within the City of San Bernardino annexed to the City of Highland, for a total of eleven (11) parcels. The site is bounded by 5th Street to the north, Victoria Avenue to the west, 3rd Street to the south, and vacant land and City Creek to the east (Appendix A: Figure 2).

Project Description

The proposed Project includes the demolition of three (3) existing residential structures and construction of an approximately 176,066-square-foot (gross area, inclusive of mezzanine/office spaces), one-story warehouse building on an approximately 7.23-acre site (gross area). The warehouse building would be composed of

approximately 164,066 square feet of warehouse space and 12,000 square feet of mezzanine/office space. In addition to the industrial/warehouse building, the proposed Project includes improvements along the proposed Project's street frontage, including landscaping, fencing, and street and sidewalk improvements. A variety of trees, shrubs, and groundcovers would be planted within the proposed Project's frontage landscape setback area, and within the landscape areas found around the warehouse building. Access to the proposed Project site would be provided by four driveways: two (2) driveways on the western portion of the site on Victoria Avenue; one (1) driveway on the northern portion of the site on 5th street Avenue; and one driveway on the southern portion of the site on 3rd Street. The proposed Project would include a total of 98 passenger parking stalls.

The proposed Project site is currently served by domestic water, sanitary sewer, electrical, natural gas, and telecommunication service. The proposed Project would connect to the existing facilities located on and in the immediate vicinity of the proposed Project site as follows:

- A new 2-inch water line would be installed on the western side of the proposed Project site to connect to the existing 6-inch water line within the public right-of-way (ROW) along Victoria Avenue to provide domestic and irrigation water service to the proposed Project site.
- Fire suppression water service would be provided via connections to existing lines in both Victoria Avenue and 3rd Street.
- One new 6-inch sewer line would connect to the existing 21-inch sewer line within 5th Street.
- Connection to a 3-inch gas line within Victoria Avenue.
- Connection to existing electrical lines within Victoria Avenue. Telecommunication services would connect to existing facilities.

The proposed Project site is not currently served by storm drainage infrastructure and as such, the Project is proposed to involve the construction of a new engineered storm drain system to collect and treat on-site stormwater runoff. On-site stormwater will be collected via a series of roof drains, curbs, and gutters, and catch basins before being conveyed to an on-site underground infiltration basin located in the western portion of the proposed Project site. The infiltration/detention basin would be designed to allow for stormwater flows to infiltrate into the soils. The infiltration basin would be sized to capture and infiltrate flows for a 100-year design storm, consistent with the San Bernardino County Hydraulics Manual. The overflow from the infiltration system would be directed through a proposed 24-inch outlet connecting to the back of the existing catch basin on Victoria Avenue, which discharges to the 3rd Street storm drain system.

The proposed Project would also involve the removal of the existing drainage ditch along Victoria Avenue and its replacement with an 18-inch and 42-inch storm drain that will connect to the existing 48-inch corrugated metal pipe within 6th Street. The new storm drain would still be connected to the existing City storm drain line and a parkway catch basin would be installed along Victoria Avenue so that runoff within Victoria Avenue would still be captured. Two 4-foot by 4-foot bypass curb inlets would be installed to filter off-site debris and trash from runoff on Victoria Avenue.

DRAFT

Current Project design indicates that the minimum depth of ground disturbance for the proposed Project site is between 3 to 4 feet below the existing ground surface and a maximum depth of 16 feet below the existing ground surface for the installation of the infiltration basin within the western portion of the proposed Project site.

Environmental Setting

The approximately 7.23-acre rectangular-shaped proposed Project site is located on the southeastern corner of 5th Street and Victoria Avenue. Of the eleven (11) parcels that comprise the Project site, six (6) parcels are developed with residential uses (APNs 1192-551-02, 1192-551-03, 1192-551-04, 1192-551-05, 1192-551-06, and 1192-551-07) and the remaining five (5) parcels are undeveloped (APN 1192-551-01, 1192-551-14, 1192-551-15, 1192-551-12, and 1192-551-13). The undeveloped parcels appear to have been regularly subjected to weed abatement as evidenced by tilling activities; vegetation present during the survey was largely comprised of ruderal (i.e., weedy) species and grasses.

The proposed Project site is within the Upper Santa Ana River Watershed and is nearly 3 miles southwest of the San Bernardino Mountains, over 1-mile north of the Santa Ana River, and immediately west of the southern terminus of the City Creek Channel, which is a direct tributary to the Santa Ana River. The proposed Project site is relatively flat and generally slopes down from the northwest corner to the southwest corner and the average site elevation is approximately 803 feet above mean sea level (amsl). According to the Natural Resources Conservation Service (NRCS) Web Soil Survey (USDA 2022), soils within the proposed Project site predominantly consists of Tujunga Series, which accounts for approximately 85 percent of the proposed Project site. The remaining approximately 15 percent of the proposed Project site, including portions of APNs 1192-551-04, 1192-551-05, 1192-551-06, and 1192-551-07, consists Psamments, Fluvents and frequently flooded soils. These soil series are described in the NRCS Web Soil Survey as follows:

- **Tujunga Series**: Characterized as very deep, somewhat excessively drained soils that formed in alluvium from granitic sources. This soils series is found on alluvial fans and floodplains, including urban areas and consists of slopes ranging from 0 to 12 percent.
- **Psamments, Fluvents and frequently flooded soils Series**: No characterization information is provided on this soil series through the NRCS Web Soil Survey.

Regulatory Context

Work for this Project was conducted in compliance with the California Environmental Quality Act (CEQA). The regulatory framework as it pertains to cultural resources under CEQA is detailed below.

Under the provisions of CEQA, including the CEQA Statutes (PRC Sections 21083.2 and 21084.1), the CEQA Guidelines (14 CCR 15064.5), and California Public Resources Code (PRC) Section 5024.1 (14 CCR 4850 et seq.), properties expected to be directly or indirectly affected by a proposed project must be evaluated for California Register of Historical Resources (CRHR) eligibility (PRC Section 5024.1).

DRAFT

The purpose of the CRHR is to maintain listings of the state's historical resources and to indicate which properties are to be protected, to the extent prudent and feasible, from material impairment and substantial adverse change. The term historical resources includes a resource listed in or determined to be eligible for listing in the CRHR; a resource included in a local register of historical resources; and any object, building, structure, site, area, place, record, or manuscript that a lead agency determines to be historically significant (14 CCR 15064.5[a]). The criteria for listing properties in the CRHR were developed in accordance with previously established criteria developed for listing in the National Register of Historic Places. The California Office of Historic Preservation regards "any physical evidence of human activities over 45 years old" as meriting recordation and evaluation (OHP 1995:2).

State

The California Register of Historical Resources

A cultural resource is considered "historically significant" under CEQA if the resource meets one or more of the criteria for listing on the CRHR. The CRHR was designed to be used by state and local agencies, private groups, and citizens to identify existing cultural resources within the state and to indicate which of those resources should be protected, to the extent prudent and feasible, from substantial adverse change. The following criteria have been established for the CRHR. A resource is considered significant if it:

1. is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
2. is associated with the lives of persons important in our past;
3. embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
4. has yielded, or may be likely to yield, information important in prehistory or history.

In addition to meeting one or more of the above criteria, historical resources eligible for listing in the CRHR must retain enough of their historic character or appearance to be able to convey the reasons for their significance. Such integrity is evaluated in regard to the retention of location, design, setting, materials, workmanship, feeling, and association.

Under CEQA, if an archeological site is not a historical resource but meets the definition of a "unique archeological resource" as defined in PRC Section 21083.2, then it should be treated in accordance with the provisions of that section. A unique archaeological resource is defined as follows:

- An archaeological artifact, object, or site about which it can be clearly demonstrated that, without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:
    - Contains information needed to answer important scientific research questions and that there is a demonstrable public interest in that information
    - Has a special and particular quality, such as being the oldest of its type or the best available example of its type
    - Is directly associated with a scientifically recognized important prehistoric or historic event or person

Resources that neither meet any of these criteria for listing in the CRHR nor qualify as a "unique archaeological resource" under CEQA (PRC Section 21083.2) are viewed as not significant. Under CEQA, "A non-unique

archaeological resource need be given no further consideration, other than the simple recording of its existence by the lead agency if it so elects" (PRC Section 21083.2[h]).

Impacts that adversely alter the significance of a resource listed in or eligible for listing in the CRHR are considered a significant effect on the environment. Impacts to historical resources from a proposed project are thus considered significant if the project (1) physically destroys or damages all or part of a resource; (2) changes the character of the use of the resource or physical feature within the setting of the resource, which contributes to its significance; or (3) introduces visual, atmospheric, or audible elements that diminish the integrity of significant features of the resource.

California Environmental Quality Act

As described further, the following CEQA statutes (PRC Section 21000 et seq.) and CEQA Guidelines (14 CCR 15000 et seq.) are of relevance to the analysis of archaeological, historic, and tribal cultural resources:

- PRC Section 21083.2(g) defines "unique archaeological resource."
- PRC Section 21084.1 and CEQA Guidelines Section 15064.5(a) defines "historical resources." In addition, CEQA Guidelines Section 15064.5(b) defines the phrase "substantial adverse change in the significance of an historical resource"; it also defines the circumstances when a project would materially impair the significance of a historical resource.
- PRC Section 21074(a) defines "tribal cultural resources."
- PRC Section 5097.98 and CEQA Guidelines Section 15064.5(e) set forth standards and steps to be employed following the accidental discovery of human remains in any location other than a dedicated ceremony.
- PRC Sections 21083.2(b) and 21083.2(c) and CEQA Guidelines Section 15126.4 provide information regarding the mitigation framework for archaeological and historic resources, including examples of preservation-in-place mitigation measures. Preservation in place is the preferred manner of mitigating impacts to significant archaeological sites because it maintains the relationship between artifacts and the archaeological context and may also help avoid conflict with religious or cultural values of groups associated with the archaeological site(s).

More specifically, under CEQA, a project may have a significant effect on the environment if it may cause "a substantial adverse change in the significance of an historical resource" (PRC Section 21084.1; CEQA Guidelines Section 15064.5(b)). If a site is listed or eligible for listing in the CRHR, or included in a local register of historic resources, or identified as significant in a historical resources survey (meeting the requirements of PRC Section 5024.1(q)), it is an "historical resource" and is presumed to be historically or culturally significant for purposes of CEQA (PRC Section 21084.1; CEQA Guidelines Section 15064.5(a)). The lead agency is not precluded from determining that a resource is a historical resource even if it does not fall within this presumption (PRC Section 21084.1; CEQA Guidelines Section 15064.5(a)).

A "substantial adverse change in the significance of an historical resource" reflecting a significant effect under CEQA means "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired" (CEQA Guidelines Section 15064.5(b)(1); PRC Section 5020.1(q)). In turn, the significance of a historical resource is materially impaired when a project does any of the following:

(1) Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register; or

(2) Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to Section 5020.1(k) of the PRC or its identification in an historical resources survey meeting the requirements of Section 5024.1(g) of the PRC, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or

(3) Demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register as determined by a lead agency for purposes of CEQA (CEQA Guidelines Section 15064.5(b)(2)).

Pursuant to these sections, the CEQA inquiry begins with evaluating whether a project site contains any "historical resources," then evaluates whether that project will cause a substantial adverse change in the significance of a historical resource such that the resource's historical significance is materially impaired.

If it can be demonstrated that a project will cause damage to a unique archaeological resource, the lead agency may require reasonable efforts be made to permit any or all of these resources to be preserved in place or left in an undisturbed state. To the extent that they cannot be left undisturbed, mitigation measures are required (PRC Sections 21083.2(a)–(c)).

Section 21083.2(g) defines a unique archaeological resource as an archaeological artifact, object, or site about which it can be clearly demonstrated that without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

(1) Contains information needed to answer important scientific research questions and that there is a demonstrable public interest in that information.

(2) Has a special and particular quality such as being the oldest of its type or the best available example of its type.

(3) Is directly associated with a scientifically recognized important prehistoric or historic event or person (PRC Section 21083.2(g)).

Impacts on nonunique archaeological resources are generally not considered a significant environmental impact (PRC Section 21083.2(a); CEQA Guidelines Section 15064.5(c)(4)). However, if a nonunique archaeological resource qualifies as a TCR (PRC Sections 21074(c) and 21083.2(h)), further consideration of significant impacts is required.

CEQA Guidelines Section 15064.5 assigns special importance to human remains and specifies procedures to be used when Native American remains are discovered. As described below, these procedures are detailed in PRC Section 5097.98.

California State Assembly Bill 52

Assembly Bill (AB) 52 of 2014 amended PRC Section 5097.94 and added PRC Sections 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2, and 21084.3. AB 52 established that tribal cultural resources (TCRs)

must be considered under CEQA and also provided for additional Native American consultation requirements for the lead agency. Section 21074 describes a TCR as a site, feature, place, cultural landscape, sacred place, or object that is considered of cultural value to a California Native American Tribe and that is either:

- On or determined to be eligible for the California Register of Historical Resources or a local historic register; or
- A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Section 5024.1.

AB 52 formalizes the lead agency–tribal consultation process, requiring the lead agency to initiate consultation with California Native American groups that are traditionally and culturally affiliated with the project site, including tribes that may not be federally recognized. Lead agencies are required to begin consultation prior to the release of a negative declaration, mitigated negative declaration, or environmental impact report.

Section 1 (a)(9) of AB 52 establishes that "a substantial adverse change to a tribal cultural resource has a significant effect on the environment." Effects on TCRs should be considered under CEQA. Section 6 of AB 52 adds Section 21080.3.2 to the PRC, which states that parties may propose mitigation measures "capable of avoiding or substantially lessening potential significant impacts to a tribal cultural resource or alternatives that would avoid significant impacts to a tribal cultural resource." Further, if a California Native American tribe requests consultation regarding project alternatives, mitigation measures, or significant effects to tribal cultural resources, the consultation shall include those topics (PRC Section 21080.3.2[a]). The environmental document and the mitigation monitoring and reporting program (where applicable) shall include any mitigation measures that are adopted (PRC Section 21082.3[a]).

California Health and Safety Code Section 7050.5

California law protects Native American burials, skeletal remains, and associated grave goods, regardless of their antiquity, and provides for the sensitive treatment and disposition of those remains. California Health and Safety Code Section 7050.5 requires that if human remains are discovered in any place other than a dedicated cemetery, no further disturbance or excavation of the site or nearby area reasonably suspected to contain human remains shall occur until the county coroner has examined the remains (Section 7050.5(b)). PRC Section 5097.98 also outlines the process to be followed in the event that remains are discovered. If the coroner determines or has reason to believe the remains are those of a Native American, the coroner must contact NAHC within 24 hours (Section 7050.5(c)). NAHC will notify the "most likely descendant." With the permission of the landowner, the most likely descendant may inspect the site of discovery. The inspection must be completed within 48 hours of notification of the most likely descendant by NAHC. The most likely descendant may recommend means of treating or disposing of, with appropriate dignity, the human remains, and items associated with Native Americans.

Local

Historic and Cultural Preservation Ordinance (Chapter 16.32)

The City of Highland Cultural Resource Designation Criteria are listed under the Historic and Cultural Preservation Ordinance, adopted in 2021. This ordinance also defines the establishment and duties of a historic and cultural preservation board consisting of five uncompensated voting members appointed by the city council. The city council and city of Highland has found and determined:

DRAFT

A. That the character and history of the city are reflected in its cultural, historical, and architectural heritage;

B. That these historical and cultural foundations should be preserved as living parts of community life and development to build an understanding of the city's past, so that future generations may have a genuine opportunity to appreciate, enjoy, and understand the rich heritage of the city;

C. That, in the face of ever increasing pressures of modernization and urbanization, city landmarks, neighborhoods, and other areas of historical and cultural interest are threatened with demolition;

D. That pursuant to the provisions of the National Historic Preservation Act of 1966, as amended, the city of Highland joins with private concerns, the state of California, and the United States Congress to develop preservation programs and activities to give maximum encouragement to agencies and individuals undertaking preservation of the city's unique architectural, historical, aesthetic, and cultural heritage.

E. The purpose of this chapter is to promote the public health, safety, and general welfare and:

1. To safeguard the city's unique cultural heritage as embodied and reflected in the city's architectural history and patterns of cultural development;

2. To encourage and facilitate public knowledge, understanding, and appreciation of the city's historic past and unique sense of place;

3. To preserve diverse architectural styles, patterns of development, and design preferences reflecting phases of the city's history and to encourage complementary contemporary design and construction and inspire a more livable urban environment;

4. To enhance property values and to increase economic and financial benefits to the city and its inhabitants through the exploration of creative financial incentives for preservation;

5. To protect and enhance the city's attraction to tourists and visitors thereby stimulating business and industry;

6. To identify as early as possible and resolve conflicts between the preservation of cultural resources and alternative land uses;

7. To integrate the preservation of cultural resources into public and private land use management and development processes;

8. To stabilize neighborhoods through the preservation of cultural resources and establishment of historic districts and conservation zones;

9. To encourage public participation in identifying and preserving historical and architectural resources thereby increasing community pride in the city's cultural heritage;

DRAFT

10. To acknowledge the historic preservation plan "Old Town" as a tool for preservation of the unique character of the city's Highland Historic District. (Ord. 270 § 6, 2001; Ord. 171 § 8.10, 1994)

16.32.050 Cultural resource designation criteria.

For the purposes of this chapter, an improvement, natural feature, or site may be nominated as a cultural resource by the historic and cultural preservation board pursuant to HMC 16.32.060 if it meets the criteria for listing on the National Register of Historic Places or the following:

A. It exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history;

B. It is identified with persons or events significant in local, state, or national history;

C. It embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship;

D. It is representative of the work of a notable builder, designer, or architect;

E. It contributes to the significance of an historic area, being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development;

F. It has a unique location or singular physical characteristics or is a view or vista representing an established and familiar visual feature of a neighborhood, community, or the city of Highland;

G. It embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation;

H. It is similar to other distinctive properties, sites, areas, or objects based on a historic, cultural, or architectural motif.

I. It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning.

J. It is one of the few remaining examples in the city, region, state, or nation possessing distinguishing characteristics of an architectural or historical type of specimen. (Ord. 171 § 8.50, 1994)

Background Research

SCCIC Records Search

Due to COVID-19 restrictions, the SCCIC notified researchers that the response time for records searches of the CHRIS database was significantly delayed and that they were only able to provide data for San Bernardino County that had already been digitized. Therefore, as part of the cultural resources study prepared for the Project, Dudek

DRAFT

referenced a CHRIS records search that had been completed on May 10, 2021 for another project located in close proximity (approximately 765 feet) to the present proposed Project site. This records search included any previously recorded cultural resources and investigations within the records search area and includes digitized collections of mapped prehistoric and historic archaeological resources on file with CHRIS; Department of Parks and Recreation site records; technical reports; archival resources; and ethnographic references. Additional consulted sources included historical maps of the proposed Project site, the National Register of Historic Places (NRHP), the California Register of Historical Resources (CRHR), the California Historic Property Data File, and the lists of California State Historical Landmarks, California Points of Historical Interest, and the Archaeological Determinations of Eligibility. Dudek reviewed the SCCIC records to determine whether the implementation of the proposed Project would have the potential to impact any known and unknown cultural resources. The records search results are also provided in Confidential Appendix B.

Previously Conducted Cultural Resource Studies

As a result of the SCCIC's COVID-19 records search protocols, only reports within 0.25-mile radius were mapped within the SCCIC-provided records. Therefore, mapped results of the cultural resources records search indicate that seven (7) previous cultural resource studies have been conducted within the records search area of the proposed Project site between 1984 and 2011. Of these studies, four studies addressed portion of the proposed Project site and two studies addressed adjacent properties. Table 1 details all previous cultural resources studies followed by a brief summary of the digitally available report that overlaps the proposed Project site.

Table 1. Previous Technical Studies Within the Records Search Area of the Proposed Project Site

SCCIC Report No. (SB-)	Authors	Date	Title	Addressed Proposed Project Site
01456	Schwartz, Steven J.	1984	Cultural Resources Survey: Norton Air Force Base Excess Lands	**Yes
02260	Carmichael, David	1991	Documentary Research and Field Reconnaissance Relating to Cultural Resources at Norton Air Force Base, California	**No, but adjacent
02836	Alexandrowicz, J. Stephen, Susan R. Alexandrowicz, and Kathryn C. Beattie	1993	R.H. Stidham's Cobblestone House: Historic Preservation in the City of Highland, County of San Bernardino, CA	No
06436	Tang, Bai "Tom"	2009	Historical/Archaeological Resources Reconnaissance: Fifth and Third Street Road Improvement, Cities of Highland and San Bernardino, San Bernardino County, California.	**Yes
07309	Tang, Bai "Tom' and Michael Hogan	2011	Historic Property Survey Report: Tiger 5th Street Improvement Project, Cities of Highland and San Bernardino, San Bernardino County, California.	**Yes

Table 1. Previous Technical Studies Within the Records Search Area of the Proposed Project Site

SCCIC Report No. (SB-)	Authors	Date	Title	Addressed Proposed Project Site
07463	Tang, Bai "Tom"	2009	Cultural Resources Records Search, San Bernardino International Airport, City of San Bernardino, California.	** No, but adjacent
07959	Hatheway, Rodger G.	1998	Determination of Eligibility for 50 Buildings in the City of San Bernardino	Yes
**Note: Due to SCCIC COVID-19 operation protocols, these reports are not digitized and therefore, not provided by the SCCIC nor summarized in this report.				

Report SB-07959

Determination of Eligibility Report for 50 Buildings in the City of San Bernardino (Hatheway 1998), documents the results of a National Register of Historic Places (NRHP) evaluation for 50 buildings in the City of San Bernardino. The study addressed built environment resources and encompassed the entirety of the current proposed Project site; the study does not address archaeological resources. The study's findings include the determination that none of the 50 buildings assessed qualified for individual listing in the NRHP nor was a potential district association identified.

Previously Recorded Cultural Resources

The SCCIC records indicate that 15 cultural resources have been previously recorded within 0.5-mile of the Project site, none of which overlap or are adjacent to the proposed Project site. All 15 resources are historic built environment resources and fall outside of the scope of the present study and therefore, will not be addressed in this report. No historic-period or prehistoric archaeological resources were identified within the records search area of the proposed Project site. A bibliography of all 15 resources is included in Appendix C of this report.

Review of Historical Topographic Maps and Aerial Photographs

Dudek consulted historical topographic maps and aerial photographs through the Nationwide Environmental Title Research, LLC (NETR) to better understand any natural or human-made changes to the proposed Project site and surrounding properties over time.

Historical Topographic Maps

Topographic maps depict elevation of the study area as well as the areas surrounding it and illustrate the location of roads and some buildings. Although topographic maps are not comprehensive, they are another tool in determining whether a study area has been disturbed and at times to what approximate depth. A review of available topographic maps was conducted and includes the following years: 1901, 1904, 1909, 1913, 1924, 1929, 1939, 1946, 1951, 1955, 1958, 1960, 1963, 1964, 1969, 1973, 1977, 1979, 1980, 1986, 1988, 1999, 2012, 2015,

and 2018 (NETR 2021a). Table 2, below, summarizes the results of the topographic maps review of the proposed Project site and surrounding properties for all available years.

Table 2. Historical Topographic Maps Review

Year	Description
1901	The proposed Project site is mostly undeveloped with the exception of one structure depicted within the southwest quadrant of the proposed Project site. Both present-day Victoria Avenue and 5th Street are symbolized as light-duty roads with a hard or improved surface. There is no roadway representing the route of present-day 3rd Street depicted. The Highlands Motor Line railroad track is located northwest and outside of the proposed Project site. The route of the Highlands Motor Line railroad track is shown to travel east-west along present-day East 5th Street then changing course and traveling north-south along present-day Victoria Avenue. There is an unnamed tributary (present-day City Creek) to the southeast and the Santa Ana River Wash to the southeast and south of the proposed Project site.
1904-1951	There are no significant changes in the proposed Project site.
1955	There has been significant development in the area both within and surrounding the proposed Project site. There are now six structures depicted within the proposed Project site: two appear to be within APN 1192-551-01 and four are along Third Street. Both Victoria Avenue and Third Street (as referred to in the map) are symbolized as a secondary highways with a hard surface and Fifth Street is symbolized as a light-duty road with a hard or improved surface. The wash is no longer depicted. The waterway within the former wash is now symbolized as an intermittent stream. Both features are just to the southeast and outside of the proposed Project site.
1958	This map depicts the same information as the 1951 topographic map
1960	The proposed Project site is now labeled "BM 1158". Of note, the use of “BM” on topographic maps represents a benchmark or a point of known position and elevation that is used as a reference point for surveys denoting a height above sea level.

DRAFT

Table 2. Historical Topographic Maps Review

Year	Description
	There are no other observable significant changes to the proposed Project site.
1963 and 1964	There are no significant changes in the proposed Project site.
1969	The structures within APN 1192-551-01 are no longer depicted; however, there is a lateral bold line oriented east-west along the southern boundary of this parcel. There are now six structures depicted along Third Street and two structures within the central portion of the proposed Project site. Victoria Avenue is no longer depicted as a secondary highway with a hard surface; it is depicted as a light-duty road with a hard or improved surface on this map. The intermittent stream depicted in the 1955 map is now labeled City Creek.
1973	This topographic map depicts the same information as the 1964 map.
1979	There are no significant changes in the proposed Project site; however, to the west of the proposed Project site and Victoria Avenue is a development labeled on the map as "US Military Res".
1980-1999	There are no significant changes in the proposed Project site; however, the "US Military Res" area to the west of the proposed Project site is shown as subdivisions.
2012-2018	The maps for these years depicts no structures within the proposed Project site and although City Creek is still depicted, it is no longer labeled as such. The "US Military Res" area to the west of the proposed Project site is no longer labeled as such and shifts between depictions as subdivisions (2012 and 2015) and vacant land (2018).

While topographic maps are informative, they do not illustrate the minute changes that can occur to a landscape overtime and at times, are inconsistent with what is depicted year to year. Most often, structures depicted in topographical maps are limited to those with community or social significance (e.g. Firehouses, Hospitals, churches, community centers, etc.), including additions or changes to roads and/or waterways. Nonetheless, the information gathered contributes to the understanding of the chronological development of a study area.

Historical Aerial Photographs

A review of historical aerial photographs was conducted as part of the archival research effort from the following years: 1938, 1959, 1966, 1968, 1980, 1984, 1985, 1994, 2002, 2005, 2009, 2010, 2012, 2014, 2016, 2018, and 2020 (NETR 2021b). Through careful comparative review of historical aerials, changes to the landscape of a study area may be revealed. Disturbance to the study area is specifically important as it helps determine if soils within the study area are capable of sustaining intact archaeological deposits. Additionally, historical aerials have the potential to reveal whether a study area was subjected to alluvial deposits by way of flooding, debris flows or

mudslides, as well as placement of artificial or foreign fill soils that may have buried intact archaeological deposits. Table 3, below, summarizes the results of the aerial photograph review of the proposed Project site and surrounding properties for all available years.

Table 3. Historical Aerial Photographs Review

Photograph Year	Observations and Findings
1938	The proposed Project site is undeveloped. There are roads present consistent with the present-day layout of 3rd Street and Victoria Avenue. There are a few scattered trees along the western boundaries of parcels 1192-551-15 and 1192-551-02, as well as within the northeast corner of parcel 1192-551-15. City Creek is present to the east and does not appear to be channelized. Parcels 1192-551-07, 119-2551-06, 119-2551-05 and the southeast corner of parcel 1192-551-15, appear to be within a wash area. There are three structures north and outside of the proposed Project site.
1959	There appear to be two structures within parcel 1192-551-01; however, the quality of the aerial photograph makes it difficult to discern the exact number of structures present. There is a structure located in the center of the border between parcels 1192-551-14 and 1192-551-15, near the trees that were visible in the 1938 aerial. There are also structures along 3rd Street within parcels 1192-551-07, 1192-551-06, 1192-551-05 and 1192-551-04. Parcels 1192-551-12 and 1192-551-13 show evidence of surface disturbance, possibly vegetation growth, and informal paths. There are two trees along the northern boundary of parcel 1192-551-02. There is a road visible along the alignment of present-day 5th Street. The tree line along the western boundary of the proposed Project site is no longer present. City Creek is now channelized, south of 3rd Street.
1966	Parcels 1192-551-12 and 1192-551-13 no longer shows evidence of surface disturbance. Trees now surround the structures within parcels 1192-551-06,1192-551-05, and the southwest corner of parcel 1192-551-07. City Creek is now channelized, north of 3rd Street.
1968	The northern section of parcel 1192-551-06 has been cleared of small vegetation. There is a path going along the eastern and southern boundaries of parcel 1192-551-01.
1980	Additional structures have been built within parcel 1192-551-07 and there are many vehicles parked within that parcel.

DRAFT

Table 3. Historical Aerial Photographs Review

Photograph Year	Observations and Findings
	There is an informal path that is visible along the southern boundary of parcel 1192-551-01.
1984 & 1985	Due to the quality of the aerial photographs, there are no significant/discernable changes to the proposed Project site.
1994	The structures within parcel 1192-551-01 are no longer present. Some trees within parcel 1192-551-05 appear to have been removed. There are now only trees remaining within parcels 1192-551-02, 1192-551-06, 1192-551-06, and 1192-551-15. Ground disturbance is visible within the central and northern portion of parcel 1192-551-07.
2002	Due to the quality of the aerial photographs, there are no significant/discernable changes to the proposed Project site.
2005-2012	There are no significant/discernable changes to the proposed Project site.
2014	There are two small, possibly temporary structures within parcel 1192-551-01. The surface area of parcels 1192-551-12, 1192-551-13, 1192-551-14, and 1192-551-15 appears to have been disked.
2016	The structure within parcel 1192-551-15 is no longer present.
2018	Parcel 1192-551-06 is developed and appears to be consistent with present-day site conditions. The structures within parcel 1192-551-01 are no longer present.
2020	The proposed Project site appears consistent with present site conditions.

Geotechnical Report Review

The geotechnical report, *Geotechnical Engineering Investigation – Proposed Industrial Warehouse Development Southeast Corner of Victoria Avenue and 5th Street, Highland, California* (NorCal Engineering 2022), was prepared for Patriot Partners in June 2022 to determine the subsurface geological conditions of an approximately 7.23-acre property located in the City of Highland, San Bernardino County, California and represents the footprint of the present proposed Project site. The report details the results of 12 subsurface exploratory investigations consisting of eight (8) backhoe trenching explorations (T-1 through T-8) and four (4) exploratory borings (B-1 through B-4) using a hand auger. These subsurface exploratory investigations were placed at accessible locations throughout the proposed Project site, as depicted in Image 1, below.

Image 1. Subsurface Exploratory Investigation Locations (NorCal Engineering 2022, Figure 1).

Subsurface exploratory borings extended to a maximum depth ranging from 10 to 18.5 feet below ground surface (bgs) and were completed on May 19, 2022. According to the geotechnical report, the materials/soils encountered include: 1) Pulverized Asphalt from surface to between 2 and 6 inches at three locations (B-2 through B-4); 2) Fills soils: characterized as brown, fine to medium grained, silty sand with some gravel and rootlets, encountered from surface to between 2 inches and 3 feet bgs; however, the report does not indicate whether the fill soil is natural or engineered fill; 2) Native soils: characterized as natural undisturbed soils that is brown, fine to coarse grained slightly silty sand with occasional cobbles, were identified underlying fill soils to the maximum depths explored. A summary of the subsurface investigative results is provided in Table 4.

Table 4. Summary of Subsurface Investigations – NorCal Engineering 2022

Boring	Asphalt	Fill Soils	Native Soils	Terminated Depth
T-1	-	0-1.5 feet bgs	1.5-10 feet bgs	10 feet bgs
T-2	-	0-1.5 feet bgs	1.5-12 feet bgs	12 feet bgs
T-3	-	0-1 feet bgs	1-10 feet bgs	10 feet bgs
T-4	-	0-1 feet bgs	1-12 feet bgs	12 feet bgs
T-5	-	0-1 feet bgs	1-10 feet bgs	10 feet bgs
T-6	-	0-1.5 feet bgs	1.5-18.5 feet bgs	18.5 feet bgs
T-7	-	0-3 feet bgs	3-10 feet bgs	10 feet bgs

Native American Coordination

NAHC Sacred Lands File Search

The SLF record is maintained at a PLSS Section level meaning the negative or positive result is respective of a general area covering approximately one-square mile (640 acres) rather than the exact study area. Therefore, as part of the process of identifying cultural resources within or near the proposed Project, Dudek referenced the results of an SLF search that was previously completed for another project within close proximity (approximately 765 feet) to the northwest of the present proposed Project site (completed April 14, 2021). The SLF search was conducted by Cultural Resources Analyst Andrew Green to determine the presence of any reported Native American cultural resources within proximity of the proposed Project site as listed in the NAHC maintained SLF. The NAHC SLF records search results were positive. However, as previously stated, the SLF record is maintained at a PLSS Section level, which indicates a recorded sacred site could be anywhere within this one square mile (640 acre) area. The NAHC identified twelve (12) Native American individuals who would potentially have specific knowledge as to whether or not Native American cultural resources are identified within the study area that could be at-risk. In compliance with Assembly Bill 52, the City has contacted all NAHC-listed traditionally geographically affiliated tribal representatives that have requested project notification; these efforts are summarized in the Initial Study/Mitigated Negative Declaration document for the proposed Project. Documentation of the NAHC SLF search results is provided in Appendix D.

Note: Sacred Land Files maintained by the NAHC represent a curation of "ancient places of special religious or social significance to Native Americans and known ancient graves and cemeteries of Native Americans on private and public lands in California" (nahc.gov 2021) provided by Tribal entities and Native American representatives. For various reasons, Tribal entities and Native American representatives do no not always report sacred lands or TCRs to the NAHC; as such, the NAHC's SLF is not necessarily a comprehensive list of known TCRs and searches of the SLF must be considered in concert with other research and not used as a sole source of information regarding the presence of TCRs. Additionally, results of the SLF provided relate to the general regional area within and

DRAFT

surrounding the study area and do not necessarily equate to the existence of resources within the specific area occupied by the current proposed Project site.

Assembly Bill 52

The proposed Project is subject to compliance with AB 52 (PRC 21074), which requires consideration of impacts to TCRs as part of the CEQA process, and that the lead agency notify California Native American Tribal representatives that have requested notification who are traditionally or culturally affiliated with the geographic area of the proposed Project site. All records of correspondence related to AB 52 notification and any subsequent consultation are on file with the City. A summary of the consultation record is provided and addressed in the Initial Study/Mitigated Negative Declaration document for the proposed Project.

1938 Kirkman-Harriman Historical Map Review

Dudek cultural resources specialists reviewed sources commonly identified though Tribal consultation, notably the 1938 Kirkman-Harriman Historical Map (Image 2). Based on this map, the proposed Project site is approximately 1.4 miles directly east of the northwest–southeast-trending "Old Salt Road" and approximately 1.12 miles north of a tributary that links with the Santa Ana River to the southwest. The nearest mapped Native American village is nearly 2 miles southeast of the proposed Project site and is unnamed. It should be noted that this map is highly generalized due to scale and age and may be somewhat inaccurate with regards to distance and location of mapped features. Additionally, this map was prepared based on review of historic documents and notes more than 100 years following secularization of the missions (in 1833). Although the map contains no specific primary references, it matches with the details documented by the Portolá expedition (circa 1769–1770). The map is a valuable representation of post-colonization mission history; however, it is limited to a specific period of Native American history and substantiation of the specific location and uses of the represented individual features should be verified by archaeological records and/or other primary documentation. Although the SLF results for the proposed Project were positive, the NAHC did not provide any specificity as to the location of the resources identified nor was any information pertaining to the type of resource provided. Moreover, the results of the SLF provided by the NAHC indicate the presence of resources in the general regional area within and surrounding the proposed Project site and not necessarily within the proposed Project site. No archaeological evidence of the nearest village on the 1938 Kirkman-Harriman map was provided in the SCCIC records or as the result of a review of other archaeological information for the proposed Project site. This suggests that the village is either likely no nearer than 0.5-miles from the proposed Project site or if existent within the records search radius, subsurface deposits associated with the village have not yet been discovered.

DRAFT

Field Survey

Methods

An intensive-level archaeological survey of the proposed Project site was conducted September 22, 2022 by Dudek archaeologists, Linda Kry and Lanette Renz. The intensive-level pedestrian survey was conducted was conducted employing parallel transects, spaced no more than 15 meters apart (approximately 50 feet), over the entire proposed Project site, where feasible and safe to do so. In areas of limited ground surface visibility due to the presence of pulverized asphalt, stockpiled demolition debris and soils, structural and wood debris, areas surrounding extant buildings or structures, and staged miscellaneous items, including a trailer, formal transects were not utilized. Instead, a mixed approach (opportunistic survey) and reconnaissance survey (visual inspection) were utilized, selectively examining areas of exposed ground surfaces, where possible.

The survey of the approximately 7.23-acre proposed Project site included all eleven (11) parcels. The ground surface was inspected for prehistoric artifacts (e.g., flaked stone tools, tool-making debris, groundstone tools, ceramics, fire-affected rock), soil discoloration that might indicate the presence of a cultural midden, soil depressions, features indicative of structures and/or buildings (e.g., standing exterior walls, post holes, foundations), and historical artifacts (e.g., metal, glass, ceramics, building materials). Ground disturbances such as burrows, graded areas and bases of trees and bushes were also visually inspected for exposed subsurface materials. No artifacts were collected during the survey.

All fieldwork was documented using field notes and an Apple Generation 6 iPad (iPad) equipped with ESRI Collector and Avenza PDF Maps software with close-scale georeferenced field maps of the proposed Project site, and aerial photographs. Location-specific photographs were taken using the iPad's 8-mega-pixel resolution camera. All field notes, photographs, and records related to the current study are on file at Dudek's Pasadena, California office. All field practices met the Secretary of Interior's standards and guidelines for a cultural resources inventory.

Results

Survey results for the 11 parcels that make up the proposed Project site are discussed individually below (see Appendix A: Figure 2). Note: the geotechnical study revealed that the proposed Project site is predominately covered in pulverized asphalt or fill soils although the origin of the fill soils was not mentioned. As such, any exposed soils observed during the survey were likely fill soils and not a good representation of the native soils present prior to development/ground disturbing activities.

APN 1192-551-01 (Parcel 1)

This parcel is a vacant lot and observations of present site conditions include evidence of disking for weed abatement and grading activities. Vegetation within this parcel consists of grasses and weeds. Over 50 percent of the parcel is comprised of multiple stockpiles of demolition and vegetation debris and modern refuse scatter obstructing ground surface visibility. The remainder of the parcel is graded. Given the current parcel conditions, ground surface visibility within the parcel ranged from non-existent to poor in areas of obstructed ground surface visibility (0 to less than 5 percent) and very good to excellent (90 to 100 percent) in graded areas with sparse vegetation.

APN 1192-551-02 (Parcel 11)

This parcel is vacant land and observations of present site conditions include evidence of grading activities with some modern refuse on the surface. Vegetation within this parcel consists of sparse grasses and weeds. Given the current parcel conditions, ground surface visibility was excellent (100 percent).

APN 1192-551-03 (Parcel 10)

This small parcel is vacant land with the presence of grasses and weeds with some modern refuse on the surface. Given the current parcel conditions, ground surface visibility was excellent (100 percent).

APN 1192-551-04 (Parcel 9)

DRAFT

Approximately 70 percent of the parcel is occupied by an extant building and structural remnants, including a concrete foundation and miscellaneous modern refuse. The remaining 30 percent of the parcel consists of soils surrounding the extant building and/or structural remnants. Vegetation within this parcels consists of moderately dense grasses and weeds. Given the current parcel conditions, ground surface visibility within the parcel ranged from non-existent to poor in areas of obstructed ground surface visibility (0 to less than 5 percent) and poor to fair (20 to 30 percent) in the areas surrounding the extant residential buildings/structures.

APN 1192-551-05 (Parcel 8)

The majority of this parcel, approximately 98 percent of the parcel is occupied by an extant residential building, structural remnants such as concrete foundations and miscellaneous modern refuse and in areas without any existing development is covered with gravel. Areas of exposed ground soils were limited to pockets to the east and north of the parcel. Given the current parcel conditions, ground surface visibility within the parcel ranged from non-existent to very poor (0 to less than 3 percent).

APN 1192-551-06 (Parcel 6)

Approximately 90 percent of the parcel is occupied by extant buildings/structures and structural remnants, including concrete foundations miscellaneous modern refuse. The remaining 10 percent of the parcel consists of soils surrounding the extant buildings/structures. Given the current parcel conditions, ground surface visibility within the parcel ranged from non-existent to poor in areas of obstructed ground surface visibility (0 to less than 5 percent) and fair to good (30 to 50 precent) in the areas surrounding the extant residential buildings/structures.

APN 1192-551-07 (Parcel 5)

Approximately 80 percent of the parcel is covered in pulverized asphalt and gravel or is occupied by extant residential buildings/structures, a staged trailer, and miscellaneous modern refuse. The remaining 20 percent of the parcel consists of soils surrounding the extant buildings/structures primarily located along 3rd Street. Given the current parcel conditions, ground surface visibility within the parcel ranged from non-existent to poor in areas of obstructed ground surface visibility (0 to less than 5 percent) and fair to good (30 to 50 precent) in the areas surrounding the extant residential buildings/structures.

APN 1192-551-12 (Parcel 2)

This parcel is vacant land and observations of present site conditions include evidence of disking for weed abatement and a scatter of modern refuse. Vegetation within this parcel consists of grasses and weeds. Given the parcel conditions, ground surface visibility was excellent (100 percent).

APN 1192-551-13 (Parcel 3)

This parcel is vacant land and observations of present site conditions include evidence of disking for weed abatement and a scatter of modern refuse. Vegetation within this parcel consists of grasses and weeds. Given the parcel conditions, ground surface visibility was excellent (100 percent).

APN 1192-551-14 (Parcel 4)

DRAFT

This parcel is a vacant lot and observations of present site conditions include evidence of disking for weed abatement, grading, and stockpiling of soils/structural activities, including miscellaneous modern refuse. Vegetation within this parcel consists of grasses, weeds and a tree. Approximately 30 percent of the parcel is comprised of multiple stockpiles and scatters of demolition and vegetation debris obstructing ground surface visibility, which is limited to the western half of the parcel. The remainder of the parcel exhibits evidence of disking for weed abatement. Given the current parcel conditions, ground surface visibility within the parcel ranged from non-existent to poor in areas of obstructed ground surface visibility (0 to less than 5 percent) and very good to excellent (90 to 100 precent) in graded/disked areas with sparse vegetation.

APN 1192-551-15 (Parcel 7)

This parcel is vacant lot. Vegetation within this parcel consists of grasses, weeds and a tree. Observations of present site conditions include modern refuse scattered across the parcel and evidence of disking for weed abatement and grading activities, including stockpiling of soils/structural debris, which was limited to the western half portion of the parcel and accounts for approximately 30 percent of the parcel. Within the southeastern quadrant of the parcel is a rectangular-shaped cleared area surrounded by a berm of soils intermixed with vegetation and concrete slabs. Given the current parcel conditions, ground surface visibility was non-existent to poor in areas of obstructed ground surface visibility (0 to less than 5 percent) and very good to excellent (90-100 percent) in graded/disked/cleared areas with sparse vegetation, which encompasses approximately 70 percent of the parcel.

As previously mentioned in Geotechnical Report Review section, subsurface exploratory boring and trenching investigations identified fill soils from surface to between 2 inches and 3 feet bgs, depending on the location investigated, at all boring and trenching locations within the proposed Project site. The presence of the fill soil is an indication that any potential cultural material from surface to between 2 inches and 3 feet bgs, has been previously displaced from the primary depositional location, buried, or destroyed. Additionally, the presence of fill soils demonstrates that the native soils upon and within which cultural deposits would exist in context was not observed during the survey. No cultural materials were observed within any of the 11 parcels; however, due to the presence of fill soils, observation of intact native soils was not possible.

Sensitivity Analysis

Archaeological Sensitivity

While the NAHC SLF records search results were positive, the results relate to the general regional area and do not necessarily equate to the existence of resources within the specific area occupied by the proposed Project site. A search of the CHRIS database the records search did not identify any previously recorded historic-period or prehistoric archeological resources within or immediately adjacent to the proposed Project site. However, a search of the CHRIS database indicates that less than 10 percent of the proposed Project site has been subjected to previous archaeological investigations.

According to the aerial photographs review, the proposed Project site has been subjected to consistent ground disturbance, shifting from undeveloped land in 1938 with the unchanneled City Creek to the east, and a wash that overlapped the southeast corner of the proposed Project site and transforming steadily to include the development

DRAFT

and removal of buildings/structures between the late 1950s to the early 2010s. By 2020, the proposed Project site conditions are consistent with those observed during the pedestrian survey conducted for this investigation.

The proposed Project site has been routinely subjected to disking for weed abatement. A review of a geotechnical report prepared for the proposed Project site determined that fills soils were identified from surface to between 2 inches and 3 feet bgs within all exploratory boring and trenching locations. No cultural materials were observed within the proposed Project site as a result of the pedestrian survey; however, due to the presence of fill soils, observation of intact native soils was not possible.

Current Project design indicates that the minimum depth of ground disturbance for the proposed Project site is between 3 to 4 feet below the existing ground surface with a maximum depth of 16 feet below the existing ground surface for the installation of the infiltration basin within the western portion of the proposed Project site.

In consideration of all these factors, the potential to encounter intact cultural deposits containing archaeological and tribal cultural resources within soils from the current grade and between 2 inches and 3 feet bgs is unlikely. However, the potential for intact cultural deposits to exist within native soils (below between 2 inches and 3 feet bgs) to the depths of proposed ground disturbance is unknown. Given that City Creek and a wash were historically in close proximity to and/or overlapped the proposed Project site, there is a potential for yet unidentified archaeological resource deposits within the proposed Project site to be buried by alluvial and flood deposits. In the event that unanticipated archaeological resources are encountered during Project implementation, impacts to these resources could be significant. As such, the following management recommendations are provided to ensure that impacts to unanticipated archaeological resources and human remains would be treated properly resulting in a less than significant impact.

Management Recommendations

Although the proposed Project site has been disturbed over time as a result of development, it is possible that unknown intact archaeological resources could be encountered during ground disturbing activities within native soils. The following measures have been developed to ensure that any inadvertent discovery of archaeological resources will be treated appropriately and in accordance with CEQA regulations: preconstruction training, retention of an on-call qualified archaeologist, meeting Secretary of Interior professional standards, to manage monitoring and supplemental survey activities, address inadvertent discoveries, and inadvertent discovery clause implemented and included on all construction plans.

Retention of a Qualified Archaeologist. A qualified archaeologist should be retained and on-call to respond and address any inadvertent discoveries identified for the duration of construction activities. Additionally, in consideration of the potential to encounter intact cultural deposits beneath fill soils, the qualified archaeologist should monitor ground disturbing activities between 12-18 inches below current grade and should survey the proposed Project site once fill soils have been removed to ensure no cultural deposits underly the fill layer. A qualified archaeological principal investigator, meeting the Secretary of the Interior's Professional Qualification Standards, should oversee and adjust monitoring efforts as needed (increase, decrease, or discontinue monitoring frequency) based on the observed potential for construction activities to encounter cultural deposits or material. The archaeological monitor will be responsible for maintaining daily monitoring logs. Dudek further recommends monitoring be conducted during ground disturbing activities from 2 inches and 3 feet below current grade and an additional survey be conducted once fill soils have been removed. If

cultural materials are observed during the course of ground disturbing activities below fill soils, then subsurface testing may be required. These measures will ensure the potential Project impacts to archaeological resources and human remains would be less than significant. Within 60 days following completion of ground disturbance, an archaeological monitoring report should be prepared and submitted to the City for review. This report should document compliance with approved mitigation, document the monitoring efforts, and include an appendix with daily monitoring logs. The final report should be submitted to the SCCIC.

Workers Environmental Awareness Program. All construction personnel and monitors who are not trained archaeologists should be briefed regarding inadvertent discoveries prior to the start of construction activities. A basic presentation and handout or pamphlet should be prepared in order to ensure proper identification and treatment of inadvertent discoveries. The purpose of the Workers Environmental Awareness Program (WEAP) training is to provide specific details on the kinds of archaeological materials that may be identified during construction of the Project and explain the importance of and legal basis for the protection of significant archaeological resources. Each worker should also learn the proper procedures to follow in the event that cultural resources or human remains are uncovered during ground-disturbing activities. These procedures include work curtailment or redirection, and the immediate contact of the site supervisor and archaeological monitor.

Inadvertent Discovery of Archaeological Resources. In the event that archaeological resources (sites, features, or artifacts) are exposed during construction activities for the proposed Project, all construction work occurring within 100 feet of the find should immediately stop and a qualified archaeologist is notified immediately to assess the significance of the find and determine whether or not additional study is warranted. Depending upon the significance of the find, the archaeologist may simply record the find and allow work to continue. If the discovery proves significant under CEQA, additional work such as preparation of an archaeological treatment plan, testing, data recovery, or monitoring may be warranted.

Inadvertent Discovery of Human Remains. In accordance with Section 7050.5 of the California Health and Safety Code, if human remains are found, the county coroner shall be immediately notified of the discovery. No further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains shall occur until the county coroner has determined the appropriate treatment and disposition of the human remains. If the county coroner determines that the remains are, or are believed to be, Native American, he or she shall follow all required protocols according to California Public Resources Code, Section 5097.98.

Re: 13228 6th & Victoria Ave Warehouse Project, San Bernardino County

Dear Ms. De Alba:

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were positive. Please contact the San Manuel Band of Mission Indians on the attached list for more information. Other sources of cultural resources should also be contacted for information regarding known and recorded sites.

Attached is a list of Native American tribes who may also have knowledge of cultural resources in the project area. This list should provide a starting place in locating areas of potential adverse impact within the proposed project area. I suggest you contact all of those indicated; if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call or email to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from tribes, please notify me. With your assistance, we can assure that our lists contain current information.

If you have any questions or need additional information, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green

Executive Summary

The purpose of this report is to determine whether the 5th Street and Victoria Avenue Warehouse Project (proposed Project) in the City of Highland, San Bernardino County, California would impact any historical resources pursuant to the California Environmental Quality Act (CEQA). The proposed Project would involve construction of a single 176,000 square-foot industrial/warehouse building (inclusive of 12,000 square feet of office/mezzanine) and would require the demolition of three existing historic-age residential buildings on an approximately 7.23-acre site (Project site).

Patriot Development Partners retained Dudek to complete this Historical Resources Technical Report (report) to identify all historical resources (if any) on the Project site to determine if the proposed Project would result in a significant impact to historical resources under CEQA. None of the buildings on the Project site are currently listed under any national, state, or local landmark or historic district programs. Three of the ten parcels on the Project site contain buildings that are more than 45 years of age and therefore require evaluation as potential historical resources.

This report includes the results of an intensive survey of the Project site by two qualified architectural historians; building development and archival research; development of an appropriate historic context for the evaluation of the Project site; and recordation and evaluation of three single-family residential properties over 45 years old for historical significance and integrity in consideration of National Register of Historic Places, California Register of Historical Resources, and City of Highland designation criteria and integrity requirements. This report was prepared in conformance with CEQA Guidelines Section 15064.5 for historical resources and all applicable local guidelines and regulations.

Dudek recorded and evaluated three residential properties over 45 years old located within the Project site:

- Parcel 1, 26530 3rd Street (Assessor's Parcel Number [APN] 1192-551-04)
- Parcel 2, 26540 3rd Street (APN 1192-551-05)
- Parcel 3, 26562 3rd Street (APN 1192-551-07)

The remaining seven properties within the Project site, Parcel 4, 26552 3rd Street (APN 1192-551-06); Parcel 5 (APN 1192-551-12); Parcel 6 (APN 1192-551-13); Parcel 7 (APN 1192-551-14); Parcel 8 (APN 1192-551-15); Parcel 9 (APN 1192-551-02); and Parcel 10 (APN 1192-551-01), were researched using historic aerial photography and they were determined to be vacant or to contain no built environment resources over 45 years old.

As a result of Dudek's extensive archival research, field survey, and property evaluations of significance, no historical resources were identified within the Project site. Nor were any adjacent resources identified that could be indirectly impacted by proposed Project activities. The finding under CEQA is No Impact. As the proposed Project would have no impact on historical resources, no further study is required.

INTENTIONALLY LEFT BLANK

1 Introduction

Dudek was retained by Patriot Development Partners to complete a historical resources evaluation report for the 5th Street and Victoria Avenue Warehouse Project (the proposed Project) in the City of Highland, California (the City). This Historical Resources Technical Report (report) includes the results of an intensive survey of the Project site by a qualified architectural historian; building development and archival research; development of an appropriate historic context for the Project site; and recordation and evaluation of three single-family residential properties over 45 years old for historical significance and integrity in consideration of National Register of Historic Places (NRHP), California Register of Historical Resources (CRHR), and City of Highland designation criteria and integrity requirements. This report was prepared in conformance with California Environmental Quality Act (CEQA) Guidelines Section 15064.5 for historical resources.

1.1 Project Description and Location

Project Description

The proposed Project would involve construction of a single 176,066-square-foot industrial/warehouse building (inclusive of 12,000 square feet of office/mezzanine) and would require the demolition of three existing historic age residential buildings on an approximately 7.23-acre site (Project site).

Project Location

The Project site is located within the southern portion of the City of Highland, San Bernardino County, California (Figure 1, Project Location) and is bounded by West 5th Street to the north, Victoria Avenue to the west, East 3rd Street to the south, and vacant lots and an automotive repair shop to the east. The approximately 7.23-acre (gross area) Project site is located on the northeast corner of East 3rd Street and Victoria Avenue. The Project site consists of three parcels developed with residential buildings (Parcels 1–3) (subject properties), one parcel developed with a non-historic-age residential building (Parcel 4), and six vacant parcels (Parcels 5–10), as shown in Table 1 and on Figure 2, Project Site.

Table 1. Parcels Located on the Proposed Project Site

Parcel	Address	APN	Date of Construction	Historic Age Building
1	26530 3rd Street	1192-551-04	Circa 1948	Yes
2	26540 3rd Street	1192-551-05	Circa 1948	Yes
3	26562 3rd Street	1192-551-07	Circa 1940	Yes
4	26552 3rd Street	1192-551-06	2017	No
5	Vacant	1192-551-12	N/A	No
6	Vacant	1192-551-13	N/A	No
7	Vacant	1192-551-14	N/A	No
8	Vacant	1192-551-15	N/A	No

Table 1. Parcels Located on the Proposed Project Site

Parcel	Address	APN	Date of Construction	Historic Age Building
9	Vacant	1192-551-02	N/A	No
10	Vacant	1192-551-01	N/A	No

Notes: APN = Assessor's Parcel Number; N/A = not applicable.

1.2 Project Personnel

This report, including all fieldwork, research, and the associated property significance evaluation were prepared by Dudek architectural historian Caitlin Greeley, MA, with assistance from Dudek architectural historian Kate Kaiser on fieldwork. This report was reviewed for quality assurance/quality control by Dudek architectural historian Nicole Frank, MSHP, and senior architectural historian Allison Lyons, MSHP. All personnel meet the Secretary of the Interior's Professional Qualifications Standards (36 CFR Part 61) for Architectural History. Resumes for all key personnel are provided in Appendix A.

1.3 Regulatory Context

Federal Regulations

Although there is no federal nexus for this Project, resources were evaluated in consideration of NRHP designation criteria.

The NRHP is the United States' official list of districts, sites, buildings, structures, and objects worthy of preservation. Overseen by the National Park Service under the U.S. Department of the Interior, the NRHP was authorized under the National Historic Preservation Act, as amended. Its listings encompass all National Historic Landmarks and historic areas administered by the National Park Service.

NRHP guidelines for the evaluation of historic significance were developed to be flexible and to recognize the accomplishments of all who have made significant contributions to the nation's history and heritage. Its criteria are designed to guide state and local governments, federal agencies, and others in evaluating potential entries for the NRHP. For a property to be listed in or determined eligible for listing in the NRHP, it must be demonstrated to possess integrity and to meet at least one of the following criteria (NPS 1990, p. 2):

> The quality of significance in American history, architecture, archeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and:
>
> A. That are associated with events that have made a significant contribution to the broad patterns of our history; or
> B. That are associated with the lives of persons significant in our past; or

C. That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
D. That have yielded, or may be likely to yield, information important in prehistory or history.

Integrity is defined in NRHP guidance, How to Apply the National Register Criteria, as "the ability of a property to convey its significance. To be listed in the NRHP, a property must not only be shown to be significant under the NRHP criteria, but it also must have integrity" (NPS 1990, p. 44). Historic properties either retain integrity (convey their significance) or they do not. Within the concept of integrity, the NRHP criteria recognize seven aspects or qualities that define integrity. The seven aspects of integrity are locations, setting, design, materials, workmanship, feeling, and association. In order to retain historic integrity, "a property will always possess several, and usually most, of the aspects" (NPS 1990, p. 44).

NRHP guidance further asserts that properties be completed at least 50 years ago to be considered for eligibility. Properties completed fewer than 50 years before evaluation must be proven to be "exceptionally important" (criteria consideration G) to be considered for listing.

State Regulations

California Register of Historical Resources

In California, the term "historical resource" includes but is not limited to "any object, building, structure, site, area, place, record, or manuscript which is historically or archaeologically significant, or is significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California" (California Public Resources Code Section 5020.1[j]). In 1992, the California legislature established the CRHR "to be used by state and local agencies, private groups, and citizens to identify the state's historical resources and to indicate what properties are to be protected, to the extent prudent and feasible, from substantial adverse change" (California Public Resources Code Section 5024.1[a]). The criteria for listing resources in the CRHR were expressly developed to be in accordance with previously established criteria developed for listing in the NRHP, enumerated below. According to California Public Resources Code Section 5024.1(c)(1–4), a resource is considered historically significant if it (i) retains "substantial integrity," and (ii) meets at least one of the following criteria:

1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage.
2. Is associated with the lives of persons important in our past.
3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values.
4. Has yielded, or may be likely to yield, information important in prehistory or history.

In order to understand the historic importance of a resource, sufficient time must have passed to obtain a scholarly perspective on the events or individuals associated with the resource. A resource less than 50 years old may be considered for listing in the CRHR if it can be demonstrated that sufficient time has passed to understand its historical importance (see 14 CCR 4852[d][2]).

The CRHR protects cultural resources by requiring evaluations of the significance of prehistoric and historic resources. The criteria for the CRHR are nearly identical to those for the NRHP, and properties listed or formally

designated as eligible for listing in the NRHP are automatically listed in the CRHR, as are the state landmarks and points of interest. The CRHR also includes properties designated under local ordinances or identified through local historical resource surveys.

California Environmental Quality Act

As described further below, the following CEQA statutes and CEQA Guidelines are of relevance to the analysis of archaeological, historic, and tribal cultural resources:

- California Public Resources Code Section 21083.2(g) defines "unique archaeological resource."
- California Public Resources Code Section 21084.1 and CEQA Guidelines Section 15064.5(a) define "historical resources." In addition, CEQA Guidelines Section 15064.5(b) defines the phrase "substantial adverse change in the significance of an historical resource." It also defines the circumstances when a project would materially impair the significance of an historical resource.
- California Public Resources Code Section 21074(a) defines "tribal cultural resources."
- California Public Resources Code Section 5097.98 and CEQA Guidelines Section 15064.5(e) set forth standards and steps to be employed following the accidental discovery of human remains in any location other than a dedicated ceremony.
- California Public Resources Code Sections 21083.2(b)-(c) and CEQA Guidelines Section 15126.4 provide information regarding the mitigation framework for archaeological and historic resources, including examples of preservation-in-place mitigation measures; preservation-in-place is the preferred manner of mitigating impacts to significant archaeological sites because it maintains the relationship between artifacts and the archaeological context and may also help avoid conflict with religious or cultural values of groups associated with the archaeological site(s).

More specifically, under CEQA, a project may have a significant effect on the environment if it may cause "a substantial adverse change in the significance of an historical resource" (California Public Resources Code Section 21084.1; CEQA Guidelines Section 15064.5[b]). If a site is either listed or eligible for listing in the CRHR, or if it is included in a local register of historic resources or identified as significant in a historical resources survey (meeting the requirements of California Public Resources Code Section 5024.1(q), it is a "historical resource" and is presumed to be historically or culturally significant for purposes of CEQA (California Public Resources Code Section 21084.1; CEQA Guidelines Section 15064.5[a]). The lead agency is not precluded from determining that a resource is a historical resource even if it does not fall within this presumption (California Public Resources Code Section 21084.1; CEQA Guidelines Section 15064.5[a]).

A "substantial adverse change in the significance of an historical resource" reflecting a significant effect under CEQA means "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of an historical resource would be materially impaired" (CEQA Guidelines Section 15064.5[b][1]; California Public Resources Code Section 5020.1[q]). In turn, CEQA Guidelines Section 15064.5(b)(2) states the significance of an historical resource is materially impaired when a project:

1. Demolishes or materially alters in an adverse manner those physical characteristics of an historical resource that convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register of Historical Resources; or

2. Demolishes or materially alters in an adverse manner those physical characteristics that account for its inclusion in a local register of historical resources pursuant to section 5020.1(k) of the Public Resources Code or its identification in an historical resources survey meeting the requirements of section 5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or
3. Demolishes or materially alters in an adverse manner those physical characteristics of a historical resource that convey its historical significance and that justify its eligibility for inclusion in the California Register of Historical Resources as determined by a lead agency for purposes of CEQA.T

Pursuant to these sections, the CEQA inquiry begins with evaluating whether a project site contains any "historical resources," then evaluates whether that project will cause a substantial adverse change in the significance of a historical resource such that the resource's historical significance is materially impaired.

If it can be demonstrated that a project will cause damage to a unique archaeological resource, the lead agency may require that reasonable efforts be made to permit any or all of these resources to be preserved in place or left in an undisturbed state. To the extent that they cannot be left undisturbed, mitigation measures are required (California Public Resources Code Sections 21083.2[a], 21083.2[b], and 21083.2[c]).

California Public Resources Code Section 21083.2(g) defines a unique archaeological resource as an archaeological artifact, object, or site about which it can be clearly demonstrated that without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

1. Contains information needed to answer important scientific research questions and that there is a demonstrable public interest in that information.
2. Has a special and particular quality such as being the oldest of its type or the best available example of its type.
3. Is directly associated with a scientifically recognized important prehistoric or historic event or person.

Impacts to non-unique archaeological resources are generally not considered a significant environmental impact (California Public Resources Code Section 21083.2[a]; 14 CCR 15064.5[c][4]). However, if a non-unique archaeological resource qualifies as tribal cultural resource (California Public Resources Code Sections 21074[c], 21083.2[h]), further consideration of significant impacts is required. CEQA Guidelines Section 15064.5 assigns special importance to human remains and specifies procedures to be used when Native American remains are discovered. As described below, these procedures are detailed in California Public Resources Code Section 5097.98.

Local Regulations

City of Highland Historic and Cultural Preservation Ordinance (Chapter 16.32)

The City of Highland Cultural Resource Designation Criteria are listed under the Historic and Cultural Preservation Ordinance, adopted in 2021. This ordinance also defines the establishment and duties of a historic and cultural

preservation board consisting of five uncompensated voting members appointed by the city council. The city council and City of Highland has found and determined:

A. That the character and history of the city are reflected in its cultural, historical, and architectural heritage;

B. That these historical and cultural foundations should be preserved as living parts of community life and development to build an understanding of the city's past, so that future generations may have a genuine opportunity to appreciate, enjoy, and understand the rich heritage of the city;

C. That, in the face of ever-increasing pressures of modernization and urbanization, city landmarks, neighborhoods, and other areas of historical and cultural interest are threatened with demolition;

D. That pursuant to the provisions of the National Historic Preservation Act of 1966, as amended, the city of Highland joins with private concerns, the state of California, and the United States Congress to develop preservation programs and activities to give maximum encouragement to agencies and individuals undertaking preservation of the city's unique architectural, historical, aesthetic, and cultural heritage.

E. The purpose of this chapter is to promote the public health, safety, and general welfare and:

1. To safeguard the city's unique cultural heritage as embodied and reflected in the city's architectural history and patterns of cultural development;
2. To encourage and facilitate public knowledge, understanding, and appreciation of the city's historic past and unique sense of place;
3. To preserve diverse architectural styles, patterns of development, and design preferences reflecting phases of the city's history and to encourage complementary contemporary design and construction and inspire a more livable urban environment;
4. To enhance property values and to increase economic and financial benefits to the city and its inhabitants through the exploration of creative financial incentives for preservation;
5. To protect and enhance the city's attraction to tourists and visitors thereby stimulating business and industry;
6. To identify as early as possible and resolve conflicts between the preservation of cultural resources and alternative land uses;
7. To integrate the preservation of cultural resources into public and private land use management and development processes;
8. To stabilize neighborhoods through the preservation of cultural resources and establishment of historic districts and conservation zones;
9. To encourage public participation in identifying and preserving historical and architectural resources thereby increasing community pride in the city's cultural heritage;
10. To acknowledge the historic preservation plan "Old Town" as a tool for preservation of the unique character of the city's Highland Historic District. (Ord. 270 § 6, 2001; Ord. 171 § 8.10, 1994)

16.32.050 Cultural resource designation criteria.

For the purposes of this chapter, an improvement, natural feature, or site may be nominated as a cultural resource by the historic and cultural preservation board pursuant to HMC 16.32.060 if it meets the criteria for listing on the National Register of Historic Places or the following:

A. It exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history;

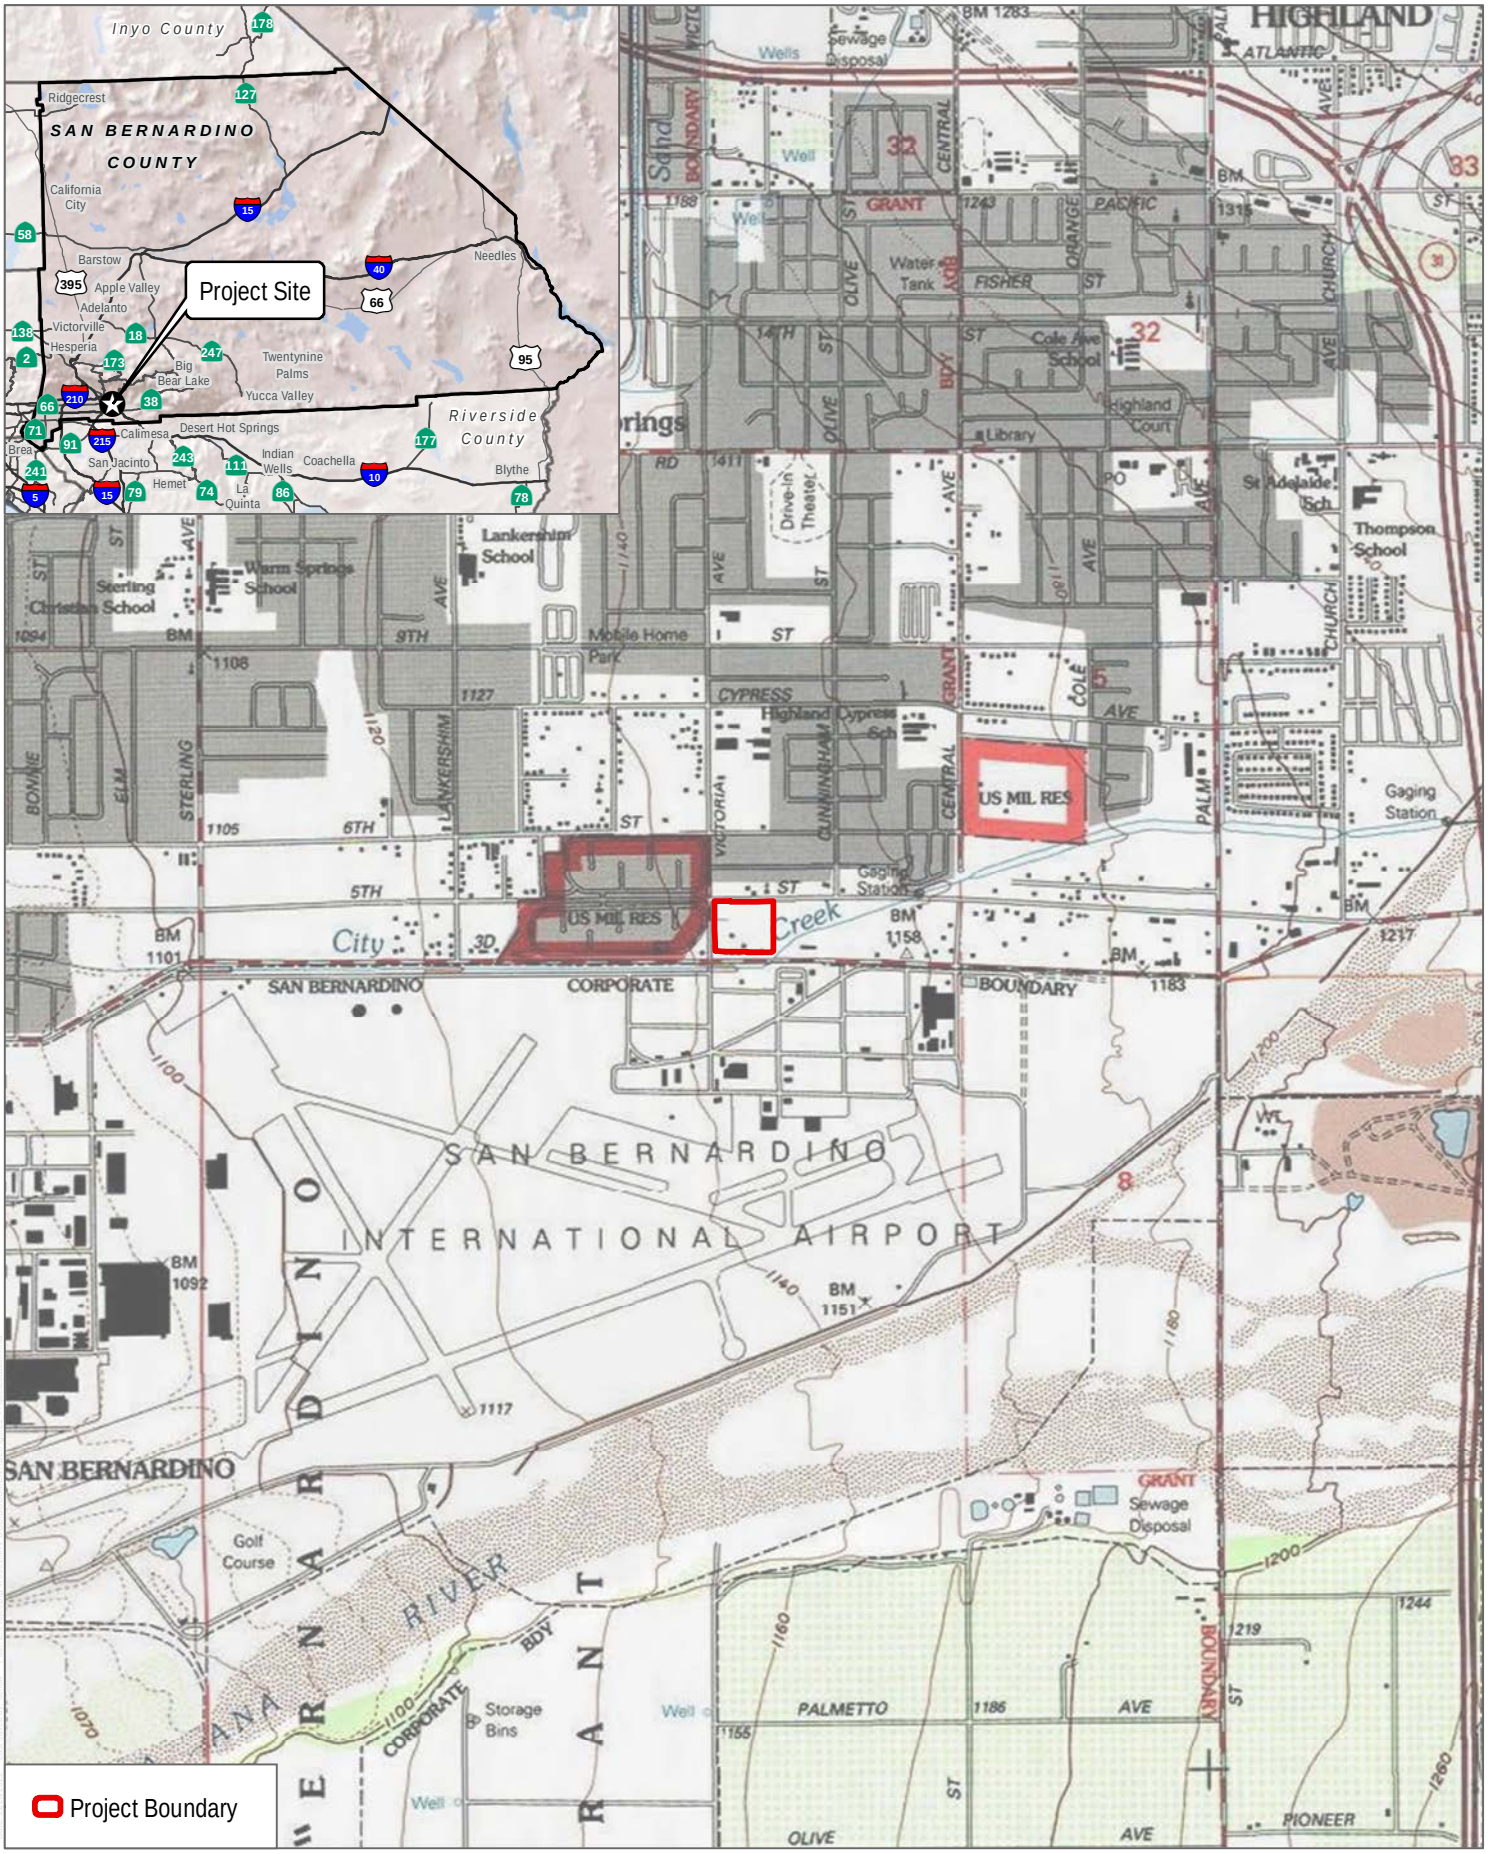
B. It is identified with persons or events significant in local, state, or national history;

C. It embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship;

D. It is representative of the work of a notable builder, designer, or architect;

E. It contributes to the significance of an historic area, being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development;

F. It has a unique location or singular physical characteristics or is a view or vista representing an established and familiar visual feature of a neighborhood, community, or the city of Highland;



G. It embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation;

H. It is similar to other distinctive properties, sites, areas, or objects based on a historic, cultural, or architectural motif.

I. It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning.

J. It is one of the few remaining examples in the city, region, state, or nation possessing distinguishing characteristics of an architectural or historical type of specimen. (Ord. 171 § 8.50, 1994)

2 Background Research

To identify potential historical resources and assess potential Project impacts, Dudek performed the following tasks and reviewed the following sources.

2.1 Study Area

Dudek established a study area for the proposed Project. The study area corresponds to the Project site. The study area is limited to the 10 parcels comprising the Project site. Parcels beyond this study area were not included because the Project would have no potential to impact historical resources beyond those on the Project site directly, indirectly, or cumulatively. The buildings and streets immediately surrounding the Project site create a geographic and visual separation between the Project site and parcels beyond the Project site.

2.2 Records Search

Dudek referenced a CHRIS records search that had been completed on May 10, 2021, for a project adjacent to the present Project site (approximately 765 feet from the Project site). This records search included any previously recorded cultural resources and investigations within the records search area and includes their digitized collections of mapped prehistoric and historic archaeological resources, Department of Parks and Recreation site records, technical reports, archival resources, and ethnographic references. Additional consulted sources included historical maps of the proposed Project site, the NRHP, the CRHR, the California Historic Property Data File, and the lists of California State Historical Landmarks, California Points of Historical Interest, and Archaeological Determinations of Eligibility.

The South Central Coastal Information Center records indicate that 15 cultural resources have been previously recorded within 0.5 miles of the Project site, none of which overlap or are adjacent to the proposed Project site. All 15 resources are historic built environment resources and fall outside the scope of the present study and therefore, will not be addressed in this report. No historic-period or prehistoric archaeological resources were identified within the records search area of the proposed Project site. For additional information see Kry and McDevitt 2022.

2.3 Built Environment Resource Directory

The Built Environment Resource Directory (BERD) files provide information, organized by county, regarding non-archaeological resources in the Office of Historic Preservation (OHP) inventory. The OHP inventory contains information only for built environment resources that have been processed through the office. This includes resources reviewed for eligibility for the NRHP and the California Historical Landmarks programs through federal and state environmental compliance laws, and resources nominated under federal and state registration programs. The BERD replaces the former Historic Properties Directory that previously provided evaluation status information for resources processed through the OHP.

Dudek accessed the San Bernardino County BERD from the OHP on November 8, 2022. All properties within the Project site were searched in the online BERD. The results showed that none of the properties located within the study area are listed in BERD and therefore they have not been previously evaluated.

2.4 Building Development and Archival Research

Building development and archival research were conducted for the Project site in an effort to establish a thorough and accurate historic context for the evaluations of significance, and to confirm the building development history of the Project site and associated parcels.

San Bernardino County Assessor

Dudek obtained the PIMS (Property Information Management System) report for the Project site on November 16, 2022, which provided information about construction dates and current owners for the subject properties discussed in this report. Using this information, Dudek was able to research a chain of ownership for the properties extending back to 1994 for 26530 3rd Street (Parcel 1), 1991 for 26540 3rd Street (Parcel 2), and 1973 for 26562 3rd Street (Parcel 3).

ParcelQuest

On November 8, 2022, ParcelQuest was used to access San Bernardino County Assessor information about the parcels located on the Project site. Information regarding dates of construction and current owners' names, if noted, were used in the preparation of the evaluations of significance and historic context.

San Bernardino County Digital Library

Dudek borrowed several books and researched historical photographs available from the San Bernardino County Digital Library. All available information obtained from the library was used in the preparation of the historic context and evaluations of significance for the subject properties.

Historical Newspaper Review

Dudek reviewed historical newspapers from the City of Highland and surrounding cities in an effort to understand the development of the City of Highland, the Project site, and the subject properties at 26530 3rd Street (Assessor's Parcel Number [APN] 1192-551-04), 26540 3rd Street (APN 1192-551-05), and 26562 3rd Street (APN 1192-551-07). These documents were used in the preparation of Chapter 3, Historic Context, of this report.

Sanborn Fire Insurance Maps

A review of historical Sanborn Map Company fire insurance maps covering the City of Highland and City of San Bernardino was conducted as part of the archival research effort for the Project site from the following years: 1885, 1887, 1888, 1889, 1891, 1894, 1906, 1907, 1918, 1930, 1950, and 1951. The subject properties do not fall within the mapped area of the two cities or the within the city limits in any of the historic editions. Maps were reviewed for both the City of Highland and the City of San Bernardino to ensure that any potential map that includes the proposed Project site was reviewed.

Historical Aerial Photographs

As part of the archival research effort, a review was conducted of historical aerial photographs via Nationwide Environmental Title Research LLC from the years 1938, 1966, 1968, 1980, 1984, 1985, 1994, 2002, 2005, 2009, 2010, 2012, 2014, 2016, 2018, and 2020 and University of California, Santa Barbara Library Aerial Photography

Information FrameFinder from the years 1930, 1938, 1959, and 1977. Section 3.2, History of the Project Site, provides a discussion of the development of the area surrounding the Project site based on this review (NETR 2022; UCSB 2022).

INTENTIONALLY LEFT BLANK

3 Historic Context

3.1 Historical Overview of the City of Highland

The City of Highland's settlement began in 1856 when John Henry Cram and six of his eight sons established a settlement known as Cramville, located in the northeast section of modern-day subdivision The Village Lakes at 5th Street and Orange Street. Cram and his family were the first known white settlers in the area. Cram and fellow settler Frederick Van Leuven constructed a ditch in 1858 to bring water from the Santa Ana River to their lands in East Highland. The ditch ran from City Creek into the present site of the City of Highland. In 1857, Henry Rabel, a German immigrant, purchased 40 acres along what is now Base Line Street, west of Victoria Avenue. Rabel purchased 80 additional acres in 1859, which became Rabel Springs, so named for the large pond and natural thermal wells located on the land. Rabel capitalized on the medicinal quality of the springs and constructed bathhouses and an 11-room hotel for tourists. The area became popular as a recreation spot and in 1887, Harlem Springs was developed east of Victoria Avenue. Harlem Springs included a swimming pool, bathhouses, an entertainment hall, and picnic grounds. This led to multiple civic improvements, including the area's first County road in 1860, Santa Ana Canyon Road (now West 5th Street) (Beattie 1994, 2004; San Bernardino Public Library 2022).

The area that became the City of Highland was developed as separate settlements. This included Messina in 1873 at Base Line Avenue and Palm Avenue. Messina's location was approximately the midpoint of the emerging towns and as a result, it became the commercial center. Buildings were constructed for private businesses, soon followed by a post office and grocery store. The first school district was formed in Cramville in 1869 and with its rising population, Messina formed a district named Highland soon after. This was the first formal use of the name Highland. Before this, the whole area was referred to as the Highlands because of the altitude and proximity to the foothills of the San Bernardino Mountains. In 1885, the Santa Fe Railroad (California Southern Railway) constructed a new line through the Cajon Pass, connecting San Bernardino to the rest of the state. Rail line expansion began soon after, with prominent people in Redlands raising $42,750 to purchase rights-of-way and depot grounds connecting San Bernardino to Redlands, which was soon expanded to Mentone. Local railroad officials thought a loop from Mentone back to San Bernardino would be most efficient by way of the present-day City of Highland. Although the community was not yet officially incorporated as a city, the name "Highland" was used for the train depot and became the preferred identifier for the community. In January 1892, the loop of the "Kite Shaped Track" was finished as a 158-mile-long figure 8 from the Santa Fe yards in Los Angeles east to Mentone and back. The line offered both freight and passenger services and opened San Bernardino County for more land development and settlement (Beattie 1994, 2004).

The presence of the railroad not only brought more people to the area but new industries and commercial opportunities as well. By the early 1880s, agricultural development was increasing with the planting of citrus orchards throughout Highland and San Bernardino County. Citrus was considered a high-value crop and required well-drained upland soils. This led to the construction of the North Fork Ditch in 1881, which diverged from the Cram–Van Leuven Ditch and ran west along the mountains. The dependable water supply stimulated agricultural development and production. Citrus groves were present in the area starting in 1857, but it was not until the Washington navel orange was introduced in 1873 that citrus farming became the leading industry. Between 1881 and 1892, over a thousand acres of citrus were planted in Highland. The railroad also brought the fruit packing and lumber industries to the area; meanwhile, the area remained dependent on the citrus industry (McAvoy 2000, p. 2).

At the turn of the twentieth century, Highland's growth had accelerated with the construction of a library, community hall, packing houses, a new business building on Palm Avenue, and many new residences. Highland and downtown San Bernardino were connected in 1903 with the establishment of the Bernardino Valley Traction Company's electric railway line. The local economy, still dependent on the citrus industry, fluctuated based on how well the industry did. In 1913, a freeze hit Southern California, killing many citrus trees and resulting in an economic depression that lasted several years (McAvoy 2000, p. 4).

The 1920s brought multiple changes to the town, including the construction of more packing houses and the Zimmerman Addition, which added the area north of the Santa Fe right-of-way to Highland's territory. A series of disasters hit the area in the 1930s, including multiple fires that destroyed packing houses and the Highland Orange Association building. By this time Highland's identity as a closely knit citrus community began to change due to outside influences. The popularity of the automobile led to fewer people using the railroads for passenger travel. In July 1936, Pacific Electric discontinued passenger service on the Highland branch line (McAvoy 2000, pp. 4–5).

The 1940s brought a period of change to the area, including suburbanization, with citrus groves replaced by housing tracts. As the United States entered World War II, the U.S. Army Air Corps established a training center just south of the present-day City in 1941. Following the attack on Pearl Harbor, the training center's role shifted and it became a fighter plane mobilization point to defend the City of Los Angeles in the event of an attack. In 1942, the training center was named San Bernardino Army Airfield. After the war, in 1950, it was renamed Norton Air Force Base (Beattie 1994, 2004; McAvoy 2000, p. 5).

After World War II, a postwar population boom affected not only Highland but much of the Los Angeles Basin, resulting in citrus packing houses closing because of losing their supporting orchards to suburban development. Packing houses were converted to light industrial uses as housing tracts continued to replace the citrus groves. The Pacific Electrical Railway discontinued service in 1953, resulting in the removal of its tracks. The Santa Fe Railroad eventually followed suit, abandoning its Highland line in the early 1980s (Beattie 1994, 2004; McAvoy 2000, p. 5).

In the 1980s the Highland Chamber of Commerce pushed for the formation of the City of Highland, which was incorporated on November 24, 1987. The City area included 32,300 acres, with a population of approximately 34,439 in 1990. In 1994, San Bernardino Army Airfield closed and was redeveloped into the San Bernardino International Airport. By 2000, Highland had been transformed from a small agricultural town to a city surrounded by a large urban area. The City's population in 2010 was recorded at 53,104, a 19% increase from 2000. The City is generally divided into two regions by State Route (SR) 210, East Highland, and Highland (Beattie 1994, 2004; McAvoy 2000, p. 5).

3.2 History of the Project Site

The Project site is located in the City of Highland to the west of SR-210 in a neighborhood called Cypress. In the first available aerial photographs of the Project site, from 1930 and 1938, the surrounding area along Victoria Avenue and 3rd Street is dominated by widely dispersed residential properties, undeveloped land, and agricultural land. The Project site appears predominantly as open, undeveloped land with a natural watercourse to the southeast. The agricultural use throughout Highland remained relatively unchanged until the 1950s, which brought a period of suburbanization as citrus groves were replaced by housing tracts to the north of the Project site. Approximately 0.3 miles south of the Project site, south of 3rd Street, was the development of San Bernardino International Airport. By the late 1970s, the majority of the open lots and agricultural land were redeveloped with residential housing tracts (Exhibit 1). The Project site has remained largely open, with residences that line

3rd Street, open land to the east and west, and a water tower and development of industrial warehouses located south of 3rd Street (NETR 2022; UCSB 2022).

As part of the archival research effort, historic aerial photographs were reviewed. Table 2 provides a description of the overall development of the neighborhoods surrounding the Project site based on this review (NETR 2022; UCSB 2022).

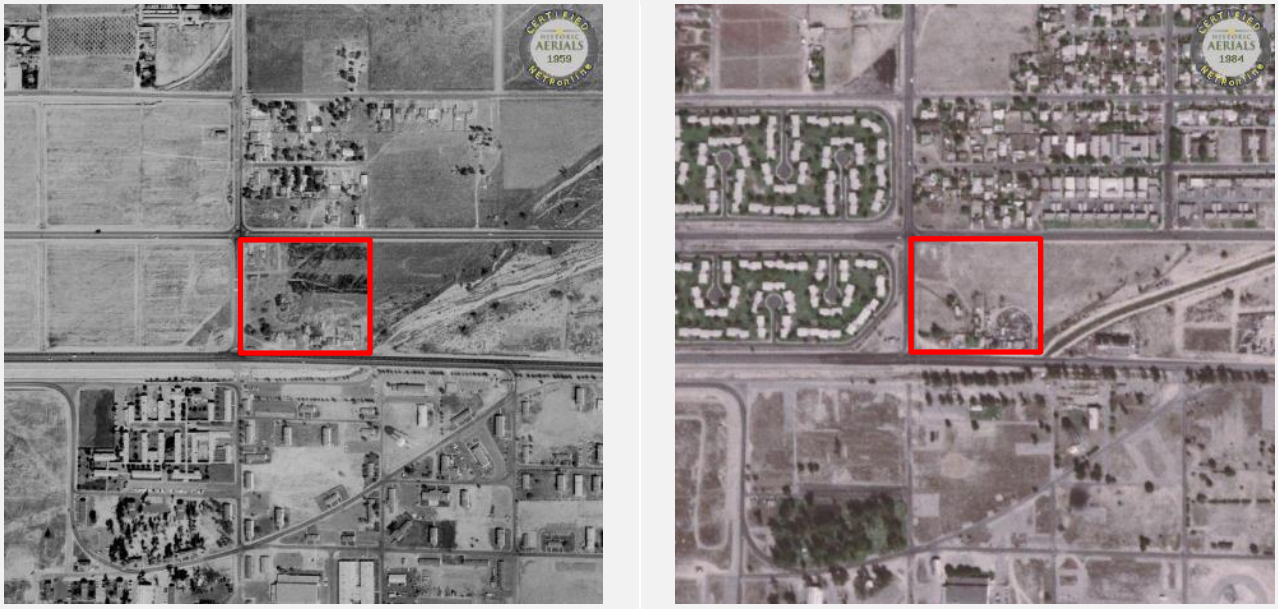

Table 2. Historical Aerial Photograph Review of Project Site

Photograph Year	Observations and Findings
1930	This is the earliest aerial photograph of the Project site. The Project site appears to be undeveloped land at the corner of Victoria Avenue and 3rd Street. Surrounding the Project site are open fields and agricultural land to the north. The majority of the surrounding lots are open and undeveloped. Both Victoria and 3rd Street do not appear to be paved.
1938	The 1938 aerial displays the Project site as undeveloped. A natural watercourse bisects the southeastern section of the Project site. The surrounding area is largely undeveloped, with a few residences northwest of the Project site.
1959	By 1959, all three parcels along 3rd Street within the Project site appear developed. Parcel 1 is developed with a single-family residence. Parcel 2 is developed with a one-story commercial building. Parcel 3 is developed with a single-family residence and three ancillary buildings. There are two additional residences on the Project site located in the northwest corner of the site, and one in the middle of the site, north of Parcels 1, 2, and 3. The surrounding area is undeveloped to the east and west of the site. An increase in residential development occurs to the north of the site. A water tower and airport appear south of 3rd Street, 0.3 miles south of the Project site. 3rd Street appears paved and more established than in the 1938 image.
1966	The image is of too poor a quality to decipher any changes to the Project site. Surrounding the Project site, development continues to the north. South of the site remains undeveloped surrounding the airport.
1968	The 1968 aerial displays an addition to the north and south elevations of the residence on Parcel 1 and an addition to the north elevation of the commercial building on Parcel 2. The buildings on Parcel 3 display no discernible changes. Residential development continues north of the Project site.
1977	The image is of too poor a quality to decipher any changes to the Project site. Surrounding the Project site, development continues to the north. A large-scale residential development appears west of the Project site. The watercourse southeast of the site appears channelized.
1980	The 1980 aerial displays additions to the southwest corner of the residence on Parcel 1 with a hipped roof projection, an addition to the north and west elevations of the commercial building on Parcel 2, and an addition to the east elevation of one of the ancillary buildings of Parcel 3. The surrounding neighborhoods to the north appear more densely developed with single-family residences.
1984	No discernible changes to the Project site and surrounding area.
1985	No discernible changes to the Project site and surrounding area.
1994	The 1994 aerial displays the demolition of one of the residences at the northwest corner of the Project site. There are no other noticeable changes to Parcels 1, 2, and 3. The surrounding neighborhood appears relatively similar to the 1985 image, with some increase in development to the south.

Table 2. Historical Aerial Photograph Review of Project Site

Photograph Year	Observations and Findings
2002	The image is of too poor a quality to decipher any changes to the Project site. No discernible changes to the surrounding area.
2005	The 2005 aerial displays the residence on Parcel 1 with red clay tiles on the roof of the southwest corner hipped roof projection. The building on Parcel 2 appears reroofed with red clay tiles. No other discernible changes to the Project site or the surrounding area were made.
2009	The 2009 aerial shows further changes made to the roof of the building on Parcel 2. The residential building footprint of Parcel 1 has grown larger on the east elevation. No other changes are indicated on the Project site. The large-scale residential development west of the Project site has been demolished.
2010	The 2010 aerial displays an alteration on the east elevation of one of the ancillary buildings on Parcel 3. There are no other discernible changes to the Project site and surrounding area.
2012	No discernible changes to the Project site and surrounding area.
2014	The 2014 aerial shows an alteration to the south elevation of the residence on Parcel 1. No other discernible changes to the Project site and surrounding area.
2016	The 2016 aerial shows that the other residence located in the middle of the Project site north of Parcels 1, 2, and 3 has been demolished. No other discernible changes to the Project site and surrounding area.
2018	No discernible changes to the Project site and surrounding area.
2020	No discernible changes to the Project site. An industrial warehouse has been developed to the southwest of the site.

Exhibit 1. Historic aerial comparison of the Project site from 1959 (left) and 1984 (right), with the Project site outlined in red

Source: NETR 2022, 1959 and 1984.

Parcel 1: 26530 3rd Street

There is a single-family residence currently on Parcel 1: 26530 3rd Street (APN 1192-551-04). According to the San Bernardino County Assessor, the residence was constructed in 1948. The property has been used for residential to commercial uses since its construction. The earliest available newspaper article for the property is from 1958 and advertises it as Lambert's Cleaners laundry service. Archival research yielded little information regarding Lambert's Cleaners. By 1968, historic aerials show an addition to the north and south elevations of the building. By 1974, the property appeared to be a residence, as corroborated by a local newspaper article that indicates Daniel Seasholtz resided there. By 1980, historic aerial images indicate an addition was made to the southwest corner of the building, with a hipped roof projection. The property changed use from the Seasholtz residence to a commercial business in 1983. It was advertised in local newspapers as Parker's Air Conditioning and Heating. Historic newspaper research yielded no additional information regarding Parker's Air Conditioning and Heating. The building underwent multiple alterations and additions over the years. By 2005, historic aerial images indicate the hipped roof projection at the southwest corner of the building had been reroofed with red clay tiles. By 2009, the building's footprint had expanded along the east elevation. By 2014, an alteration had taken place on the south elevation of the building (SBCS 1958, p. 3; 1974, p. 8; 1983, p. 19; NETR 2022; UCSB 2022).

Mr. Seasholtz was the first known resident of the building on Parcel 1. He resided at the property in 1974. Before 1974, and between 1974 and 1994, the owner and residents of the property are unknown. The next known owners of the property were Jack and Fern Patrick, who purchased the property in 1994. In 1998, Stanton and Joyce Weber purchased the property and remained owners until 2003, when Kimberley Zilke and Patrick Grove took ownership. In 2005, Hanhsing Li bought the property and remained the sole owner until 2022, when Patriot USICVI 5th Street LLC took ownership of the property. Archival research yielded no substantial information regarding Mr. Seasholtz,

Mr. and Ms. Patrick, Mr. and Ms. Weber, Ms. Zilke, Mr. Grove, or Hanhsing Li. The property's use has changed from commercial to residential over the years. Table 3 lists the ownership history information available from the San Bernardino County Recorder-Clerk's office between 1974 and 2022 (San Bernardino County Assessor 2022a; SBCS 1958, p. 3; 1974, p. 8; NETR 2022; UCSB 2022).

Table 3. List of Ownership for 26530 3rd Street

Years Owned	Name	Acquisition Date	Document Number
1974–1994	Daniel Seasholtz	Unknown	Unknown
1994–1998	Jack and Fern Patrick	None	9448115200000
1998–2003	Stanton and Joyce Weber	None	9812527800000
2003–2005	Kimberley Zilke and Patrick Grove	01/31/2003	20030063956
2005–2022	Hanhsing Li	10/05/2005	20050746430
2022–present	Patriot USICVI 5th Street LLC	08/17/2022	20220282901

Source: San Bernardino County 2022.

Parcel 2: 26540 3rd Street

There is one commercial building currently on Parcel 2: 26540 3rd Street (APN 1192-551-05), which was built in 1948 according to the San Bernardino County Assessor and confirmed in historic aerial photographs from 1938 and 1959. The 1968 historic aerial image shows an addition to the north elevation of the building. In 1980, an addition had taken place to the north and west elevations. In 2005, the building had been reroofed with red clay tiles. In 2009, further alterations to the roof had taken place (NETR 2022; UCSB 2022).

Archival research revealed no information regarding the original owners of the property. In 1957, the property was advertised in local newspapers as a café for lease, a "restaurant ready for operation" (SBCS 1957, p. 20). In 1976, Sherry Lane Jackson had a fictitious business at 26540 3rd Street called "Rollin' Guitars" (SBCS 1976, p. 27). Historic newspaper research revealed no information about Ms. Jackson. In 1977, the property was advertised as "Sarge's" and was sold to George E. Gibson and Josephine P. Gibson to run their business, "Gibson's Innlocated" (SBCS 1977, p. 26; 1978, p. 38). Archival research yielded no information regarding Sarge's or Gibson's Innlocated. In 1978, Bonnie B. Thomas purchased the property from the Gibsons. No information regarding Bonnie. B. Thomas was found. In 1988, the property was advertised again as "Sarge's," with an advertisement looking for a bartender for the restaurant (SBCS 1988, p. 37). After 1988, the property became Las Potrillas Bar/Cantina and Nightclub. The owner of the property between 1978 and 1991 is unknown. Magdalena Mitchelle purchased the property in 1991. Historic newspaper research yielded no substantial information regarding Ms. Mitchelle. Additionally, historic research yielded no substantial information regarding any of the following owners of the property between 1999 and 2022: Mr. and Mrs. Haro, Ms. Galicia, Ms. Lopez, Mr. Kaminski, Ms. Kaminski, Ms. Gaitan-Hahn, Morley Family Trust, Jeffrey A. Abraham Living Trust, or Hanhsing Li. Table 4 lists the ownership history information available from the San Bernardino County Recorder-Clerk's office between 1991 and 2022 (San Bernardino County Assessor 2022b; SBCS 1978, p. 38; NETR 2022; UCSB 2022).

Table 4. List of Ownership for 26540 3rd Street

Years Owned	Name	Acquisition Date	Document Number
1991–1999	Magdalena Mitchelle	None	9125216400000
1999–2004	Jose and Israel A. Haro	11/30/1999	19990491166
2004–2006	Arcelia Galicia	03/30/2014	20040216094
2006–2015	Maria E. Lopez	06/30/2006	20060447423

Parcel 3: 26562 3rd Street

There is one house and two ancillary buildings currently on Parcel 3: 26562 3rd Street (APN 1192-551-07), which was built in 1940 according to the San Bernardino County Assessor and confirmed in historic aerial photographs from 1938 and 1959. The 1980 historic aerial image shows an addition to the east elevation of one of the ancillary buildings. In 1980, an alteration had also taken place to the east elevation of that same building. Until 2022, Parcel 3 included a residence and three ancillary buildings. However, in 2022, per visual analysis during the intensive-level survey, one of the ancillary buildings had been destroyed by fire, and the ancillary building west of that had experienced fire damage as well. The first known owners of the property were the Parker Family Trust in 1973. Historic newspaper research yielded no substantial information regarding the Parker Family Trust. According to the San Bernardino County Recorder-Clerk's office, the family owned the property until 2007. Historic research yielded no substantial information regarding the property owners from 2007 to 2022, Mr. Villarruel and Ms. Zacarias. Table 5 lists the ownership history information available from the San Bernardino County Recorder-Clerk's office between 1973 and 2022 (San Bernardino County Assessor 2022c; NETR 2022; UCSB 2022).

4 Field Survey

4.1 Methods

Dudek architectural historians Kate Kaiser, MSHP, and Caitlin Greeley, MA, conducted an intensive survey of the Project site on November 7, 2022. Both Ms. Kaiser and Ms. Greeley meet the Secretary of the Interior's Professional Qualifications Standards for architectural history. The survey entailed walking around the building exteriors along 3rd Street and Victoria Avenue, documentation with notes and photographs from the public right-of-way, specifically noting character-defining features, spatial relationships, observed alterations, and examining any historic landscape features on the properties.

4.2 Field Survey

Ten parcels and 7.23 acres were surveyed for the 5th Street and Victoria Avenue Warehouse Project. Properties surveyed fell into three categories: vacant and undeveloped, historic-age built environment resources, and non-historic-age built environment properties.

Seven of the parcels surveyed are vacant properties or non-historic-age built environment properties and were fully accessible and visible from the public right-of-way, including Parcel 4: APN 1192-551-06 (constructed 2017), Parcel 5: APN 1192-551-12 (vacant), Parcel 6: APN 1192-551-13 (vacant), Parcel 7: APN 1192-551-14 (vacant), Parcel 8: APN 1192-551-15 (vacant), Parcel 9: APN 1192-551-02 (vacant), and Parcel 10: APN 1192-551-01 (vacant).

Three properties, Parcel 1: 26530 3rd Street (APN 1192-551-04), Parcel 2: 26540 3rd Street (APN 1192-551-05), and Parcel 3: 26562 3rd Street (APN 1192-551-07), are developed with built environment resources over 45 years old and were identified as requiring recordation and evaluation for historical significance. They are described and evaluated for historical and architectural significance in Chapter 5, Significance Evaluation.

Properties Evaluated

- Parcel 1, 26530 3rd Street (APN 1192-551-04), one residential building constructed circa 1948
- Parcel 2, 26540 3rd Street (APN 1192-551-05), one commercial building constructed circa 1948
- Parcel 3, 26562 3rd Street (APN 1192-551-07), one residential building and two ancillary buildings constructed circa 1940

4.3 Built Environment Field Survey Result

Project Site Description

The Project site is located at the northeast corner of East 3rd Street and Victoria Avenue on three parcels: 26530 3rd Street (APN: 1192-551-04-00; Parcel 1), 26540 3rd Street (APN: 1192-551-05-00; Parcel 2), and 26562 3rd Street (APN: 1191-551-07-00; Parcel 3). The Project site includes 10 parcels in total but only these three are developed with built environment resources over 45 years old and were identified as requiring a detailed description. The majority of the Project site is open. The Project site is square. The north half of the Project site is open and undeveloped. Parcel 1 and Parcel 2 are located on the southwest corner of the Project site, surrounded by a 6-foot-

tall chain-link fence along its southern, western, and northern boundaries. Parcel 1, in the southwestern corner of the Project site, is developed with one residential building constructed in 1948 (ParcelQuest 2022) (see Exhibit 2). Parcel 2 is east of Parcel 1 and developed with a nightclub constructed in 1948 (ParcelQuest 2022) (see Exhibit 3). Parcel 3 is east of Parcel 2 (see Exhibits 4 and 5). Parcel 3 is developed with one residential building constructed in 1940, one garage, and one partially burned-down shed (ParcelQuest 2022). Parcel 3 is relatively square, with wood posts that dot the perimeter of the property that appear to have experienced a fire. A rectangular concrete foundation is in the southeastern corner of the Project site on Parcel 3. Surrounding the Project site is vacant land to the west, undeveloped land to the north, a warehouse to the south, and an auto repair shop to the east.

Parcel 1: 26530 3rd Street

The building located on Parcel 1 is a single-family residence that is irregular in plan and one story in height (see Exhibit 2). The building is utilitarian, with no architectural style and a flat roof with a combination of materials, including a hipped roof projection with red clay tiles on the west and south elevations. Its exterior walls are clad in stucco. Fenestration on the primary (south) elevation includes an irregular arrangement of vinyl replacement windows and a replacement vinyl door. All other elevations were obscured by a fence that surrounds the property.

Identified Alterations

The following list of known alterations to the single-family residence on Parcel 1 was compiled through archival research and during the course of the intensive survey:

- Unknown date – Replacement door, south elevation
- Unknown date – Replacement windows, all elevations
- Unknown date – Plywood window surrounds, south, and east elevations
- Unknown date – Metal security bars, south elevation
- Circa 1968 – Addition to the north and south elevations (NETR 2022)
- Circa 1980 – Addition to the southwest corner with hipped roof projection (NETR 2022)
- Circa 2005 – Reroofing of hipped roof projection at the southwest corner with red clay tiles (NETR 2022)
- Circa 2014 – Alteration to south elevation (NETR 2022)

Parcel 2: 26540 3rd Street

The building located on Parcel 2, Las Potrillas Bar/Cantina and Nightclub, is L-shaped in plan and one story in height (Exhibit 3). The building is utilitarian, with no architectural style, with a flat roof at the south half and a shed roof at the north half of the building. The building's exterior walls are clad in stucco. The building's main (south) elevation displays a raised, flat parapet lined with red clay tiles. The building lacks window fenestration openings. The east elevation displays a replacement door under an addition of a shingled awning.

Identified Alterations

The following list of known alterations to the nightclub on Parcel 2 was compiled through archival research and during the course of the intensive survey:

- Unknown date – Replacement door, east elevation
- Unknown date – Reroofing of north half of building

- Unknown date – Shingled awning added, west elevation
- Circa 1968 – Addition to north elevation (NETR 2022)
- Circa 1980 – Addition to north and west elevations (NETR 2022)
- Circa 2005 – Reroofing with red clay tiles (NETR 2022)
- Circa 2009 – Alteration to roof (NETR 2022)

Parcel 3: 26562 3rd Street

The Project site's eastern end (Parcel 3) contains a one-story residence, a one-story utilitarian garage, and a one-story utilitarian shed that has been partially destroyed by fire. The residence has an irregular plan with a side-gabled roof and exterior walls clad in stucco (Exhibit 4). The residence is utilitarian, with no architectural style. Fenestration includes an irregular arrangement of aluminum sliding windows on all elevations and replacement doors on the primary and rear elevations. An addition of a metal awning extends out from the side (west) elevation.

East of the residence is a partially destroyed garage with a hipped roof and stucco cladding. The building has a square plan and an irregular arrangement of two garage door openings and one window opening on the primary (south) elevation. Fenestration openings are covered with plywood. East of the garage is a front-gabled, partially destroyed shed with corrugated metal cladding and no fenestration openings present; only structural beams are visible. The shed appears to have been partially destroyed by fire. East of the shed, a rectangular concrete foundation and corrugated metal pieces appear to be remnants of buildings destroyed by fire in 2022 (Exhibit 5).

Identified Alterations

The following list of known alterations to the buildings on Parcel 3 was compiled through archival research and during the course of the intensive survey:

- Unknown date – Replacement doors, south and north elevation
- Unknown date – Replacement windows, all elevations
- Unknown date – Metal awning addition, west elevation
- Unknown date – Reroofing of the residence
- Circa 1980 – Addition to east elevation of garage (NETR 2022)
- Circa 2010 – Alteration to east elevation of garage (NETR 2022)
- Circa 2022 – Fire damage to two ancillary buildings, with one ancillary building destroyed by fire per visual analysis

INTENTIONALLY LEFT BLANK

5 Significance Evaluation

For a property to be listed in or determined eligible for listing in the NRHP, it must be demonstrated to possess integrity and to meet at least one of four criteria. The CRHR was designed to reflect the same criteria and integrity as those identified for the NRHP. Therefore, the NRHP and CRHR significance evaluations are presented together.

5.1 Parcel 1: 26530 3rd Street (APN 1192-551-04)

NRHP/CRHR Evaluation of Significance

The property at Parcel 1: 26530 3rd Street (APN 1192-551-04) does not meet any of the criteria for listing in the NRHP or CRHR, either individually or as part of an existing historic district, as demonstrated below.

Criterion A/1: That are associated with events that have made a significant contribution to the broad patterns of our history.

Archival research of the property at Parcel 1: 26530 3rd Street (APN 1192-551-04) did not find any associations with events that have made a significant contribution to the broad patterns of history. The property was completed in 1948, during a time when Highland was expanding in size and the economy was based on agriculture, primarily dependent on the citrus industry. Despite the property reflecting Highland's growth west of SR-210 during the 1940s, there is no indication that the construction of this specific building marked a pivotal point in the history of the neighborhood or the City. In 1958, the property was advertised in local newspapers as a laundry cleaning business, Lambert's Cleaners. By 1974, the property appears to have changed in use from a commercial building to a residence. Then in 1983, the property appears to have been changed back to commercial uses as Parker's Air Conditioning and Heating. After 1983, the property's function changed again to a residence. The property was never associated with an important aspect of commercial business in the area. In addition, the property was neither the first nor the last single-family residence in the area, as it changed function and followed a continuous pattern of residential development that continued through the 1990s. The property is close to the San Bernardino Airport; however, there is no indication that the property was historically related to the airport or its development. The property is not known to be directly associated with other events that have made a significant contribution to the history of Highland; therefore, the property does not appear eligible under NRHP Criterion A or CRHR Criterion 1.

Criterion B/2: That are associated with the lives of persons significant in our past.

To be found eligible under Criterion B/2, the property has to be directly tied to an important person and the place where that individual conducted or produced the work for which he or she is known. Archival research failed to indicate any such direct association between individuals that are known to be historic figures at the national, state, or local level and the Parcel 1: 26530 3rd Street (APN 1192-551-04) property. The earliest ownership information identified indicated that Daniel Seasholtz owned the property by 1974. Archival research yielded no information regarding Mr. Seasholtz. Before 1974, and between 1974 and 1994, the owner of the property was unknown. Other known owners based on information available from the San Bernardino County Recorder-Clerk's office include Jack and Fern Patrick, Stanton and Joyce Weber, Kimberley Zilke, Patrick Grove, and Hanhsing Li. Research did not reveal any reason to believe that any individuals associated with the property are persons of historic significance.

Due to a lack of identified significant associations with important persons in history, Parcel 1 does not appear eligible under NRHP Criterion B or CRHR Criterion 2.

Criterion C/3: That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction.

The Parcel 1: 26530 3rd Street (APN 1192-551-04) property contains one historic-age building, a single-family residence built in 1948. The 1948 residence does not reflect an architectural style, type, period, or method of construction. The building is substantially altered due to large-scale additions and material alterations to the doors, windows, and roofing. The building no longer can be said to "embody the distinctive characteristics of a type, period, or method of construction." Archival research did not uncover that the building was the work of a master architect or builder. The building also does not possess high artistic value and is not representative of a significant and distinguishable entity whose components may lack individual distinction. Because the building at Parcel 1: 26530 3rd Street (APN 1192-551-04) lacks architectural merit due to numerous alterations and additions, the property does not appear eligible for the NRHP under Criterion C or CRHR under Criterion 3.

Criterion D/4: That have yielded, or may be likely to yield, information important in prehistory or history.

Criterion D was not considered in the evaluation, because it generally applies to archaeological resources. The buildings on Parcel 1: 26530 3rd Street (APN 1192-551-04) are not significant under Criterion D of the NRHP or Criterion 4 of the CRHR as a source, or likely source, of important historical information, nor do they appear likely to yield important information about historic construction methods, materials or technologies.

Integrity Discussion

The Parcel 1: 26530 3rd Street (APN 1192-551-04) property contains one building, which has not been moved or relocated, therefore, the property maintains integrity of location. The Parcel 1 property does not maintain integrity of setting, as the surrounding neighborhood and streetscape have been altered significantly since the 1948 building was constructed. At the time of its construction, the surrounding area was agricultural with sparse, small homesteads. By the 1970s, the majority of these agricultural properties and small residences were replaced with tracts of single-family residential housing; therefore, the property no longer retains integrity of setting. Significant alterations and additions to the building on Parcel 1 have substantially impacted integrity of design, materials, and workmanship. The property no longer retains integrity of feeling due to numerous alterations to the building on the property, changes in use, and the loss of its original agricultural setting. Parcel 1 can no longer convey its historic sense of a particular period. Finally, the Parcel 1 property does not have any historical associations with people or events and therefore it does not have integrity of association. Therefore, the Parcel 1: 26530 3rd Street (APN 1192-551-04) property does not retain integrity.

City of Highland Statement of Significance

The Parcel 1: 26530 3rd Street (APN 1192-551-04) property does not meet any of the criteria for listing by the City of Highland, as demonstrated below.

A ***It exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history.***

As discussed in NRHP/CRHR Criterion A/1, archival research did not discover that the Parcel 1 property was related to historical events significant to the City of Highland and does not reflect special elements of the City's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history.

B ***It is identified with persons or events significant in local, state, or national history.***

As discussed in NRHP/CRHR Criterion B/2, archival research did not discover that the Parcel 1 property was the location of any significant historical events or associated with an important person in the City of Highland, California, or United States.

C ***It embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship.***

As discussed in NRHP/CRHR Criterion C/3, the building identified on Parcel 1 does not exemplify a particular architectural style, type, or period of construction important to the City. The historic-age building has been significantly altered and there are better, more intact examples of buildings from the late 1940s throughout the City. Additionally, due to the date of construction of the building on the property (1948), it is unlikely to be a valuable example of the use of indigenous materials or craftmanship.

D ***It is representative of the work of a notable builder, designer, or architect.***

As discussed in NRHP/CRHR Criterion C/3, archival research did not uncover that the building on Parcel 1 was identified with a builder, designer, or architect whose work could be considered notable within the City of Highland.

E ***It contributes to the significance of an historic area, being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development.***

Parcel 1 does not contribute to the significance of a historic area nor is it thematically related to a group of properties that contribute to each other and are unified aesthetically. The area surrounding Parcel 1 has been altered significantly since the construction of the 1948 building. At the time of its construction, the surrounding area was agricultural with small, widely dispersed homesteads. By the 1970s, the majority of these agricultural properties and small residences were replaced with tracts of single-family residential housing. The historic area that Parcel 1 originally was a part of is no longer extant.

F ***It has a unique location or singular physical characteristics or is a view or vista representing an established and familiar visual feature of a neighborhood, community, or the city of Highland.***

The building on Parcel 1 does not present a unique location or singular physical characteristics, nor is the property a view or vista representing an established and familiar visual feature of a neighborhood, community, or the City of Highland. The building on the property has been heavily altered and therefore does not possess unique characteristics. Additionally, the property does not display a view or vista establishing a familiar visual feature due to multiple changes in use, alterations, and new additions to the building on the property.

G ***It embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation.***

As discussed in NRHP/CRHR Criterion C/3, the building on Parcel 1 has substantial material alterations and additions, and no longer embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation.

H ***It is similar to other distinctive properties, sites, areas, or objects based on a historic, cultural, or architectural motif.***

Parcel 1 does not possess similar characteristics to properties, sites, areas, or objects based on a historic, cultural, or architectural motif. Due to multiple large-scale alterations and additions to the building on the property since its construction, there are no distinctive characteristics that can relate it to other properties within the City of Highland.

I ***It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning.***

The building on Parcel 1 does not reflect significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning. Due to multiple large-scale alterations and additions to the building on the property since its construction, it can no longer be associated with different eras of settlement and growth in the City of Highland.

J ***It is one of the few remaining examples in the city, region, state, or nation possessing distinguishing characteristics of an architectural or historical type of specimen.***

Parcel 1 does not represent one of the few remaining examples in the city, region, state, or nation possessing distinctive characteristics of an architectural historical type of specimen. The building on the property has undergone multiple large-scale alterations and additions, and therefore no longer possesses distinctive characteristics of such a type.

5.2 Parcel 2: 26540 3rd Street (APN 1192-551-05)

NRHP/CRHR Evaluation of Significance

The Parcel 2: 26540 3rd Street (APN 1192-551-05) property does not meet any of the criteria for listing in the NRHP or CRHR, either individually or as part of an existing historic district, as demonstrated below.

Criterion A/1: That are associated with events that have made a significant contribution to the broad patterns of our history.

Archival research of the property at Parcel 2: 26540 3rd Street (APN 1192-551-05) did not find any associations with events that have made a significant contribution to the broad patterns of history. The property was completed in 1948, during a time when Highland was expanding in size and the economy was based on agriculture, primarily dependent on the citrus industry. Despite the property reflecting Highland's growth west of SR-210 during the

1940s, there is no indication that the construction of this specific building marked a pivotal point in the history of the neighborhood or city. In the 1950s, the property was advertised in local newspapers as a café for lease. After the 1950s, the property was used as Sarge's restaurant. In 1977, the property was advertised as "Sarge's," and was sold to George E. Gibson and Josephine P. Gibson to run their business, "Gibson's Innlocated." Then at an unknown date after 1988, the property became Las Potrillas Bar/Cantina and Nightclub. The property was neither the first nor the last commercial building in the area and followed a continuous pattern of development. The property is located close to the San Bernardino Airport; however, there is no indication that the property was historically related to the airport or its development. The property is not known to be directly associated with any other events that have made a significant contribution to the history of Highland; therefore, the property does not appear eligible under NRHP Criterion A or CRHR Criterion 1.

Criterion B/2: That are associated with the lives of persons significant in our past.

To be found eligible under Criterion B/2, the property has to be directly tied to an important person and the place where that individual conducted or produced the work for which he or she is known. Archival research failed to indicate any such direct association between individuals that are known to be historic figures at the national, state, or local level and the Parcel 2: 26540 3rd Street (APN 1192-551-05) property. The earliest ownership information identified indicated that Sherry Lane Jackson owned the property by 1976. Archival research yielded no information regarding Ms. Jackson. The following year, in 1977, the property was sold to George E. Gibson and Josephine P. Gibson. The Gibsons sold the property to Bonnie B. Thomas in 1978. No historic information regarding Mr. or Mrs. Gibson or Ms. Thomas was found. The property's owners between 1978 and 1991 are unknown. Other known owners based on information available from the San Bernardino County Recorder-Clerk's office include Magdalena Mitchelle, Jose and Israel A. Haro, Arcelia Galicia, Maria E. Lopez, Greg Kaminski, Susan Kaminski, Patricia Gaitan-Hahn, Morley Family Trust, Jeffrey A. Abraham Living Trust, Agustin J. Dorado, and Hanhsing Li. Research did not reveal any reason to believe that any individuals associated with the property are persons of historic significance. Due to a lack of identified significant associations with important persons in history, Parcel 2 does not appear eligible under NRHP Criterion B or CRHR Criterion 2.

Criterion C/3: That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction.

The Parcel 2: 26540 3rd Street (APN 1192-551-05) property contains one historic-age building, a commercial building built in 1948. The 1948 building does not possess the character-defining features of an architectural style. The building is substantially altered due to large-scale additions and material alterations to the doors and roofing. The building no longer can be said to "embody the distinctive characteristics of a type, period, or method of construction." Archival research did not uncover that the building was the work of a master architect or builder. The building also does not possess high artistic value and is not representative of a significant and distinguishable entity whose components may lack individual distinction. Because the building at Parcel 2: 26540 3rd Street (APN 1192-551-05) lacks architectural merit due to numerous alterations, the property does not appear eligible for the NRHP under Criterion C or the CRHR under Criterion 3.

Criterion D/4: That have yielded, or may be likely to yield, information important in prehistory or history.

Criterion D was not considered in the evaluation, because it generally applies to archaeological resources. The building on Parcel 2: 26540 3rd Street (APN 1192-551-05) is not significant under Criterion D of the NRHP or Criterion 4 of the CRHR as a source, or likely source, of important historical information nor does it appear likely to yield important information about historic construction methods, materials, or technologies.

Integrity Discussion

The Parcel 2: 26540 3rd Street (APN 1192-551-05) property contains one building, which has not been moved or relocated; therefore, the property maintains integrity of location. The Parcel 2 property does not maintain integrity of setting, as the surrounding neighborhood and streetscape have been altered significantly since the 1948 building was constructed. At the time of its construction, the surrounding area was agricultural, with small, widely dispersed homesteads. By the 1970s, the majority of these agricultural properties and small residences were replaced with tracts of single-family residential housing; therefore, the property no longer retains integrity of setting. Significant alterations to the building on Parcel 2 have substantially impacted integrity of design, materials, and workmanship. The property no longer retains integrity of feeling due to numerous alterations to the building on the property and the loss of its original agricultural setting. Parcel 2 can no longer convey its historic sense of a particular period. Finally, the Parcel 2 property does not have any historical associations with people or events; therefore, it does not have integrity of association. Therefore, the Parcel 2: 26540 3rd Street (APN 1192-551-05) property does not retain integrity.

City of Highland Statement of Significance

The Parcel 2: 26540 3rd Street (APN 1192-551-05) property does not meet any of the criteria for listing by the City of Highland, as demonstrated below.

A ***It exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history.***

As discussed in NRHP/CRHR Criterion A/1, archival research did not discover that the Parcel 2 property was related to historical events significant to the City of Highland and does not reflect special elements of the City's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history.

B ***It is identified with persons or events significant in local, state, or national history.***

As discussed in NRHP/CRHR Criterion B/2, archival research did not discover that the Parcel 2 property was the location of any significant historical events or associated with an important person in the City of Highland, California, or United States.

C ***It embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship.***

As discussed in NRHP/CRHR Criterion C/3, the building identified on Parcel 2 does not exemplify a particular architectural style, type, or period of construction important to the City. The historic-age building is significantly altered and there are better, more intact examples of buildings from the late 1940s

throughout the City. Additionally, due to the date of construction of the building on the property (1948), it is unlikely to be a valuable example of the use of indigenous materials or craftsmanship.

D ***It is representative of the work of a notable builder, designer, or architect.***

As discussed in NRHP/CRHR Criterion C/3, archival research did not uncover that the building on Parcel 2 was identified with a builder, designer, or architect whose work could be considered notable within the City of Highland.

E ***It contributes to the significance of an historic area, being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development.***

Parcel 2 does not contribute to the significance of a historic area nor is it thematically related to a group of properties that contribute to each other and are unified aesthetically. The area surrounding Parcel 2 has been altered significantly since the construction of the 1948 commercial building. At the time of its construction, the surrounding area was agriculturally based with small, widely dispersed homesteads. By the 1970s, the majority of these agricultural properties were replaced with tracts of single-family residential housing. The historic area that Parcel 2 originally was a part of is no longer extant.

F ***It has a unique location or singular physical characteristics or is a view or vista representing an established and familiar visual feature of a neighborhood, community, or the city of Highland.***

The building at Parcel 2 does not present a unique location or singular physical characteristics, nor is the property a view or vista representing an established and familiar visual feature of a neighborhood, community, or the City of Highland. The building on the property has been altered and therefore does not possess unique characteristics. Additionally, the property does not display a view or vista establishing a familiar visual feature due to new additions to the building on the property.

G ***It embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation.***

As discussed in NRHP/CRHR Criterion C/3, the Parcel 2 property has substantial additions and material alterations and no longer embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation.

H ***It is similar to other distinctive properties, sites, areas, or objects based on a historic, cultural, or architectural motif.***

Parcel 2 does not possess similar characteristics to other properties, sites, areas, or objects based on a historic, cultural, or architectural motif. Due to large-scale additions and alterations to the building on the property since its construction, there are no distinctive characteristics that can relate it to other properties within the City of Highland.

I *It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning.*

The building at Parcel 2 does not reflect significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning. Due to large-scale additions and alterations to the building on the property since its construction, it can no longer be associated with different eras of settlement and growth in the City of Highland.

J *It is one of the few remaining examples in the city, region, state, or nation possessing distinguishing characteristics of an architectural or historical type of specimen.*

Parcel 2 does not represent one of the few remaining examples in the city, region, state, or nation possessing distinctive characteristics of an architectural historical type of specimen. The building on the property has undergone large-scale alterations and additions, and therefore no longer possesses distinctive characteristics of such a type.

5.3 Parcel 3: 26562 3rd Street (APN 1192-551-07)

NRHP/CRHR Statement Evaluation of Significance

The property at Parcel 3: (26562 3rd Street (APN 1192-551-07) does not meet any of the criteria for listing in the NRHP or CRHR, either individually or as part of an existing historic district, as demonstrated below.

Criterion A/1: That are associated with events that have made a significant contribution to the broad patterns of our history.

Archival research of the property at Parcel 3: 26562 3rd Street (APN 1192-551-07) did not find any associations with events that have made a significant contribution to the broad patterns of history. The property was completed in 1940, when Highland was experiencing suburbanization, with agricultural land replaced with housing tracts, especially with the construction of the Norton Air Force Base located to the south of Parcel 3. Despite the property reflecting Highland's growth west of SR-210 in the 1940s, there is no indication that the construction of this specific residence marked a pivotal point in the history of the neighborhood or City. Although the property is located close to the San Bernardino Airport, there is no indication that the property was historically related to the airport or its development. Additionally, the property was neither the first nor the last constructed in the area, and was merely following a continuous pattern of residential development that continued through the 1990s. The property is not known to be directly associated with events that have made a significant contribution to the history of Highland, including the construction of the Air Force Base; therefore, the property does not appear eligible under NRHP Criterion A or CRHR Criterion 1.

Criterion B/2: That are associated with the lives of persons significant in our past.

To be found eligible under Criterion B/2, the property has to be directly tied to an important person and the place where that individual conducted or produced the work for which he or she is known. Archival research failed to indicate any such direct association between individuals that are known to be historic figures at the national, state, or local level and the Parcel 3: 26562 3rd Street (APN 1192-551-07) property. The earliest ownership information

identified that indicated that the Parker Family Trust owned the property by 1973. According to the San Bernardino County Recorder-Clerk's office, the family trust owned the property until 2007. Research did not reveal any reason to believe that any individuals associated with the property are persons of historic significance. Other known owners between 2007 and 2022 based on information available from the San Bernardino County Recorder-Clerk's office include Daniel Villarruel and Aurora S. Zacarias. Due to a lack of identified significant associations with important persons in history, Parcel 3 does not appear eligible under NRHP Criterion B or CRHR Criterion 2.

Criterion C/3: That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction.

The Parcel 3: 26562 3rd Street (APN 1192-551-07) property contains one historic-age building, the single-family residence, and two ancillary buildings, built in 1940. The 1940 residence does not reflect character-defining features of an architectural style due to material alterations to the windows, door, and roofing as well as the addition of an awning to the west elevation. Because the original windows and doors have been replaced with modern materials and modern materials were added to the primary elevation, the building no longer can be said to "embody the distinctive characteristics of a type, period, or method of construction." In addition, two of the ancillary buildings experienced fire damage circa 2022. Archival research did not uncover that the residence was the work of a master architect or builder. The building also does not possess high artistic value and is not representative of a significant or distinguishable entity whose components may lack individual distinction. Additionally, the ancillary buildings do not express character-defining features and distinctive characteristics of a specific architectural style and due to their lack of distinctive characteristics, they are unlikely the work of a master architect or builder. Therefore, Parcel 3: 26562 3rd Street (APN 1192-551-07) lacks architectural merit due to numerous alterations and fire damage, and the property does not appear eligible for the NRHP under Criterion C or the CRHR under Criterion 3.

Criterion D/4: That have yielded, or may be likely to yield, information important in prehistory or history.

Criterion D was not considered in the evaluation, because it generally applies to archaeological resources. The buildings on Parcel 3: 26562 3rd Street (APN 1192-551-07) are not significant under Criterion D of the NRHP or Criterion 4 of the CRHR as a source, or likely source, of important historical information, nor do they appear likely to yield important information about historic construction methods, materials, or technologies.

Integrity Discussion

The Parcel 3: 26562 3rd Street (APN 1192-551-07) property contains three buildings, none of which are known to have been moved or relocated; therefore, the property maintains integrity of location. The Parcel 3 property does not maintain integrity of setting, as the surrounding neighborhood and streetscape have been altered significantly since the 1940 buildings, the first at the property, were constructed. At the time of construction, the surrounding area was agricultural with widely dispersed small homesteads. By the 1970s, the majority of these agricultural properties and small residences were replaced with tracts of single-family residential housing; therefore, the property no longer retains integrity of setting. Significant alterations and fire damage to the majority of the buildings on Parcel 3 have substantially impacted integrity of design, materials, and workmanship. The property no longer retains integrity of feeling due to the high number of alterations to the buildings on the property and the loss of its original agricultural setting. Parcel 3 can no longer convey its historic sense of a particular period. Finally, the Parcel 3 property does not

have any historical associations with people or events and therefore it does not have integrity of association. Therefore, the Parcel 3: 26562 3rd Street (APN 1192-551-07) property does not retain integrity.

City of Highland Statement of Significance

The Parcel 3: 26562 3rd Street (APN 1192-551-07) property does not meet any of the criteria for listing by the City of Highland, as demonstrated below.

A ***It exemplifies or reflects special elements of the city's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history.***

As discussed in NRHP/CRHR Criterion A/1, archival research did not discover that Parcel 3 was related to historical events significant to the City of Highland and does not reflect special elements of the City's cultural, social, economic, political, aesthetic, engineering, architectural, or natural history.

B ***It is identified with persons or events significant in local, state, or national history.***

As discussed in NRHP/CRHR Criterion B/2, archival research did not discover that Parcel 3 was the location of any significant historical events or associated with an important person in the City of Highland, California, or the United States.

C ***It embodies distinctive characteristics of a style, type, period, or method of construction, or is a valuable example of the use of indigenous materials or craftsmanship.***

As discussed in NRHP/CRHR Criterion C/3, none of the three buildings identified on Parcel 3 exemplifies a particular architectural style, type, or period of construction important to the City. The historic-age residence and ancillary buildings are significantly altered, and some experienced fire damage. There are more intact examples of buildings from the 1940s throughout the City. Additionally, due to the date of construction of the earliest building constructed on the property (1940), it is unlikely to be a valuable example of the use of indigenous materials or craftsmanship.

D ***It is representative of the work of a notable builder, designer, or architect.***

As discussed in NRHP/CRHR Criterion C/3, archival research did not uncover that any of the buildings on Parcel 3 were identified with a builder, designer, or architect whose work could be considered notable within the City of Highland.

E ***It contributes to the significance of an historic area, being a geographically definable area possessing a concentration of historic or scenic properties or thematically related grouping of properties which contribute to each other and are unified aesthetically by plan or physical development.***

Parcel 3 does not contribute to the significance of an historic area, nor is it thematically related to a group of properties that contribute to each other and are unified aesthetically. The area surrounding Parcel 3 has been altered significantly since its construction in 1940. At the time of its construction, the surrounding area was agriculturally based with widely dispersed small homesteads. By the 1970s, the majority of these agricultural properties and small residences were replaced with tracts of single-family residential housing. The historic area that Parcel 3 originally was a part of is no longer extant.

F ***It has a unique location or singular physical characteristics or is a view or vista representing an established and familiar visual feature of a neighborhood, community, or the city of Highland.***

The buildings at Parcel 3 do not present a unique location or singular physical characteristics, nor is the property a view or vista representing an established and familiar visual feature of a neighborhood, community, or the City of Highland. The majority of the buildings on the property have been heavily altered and fire damaged; therefore, they do not possess unique characteristics. Additionally, the property does not display a view or vista establishing a familiar visual feature due to multiple changes, new additions, and fire damage to the buildings on the property.

G ***It embodies elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation.***

As discussed in NRHP/CRHR Criterion C/3, the buildings at Parcel 3 have substantial material alterations and fire damage, and no longer embody elements of architectural design, detail, materials, or craftsmanship that represent a significant structural or architectural achievement or innovation.

H ***It is similar to other distinctive properties, sites, areas, or objects based on a historic, cultural, or architectural motif.***

Parcel 3 does not possess similar characteristics to properties, sites, areas, or objects based on a historic, cultural, or architectural motif. Due to multiple large-scale alterations and fire damage to the majority of the buildings on the property since their construction, there are no distinctive characteristics that can relate them to other properties within the City of Highland.

I ***It reflects significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning.***

The buildings at Parcel 3 do not reflect significant geographical patterns, including those associated with different eras of settlement and growth, particular transportation modes, or distinctive examples of park or community planning. Due to multiple large-scale alterations and fire damage to the majority of the buildings on the property since their construction, they can no longer be associated with different eras of settlement and growth in the City of Highland.

J ***It is one of the few remaining examples in the city, region, state, or nation possessing distinguishing characteristics of an architectural or historical type of specimen.***

Parcel 3 does not represent one of the few remaining examples in the City, region, state, or nation possessing distinctive characteristics of an architectural historical type of specimen. The buildings on the property have undergone multiple large-scale alterations and fire damage, and therefore no longer possess distinctive characteristics of such a type.

5.4 Summary of Evaluation Findings

In conclusion, neither Parcel 1: 26530 3rd Street (APN 1192-551-04), Parcel 2: 26540 3rd Street (APN 1192-551-05), nor Parcel 3: 26562 3rd Street (APN 1192-551-07) appear eligible for listing in the NRHP or

the CRHR or as a City of Highland Cultural Resource due to a lack of important historical associations, lack of architectural merit, and lack of integrity, nor do they appear eligible as contributors to a historic district. As such, the 26530 3rd Street, 26540 3rd Street, and 26562 3rd Street properties are not considered historical resources for the purposes of CEQA. The recommended California Historical Resource Status Code for these properties is 6Z (found ineligible for the NRHP, CRHR, or local designation through survey evaluation).

6 Findings and Conclusions

6.1 Summary of Findings

As a result of extensive archival research, review of previous reports, field survey, and evaluation for historical significance, none of the three properties on the Project site are currently designated or listed under any national, state, or local landmark programs. Dudek evaluated the buildings on the Project site in accordance with Sections 15064.5(a)(2) and 15064.5(a)(3) of the CEQA Guidelines and using the criteria outlined in Section 5024.1 of the California Public Resources Code. Dudek concludes that the buildings do not appear to be eligible for listing in the NRHP or CRHR or as City of Highland Cultural Resources due to a lack of significance. As such, no buildings on the Project site appear to be historical resources under CEQA. The recommended California Historical Resource Status Code for 26530 3rd Street, 26540 3rd Street, and 26562 3rd is 6Z. Further, no potential indirect impacts to historical resources were identified because the proposed Project has no potential to impact the built environment beyond the Project site.

The finding for built environment cultural resources for the proposed Project under CEQA is No Impact. As the proposed Project would have no impact on historic properties or historical resources, no further study is required. Table 6 summarizes these findings.

Table 6. Historic Built Environment Findings

Address	Date Constructed	NRHP/CRHR/ City of Highland Significance Criteria	Previous CRHS Code (if applicable)	Assigned CRHS Code	CEQA Finding
APN 1192-551-04	Parcel 1 -- 1948	Not eligible	Not applicable	6Z: Found ineligible for NRHP, CRHR, or local designation through survey evaluation	Not considered a historical resource for the purposes of CEQA
APN 1192-551-05	Parcel 2 -- 1948	Not eligible	Not applicable	6Z: Found ineligible for NRHP, CRHR, or local designation through survey evaluation	Not considered a historical resource for the purposes of CEQA
APN 1192-551-07	Parcel 3 -- 1940	Not eligible	Not applicable	6Z: Found ineligible for NRHP, CRHR, or local designation through survey evaluation	Not considered a historical resource for the purposes of CEQA

Notes: NRHP = National Register of Historic Places; CRHR = California Register of Historical Resources; CHRS = California Historical Resource Status; CEQA = California Environmental Quality Act; APN = Assessor's Parcel Number.

Appendix A
Preparers' Qualifications

Caitlin Greeley

ARCHITECTURAL HISTORIAN

Caitlin Greeley (*she/her*) is an architectural historian with 2 years' professional experience. As part of her cultural resources management work, Ms. Greeley has conducted archival research, performed fieldwork, and authored multiple historic context statements. She also has experience preparing and contributing to California Department of Parks and Recreation (DPR) 523 forms. She has experience with consultation for Section 106 of the National Historic Preservation Act, Area of Potential Effect maps, Historic Resource Evaluation Reports, Historical Resource Inventories, Historic American Building Survey photography, reconnaissance and intensive-level surveys, and archival research.

Ms. Greeley meets the Secretary of the Interior's Professional Qualification Standards for both Architectural History and History. She has experience preparing environmental compliance documentation in support of projects that fall under the California Environmental Quality Act (CEQA)/National Environmental Policy Act (NEPA) and Sections 106 and 110 of the National Historic Preservation Act.

Prior to joining Dudek, Ms. Greeley gained extensive experience working in multicultural and multilingual environments. She has experience photographing historic buildings and writing conservation management statements for preservation and proposals for adaptive reuse of historic buildings.

Dudek Project Experience

As-Needed Historic Research Consultant, City of Coronado, California. Dudek is currently working with the City of Coronado Community Development Department to provide historic preservation services on an as-needed basis. Services scoped under the current contract include historic resources surveys; archival research; preparation of evaluation reports in consideration of the National Register of Historic Places (NRHP), the California Register of Historical Resources, and City of Coronado designation criteria; attendance at Historic Resource Commission and City Council hearings; and review of projects for conformance with the Secretary of the Interior's Standards for Rehabilitation. Ms. Greeley serves as an architectural historian for the task orders and is responsible for archival research and reporting. (2022)

SB2 Planning Grant Project, San Bernardino County, California. Dudek was retained to prepare a Cultural Resources Technical Report in support of the SB2 Planning Grant Project in San Bernardino County. Preparation of the report involved extensive archival research and historic context statement development. Ms. Greeley serves as an architectural historian for the project and is responsible for archival research and coauthoring the historic context statement. (2022)

Willow Tree Inn, City of Compton, California. Dudek was retained to prepare a historic resources evaluation, a Built Environment Inventory, and an evaluation report for the Willow Tree Inn located within the city limits of Compton. Preparation of the report involved extensive archival research, in-field research, historic context statement development, building development descriptions, historical significance evaluations, and DPR forms for the property. Ms. Greeley serves as an architectural historian for the project and is responsible for fieldwork, archival research, and writing building descriptions. (2022)

Relevant Previous Experience

California Housing and Community Investment Department of Los Angeles, City of Los Angeles, California. Ms. Greeley performed intake of incoming work orders of affordable housing projects and conducted historic research on each project site and neighboring properties. She evaluated properties throughout Los Angeles in compliance with Section 106 to determine potential eligibility of historic resources for designation on the NRHP. She also created the preliminary Area of Potential Effects boundary maps for the proposed project using Photoshop for visual presentation. She aided in making preliminary determinations to see if the proposed affordable housing project had an effect on surrounding properties eligible for the NRHP in accordance with Section 106. She coordinated with and provided training to coworkers on the intake process for the project. She conducted site survey of individual resources in the City of Los Angeles through photographic documentation and contributed to DPR forms. (2020–2021)

Cultural Assessment for Weatherization Projects for Homes, California Department of General Services, California. Ms. Greeley helped with the intake of reviews, assigned reviews to staff, and coordinated with agencies. She also conducted research on historic-age properties throughout California using assessor records, building permits, historic aerials, local ordinances, or surveys regarding local historic preservation to determine if the proposed project had an effect on properties eligible for the NRHP in accordance with Section 106. (2020–2022)

XpressWest Passenger Train Project, California and Nevada. Ms. Greeley performed administrative tasks and organized Section 106 consultation party documents. She also contributed to DPR forms and NRHP eligibility evaluations of individual resources. She conducted research on unknown parcels using historic photographs and spatial analysis programs such as Google Earth imaging. She edited survey photos through post-production software, such as Photoshop, for visual presentation. (2020)

Interstate 10/Mt. Vernon Avenue Improvement Project, City of Colton and Caltrans District 8, San Bernardino County, California. Ms. Greeley conducted a field survey to identify built environment resources requiring formal evaluation and participated in the identification of built resources subject to exemption per Attachment 4 of the Caltrans Section 106 Programmatic Agreement. She also researched and contributed to the City of Colton historic context statement in the draft Historical Resources Evaluation Report. Additionally, she prepared DPR forms for individual resources in the project Area of Potential Effect. (2020)

Fenix Marine Intermodal Railyard Expansion and Modernization Project, The Port of Los Angeles and Maritime Administration, California. Ms. Greeley researched consulting parties for the project and drafted consultation letters and tribal letters as part of the Section 106 process. She also contributed to the draft technical report and conducted a field survey of historic built environment resources. (2020)

Nicole Frank, MSHP

ARCHITECTURAL HISTORIAN

Nicole Frank (*nih-COHL FRAYNK; she/her*) is an architectural historian with 6 years' experience in the historic preservation field. Ms. Frank's professional experience encompasses a variety of projects for local agencies, private developers, and homeowners in both highly urbanized and rural areas. Projects have included reconnaissance-level surveys, preparation of resource-appropriate and citywide historic contexts, and historical significance evaluations in consideration of the National Register of Historic Places (NRHP), California Register of Historic Resources (CRHR), and local designation criteria. Ms. Frank has experience conducting historic research, writing landmark designations, performing conditions assessments, and working hands-on in building restoration projects throughout the United States. Ms. Frank also has governmental experience with the City of San Francisco's Planning Department and the City of Chicago's Landmark Designations Department. She meets the Secretary of the Interior's Professional Qualification Standards for Architectural History.

Project Experience

Development

6365 Imperial Avenue Historical Resources Technical Report Project, Denya LLC, San Diego, California. Dudek was retained by Denya LLC to prepare a historical resources technical report (HRTR) for a property located at 6365 Imperial Avenue in the City of San Diego. The report was prepared in accordance with the California Environmental Quality Act (CEQA) Guidelines, Section 15064.5, for historical resources and all applicable City guidelines and regulations. One built environment resource was identified with the subject property as a result of the background research and survey: the commercial building associated with the address 6365 Imperial Avenue. The significance evaluation found that 6365 Imperial Avenue is not eligible under any designation criteria due to a lack of the requisite integrity necessary to convey significant historical associations and a lack of architectural merit. Acting as architectural historian, coauthored the technical report and conducted a pedestrian survey of the site. (2022)

5146–5148 and 5150 Dehesa Road Project, Kevin R. Carlin, San Diego County, California. The property owner, Kevin R. Carlin, is proposing a Tentative Parcel Map to subdivide an existing 5.87-acre parcel into four parcels and one remaining undeveloped parcel, known as the 5146–5148 and 5150 Dehesa Road Project. Dudek completed a HRTR to identify all historical resources (if any) within the project area to determine whether the proposed project would result in a significant impact to historical resources under CEQA. To complete the evaluation of significance, Dudek conducted archival and building development research and developed an appropriate historic context for the evaluation of the project area. All buildings and structures over 45 years old were recorded and evaluated for historical significance. The subject property is recommended not eligible for inclusion in the NRHP, CRHR, and San Diego County Local Register of Historical Resources under all designation criteria due to a lack of historical or architectural significance and lack of integrity. Acting as architectural historian, coauthored the technical report and conducted a pedestrian survey of the site. (2021–2022)

Downtown Buena Park Project, Merlone Geier, Buena Park, California. Dudek prepared an HRTR for a project that proposes the redevelopment of a former Sears building, parking lot, and Sears Automobile Service Station at the Buena Park Downtown Mall, located at 8150 La Palma Avenue in the City of Buena Park. The redevelopment plans include 1,381 residential units, 41,500 square feet of amenity and lobby space, and 2,551 residential parking spaces over 28-acres. The report included an intensive-level survey of the Buena Park Downtown Mall by a qualified architectural historian for historical significance and integrity in consideration of NRHP and CRHR designation criteria; building development and archival research; development of an appropriate historic context for the Buena Park Downtown Mall; and recordation and evaluation of the Sears building, a built environment resource over 45 years old. The Buena Park Downtown Mall does not appear eligible under any NRHP or CRHR designation criteria due to a lack of significant historical associations, architectural merit, and compromised integrity. Acting as architectural historian, coauthored the technical report and conducted a pedestrian survey of the site. (2021)

6th and Victoria Avenue Warehouse Project, Confidential Client, Highland, California. Dudek completed a Historic Resource Evaluation Report (HRER) for a project that proposes to construct a single 307,455-square-foot industrial/warehouse building (inclusive of 10,000 square feet of office/mezzanine). Associated improvements include loading docks, truck and vehicle parking, and landscape areas. The report included an evaluation of three buildings more than 45 years old. Each property was recorded on State of California Department of Parks and Recreation Series 523 Forms (DPR Forms) and was evaluated in consideration of NRHP and CRHR designation criteria and integrity requirements. As architectural historian, authored a historical resources inventory and evaluation report. (2021)

Forest Resiliency Program Project SPI Keystone, Golden State Finance Authority, Tuolumne County, California. Dudek completed a historical resources inventory and evaluation report for a project that proposes to redevelop a site in La Grange and Jamestown in Tuolumne County to facilitate the transport of forest material (e.g., trees with no lumber value and underbrush) by truck, turn it into wood fuel pellets, and then ship the pellets from the site using the existing railroad line. Completed this report to be consistent with Section 106 of the National Historic Preservation Act (NHPA) (36 Code of Federal Regulations 800), CEQA Section 15064.5, Public Resources Code 5024, and applicable local regulations. This report included (1) a California Historical Resources Information System records search conducted at the Central California Information Center for the area of potential effect (APE) plus a 1-mile buffer; (2) a pedestrian surface reconnaissance of the APE for archaeological and built environment resources; and (3) a historical significance evaluation of Property 1 Assessor's Parcel Numbers (APNs) (063- 190- 056, 063-350-004, 063-350-005, and 063-190-051) and Property 2 (Sierra Railroad–Mainline, Keystone Segment) located within the APE. As architectural historian, authored a historical resources inventory and evaluation report. (2021)

Senior Residences at Hillcrest Project, DFA Development, San Diego, California. Dudek prepared a Historic Properties Inventory Report for the project, which proposes to develop a 68-unit, affordable senior housing community located in the Hillcrest neighborhood of San Diego. The project site is partially developed with existing buildings for preschool services associated with the adjacent University Christian Church and a parking lot. The project is proposing to receive U.S. Department of Housing and Urban Development project vouchers issued to the San Diego Housing Commission and is therefore required to undergo a National Environmental Policy Act (NEPA) analysis for receiving federal funding. Acting as architectural historian, coauthored the technical report and conducted a pedestrian survey of the site. (2020–2021)

Sycuan Fee to Trust Project, Sycuan Band of the Kumeyaay Nation Reservation, Unincorporated San Diego County, California. Dudek completed a Historic Properties Inventory and Evaluation Report for the proposed project, located within the vicinity of El Cajon, California, in unincorporated San Diego County. The project proposes a fee-to-trust transfer of five parcels that cumulatively total approximately 40 acres. The transfer of land from the

Sycuan Band to the Bureau of Indian Affairs (the federal lead agency) would include several parcels. Dudek's report included development of a project APE map; the relevant results of a California Historical Resources Information System records search and background research; a pedestrian survey of the APE for built environment resources; and a historical significance evaluation of all properties more than 50 years of age within the APE, in consideration of potential adverse effects to historic properties under Section 106 of the NHPA. The evaluation found that Properties 1, 2, 4, and 5 were not eligible for the NRHP at the individual level or as part of a larger historic district. As a result, no historic properties were identified within the APE, and Dudek recommended a finding of No Historic Properties Affected. As architectural historian, conducted background research and a pedestrian survey. (2021)

Ranch at River Bend Project, Save Gregory Canyon Hills LLC, Community of Pala, California. Dudek completed an HRTR in support of the proposed project, which includes the development of a new, mixed-use community. Acting as architectural historian, coauthored the technical report and conducted a pedestrian survey of the site. (2020)

Enclave at Ivanhoe Ranch Project, Vance and Associates, Rancho San Diego, California. Dudek completed an HRTR in support of the proposed residential development project. The project site totals approximately 121.9 acres in Rancho San Diego. Included in the project site is a historic-era complex of horse ranch buildings and accompanying residences, located at 3256, 3261, 3263, 3267, and 3269 Ivanhoe Ranch Road (APNs 518-030-41, 518-030-43, 518-030-44, and 518-030-45), which were evaluated for historical significance. This study was conducted in accordance with Section 15064.5(a)(2)-(3) of CEQA guidelines, and the project site was evaluated in consideration of NRHP, CRHR, and County of San Diego Historic Preservation Ordinance and resource protection ordinance requirements. Acting as architectural historian, coauthored the technical report and conducted a pedestrian survey of the site. (2020)

Shawnee/CG7600 Master Plan Redevelopment Project, Palmer Mission Gorge Properties, LP, San Diego, California. Dudek conducted a Potential Historical Resource Review (in accordance with Information Bulletin 580) for four properties more than 45 years old within the City of San Diego. Acting as architectural historian, conducted a photographic survey of the four properties within the project site. Updated three 2011 DPR Forms and created a new DPR Form for a previously unrecorded property within the project site. (2020)

740–790 East Green Street Mixed-Use Project, City of Pasadena, California. Dudek completed a Cultural Resources Technical Report (CRTR) for five commercial buildings located in the City of Pasadena (Assessor's Identification Nos. 5734-025-014, 024, 026, 029, 027). The study included a pedestrian survey of the proposed project area, building development and archival research, development of an appropriate historic context for the property, and recordation and evaluation of the property for historical significance and integrity in consideration of NRHP, CRHR, and local eligibility requirements. Acting as architectural historian, updated the Pasadena historic context, conducted archival research, and wrote significance evaluations for the five buildings that are more than 45 years old. (2019)

8850 Sunset Boulevard Project, City of West Hollywood, California. Dudek completed a CRTR for the proposed project, which consisted of the demolition of existing buildings and the construction and operation of a new mixed-use hotel and residential building on a property along the south side of Sunset Boulevard, extending the full city block between Larrabee Street and San Vicente Boulevard. Acting as architectural historian, assisted in the completion of the technical report as the primary writer. (2019)

Palmetto Avenue Warehouse Project, Patriot Development Partners, Rialto, California. Dudek conducted a Cultural Resources Report in support of the proposed project, which proposed to demolish buildings on six parcels in the City of Rialto and construct an industrial/warehouse building on an approximately 4.24-acre property located at the northeast corner of Palmetto Avenue and Baseline Road. Acted as evaluator for three of the six properties, which were at least 45 years old. (2019)

14545 Lanark Street Project, Clifford Beers Housing Inc., Los Angeles, California. Dudek completed an HRER for a property located at 14545 Lanark Street in the Panorama City neighborhood of Los Angeles (APN 2210-011-900). Acting as architectural historian, authored the HRER for the subject property, a Public Social Services Department building constructed in 1967. (2019)

Confidential Solar Energy Project, Confidential Client, California. Dudek completed an HRTR for a confidential solar project. Acting as architectural historian, authored the report evaluating a complex of 20 buildings for historical significance. (2019)

1605 Industrial Avenue Warehouse Project., City of San José, California. Acting as architectural historian, coauthored the CRTR for the project, which included the construction of an approximately 186,000-square-foot industrial warehouse building on an approximately 10.96-gross-acre property located in the northern part of the City of San José. Preparation of the historical context statement involved archival research, building descriptions, historic context development, and historical significance evaluations. (2018)

Jefferson La Mesa Project, JPI, La Mesa, California. The project proposed to demolish three industrial automotive buildings to redevelop the property. Served as architectural historian and coauthor of the HRER for the project. Contributed archival research and historical context development for the three automotive buildings. (2018)

Education

Riverside City College Life Science/Physical Science Reconstruction Project, Riverside Community College District, Riverside, California. Dudek completed a CRTR for the project that proposes to modernize the currently vacant Life Science and Physical Science connected buildings on the Riverside City College campus to allow for growth in the Business and Information Systems programs. Acting as architectural historian, conducted research on the buildings associated with the project. (2021)

Richland Elementary School Reconstruction Project, San Marcos United School District, San Marcos, California. Dudek completed a CRTR for the project located at 910 Borden Road. The proposed project involves the demolition of the existing Richland Elementary School, which includes seven permanent buildings and 24 portable classrooms, and the reconstruction of the school, including the redevelopment of play fields and playgrounds. Acting as architectural historian, conducted a field visit, researched the school district and elementary school, and coauthored the technical report. (2021)

University of California San Diego, Future College Living and Learning Neighborhood, University of California San Diego Campus Planning Office, San Diego, California. Dudek was retained by the University of California (UC) San Diego Campus Planning Office to conduct a visual analysis for the proposed project, which would consist of five housing buildings providing an additional 2,000 beds to serve the student population of the UC San Diego campus. As architectural historian, conducted a field visit to gain a better understanding of the visual environment of the project site and surrounding area. (2020)

San Francisco State University Master Plan Update Environmental Impact Report, San Francisco State University Capital Planning, Design, and Construction, San Francisco, California. Dudek conducted a historic built environment study for the proposed project. Only buildings more than 45 years of age and proposed for renovation or demolition were included in this historic built environment study. Acting as architectural historian, participated in a survey of the San Francisco State University (SFSU) Psychology and Ethnic Studies Building and conducted archival research to prepare appropriate historic context for San Francisco, SFSU, and the Psychology and Ethnic Studies Building. Conducted research on 18 buildings located on the SFSU campus and wrote historic contexts, descriptions, and lists of alterations for each. (2019)

Keats Building and Amphitheater, California State University Fresno, California. As architectural historian, authored the description of the amphitheater and Keats Building on the California State University (CSU) Fresno campus for the CRTR. Also prepared DPR Forms for the two buildings. (2018)

College Park Demolition Project, CSU Chico, California. Dudek was retained by CSU Chico to complete a cultural resources study for a project that proposes demolition of 10 single-family residences near the CSU Chico campus. As architectural historian, coauthored a cultural resources report for CSU Chico, writing 10 building feature descriptions. (2018)

Energy

Battery Storage Project, Confidential Client, San Diego, California. Dudek prepared an HRER for a project that proposes to develop a battery energy storage system located in San Diego. All buildings and structures more than 45 years old identified within the project area were recorded and evaluated for historical significance. The significance evaluation involved conducting archival research and building development research for the project area and completing an appropriate historic context. Acting as architectural historian, conducted pedestrian surveys to evaluate the presence of historic built environmental resources and authored the HRER. (2021)

Battery Energy Storage Project, Confidential Client, Grand Terrace, California. Dudek prepared an HRER for a project that proposes to develop a battery energy storage system in the City of Grand Terrace. This report included development of a built environment study area map, a pedestrian survey of the proposed project study area for built environment resources, and a historical significance evaluation of a steam plant in consideration of state designation criteria and integrity requirements. The significance evaluation found that the steam plant is not eligible under any designation criteria due to a lack of architectural merit and a lack of the requisite integrity necessary to convey significant historical associations. As such, the steam plant is not considered a historical resource under CEQA. Acting as architectural historian, conducted pedestrian surveys and authored the HRER. (2021)

Confidential Solar Project, San Diego County, California. Serving as architectural historian, coauthored the HRTR for the project, which proposed the development of a solar energy facility and energy storage system. The project site totals approximately 1,356 acres and is in unincorporated southeastern San Diego County. The HRTR involved a pedestrian survey for the presence of historic built environment resources. All buildings and structures more than 45 years old were recorded and evaluated for historical significance. The significance evaluation included conducting archival research and building development research for a dairy and creamery complex located on the project site and completing a historic context. The complex of dairy buildings was evaluated for historical significance and is not eligible for inclusion in the NRHP, CRHR, or the County Register due to a lack of significant historical associations. (2020)

Healthcare

St. Joseph's Hospital Master Plan Project, Devenney Group Ltd., Stockton, California. Dudek prepared a historical resources inventory and evaluation report in support of the project. The proposed project site included five properties in the City of Stockton: (1) 1638 North California Street (APN 127-190-32), (2) 1800 North California Street and 542 McCloud Avenue (APN 127-180-44), (3) 534 East Maple Street (APN 127-190-30), (4) 425 East Harding Way (APN 127-150-39), and (5) 445 East Harding Way (APN 127-150-51). Served as architectural historian and coauthor of the historical resources inventory and evaluation report, conducting research on properties 2–4 of the historic-age built environmental resource properties, primarily located within the St. Joseph's Medical Center Complex or on parcels adjacent to the complex that may be acquired. (2020)

Municipal

Ocean Beach Pier Improvements Project, City of San Diego, California. Dudek was retained by the City of San Diego to prepare an HRTR for the Ocean Beach Pier Improvements Project. The City requested an evaluation of whether the Ocean Beach Pier (Ocean Beach Municipal, Pier, or Pier Project site) met eligibility criteria for local, state, or federal designation. The report was prepared in accordance with CEQA Guidelines, Section 15064.5, for historical resources and all applicable City guidelines and regulations. As a result of the evaluation, the Ocean Beach Pier is recommended eligible under NRHP and CRHR Criteria A/1 and C/3 and San Diego Historical Resources Board Designation Criteria A, C, and D. The Ocean Beach Pier reflects special elements of Ocean Beach's historical and economic development and embodies distinctive characteristics of the concrete fishing pier typology. Responsibilities include fieldwork, archival research, and the associated property significance evaluation. (2022–Present)

Los Angeles County Metro Area Plan Project, County of Los Angeles Department of Regional Planning, California. Dudek was retained by the County of Los Angeles Department of Regional Planning to prepare a Historic Context Statement in support of the project. The goal of the Historic Context Statement component is to inform, enhance, and streamline the larger project as it pertains to historical resources. The communities included within the Historic Context Statement include the following: East Los Angeles, East Rancho Dominguez, Florence-Firestone, Walnut Park, West Athens-Westmont, West Rancho Dominguez-Victoria, and Willowbrook. The Historic Context Statement documents the development history of the communities from the rancho period to the present; identifies important themes, events, and patterns of development; and describes the different property types, styles, builders, and architects associated with these important periods and themes. The document will also provide registration requirements and recommendations for future study/action by the County of Los Angeles to facilitate and streamline the historic preservation program. Responsibilities include conducting archival research, coauthoring the Historic Context Statement, engaging with stakeholders, collaborating with the GIS team to create an online mapping tool, performing field survey, attending public meetings, and collaborating with the graphics team for flyers and social media content. (2021–Present)

Florence-Firestone Community Plan Area Historic Resources Survey, County of Los Angeles Department of Regional Planning, California. Dudek was retained by the County of Los Angeles Department of Regional Planning to prepare a Historic Context Statement and conduct a Historic Resources Survey for the Community Plan Area (CPA) of Florence-Firestone. The goal of the project is to document the development history of the community from the rancho period to the present; identify important themes, events, and patterns of development; and describe the different property types, styles, builders, and architects associated with these important periods and themes. The document will also provide registration requirements and recommendations for future study/action by the County of Los Angeles to facilitate and streamline the historic preservation program. Responsibilities include conducting archival research, coauthoring the Historic Context Statement, engaging with stakeholders, collaborating with the GIS team to create an online mapping tool, attending public meetings, and collaborating with the graphics team for flyers and social media content. (2021–Present)

East Los Angeles Historic Resources Survey of Historic Age Commercial Signage, County of Los Angeles Department of Regional Planning, California. Dudek was retained by the County of Los Angeles Department of Regional Planning to perform a Historic Resources Survey and focused Historic Context Statement for historic age commercial signage located in the CPA of East Los Angeles. The goal of the project is to document the history of commercial signage, record and evaluate significant historic signs, and designate all applicable signs as County Landmarks. Responsibilities include archival research, collaboration with the GIS team to create an online mapping tool, and collaboration with the graphics team for flyers and social media content. (2021–Present)

Mission Bay Park Improvements Project, City of San Diego, California. Dudek reviewed the City's proposed seawall and bulkhead designs for conformance with the Secretary of the Interior's Standards for the Treatment of Historic Properties, specifically the Standards for Rehabilitation. This review included advising the design team on how to remain in conformance with the standards by way of informal design review/check-ins throughout the design review process. Acting as architectural historian, conducted a pedestrian survey, and coauthored the Mission Beach Seawall Evaluation Memorandum. (2021–Present)

Pier View Way Bridge and Lifeguard Headquarters Restoration/Replacement Project, Confidential Client, Oceanside, California. Dudek is preparing a CRTR for a project that proposes to restore or replace the concrete portion of the Pier View Way Bridge and the Lifeguard Headquarters in the City of Oceanside. This report includes a pedestrian survey for historic built environment resources, development research, archival research to develop the appropriate historic context, and a historical significance evaluation. The report discusses the proposed project description, regulatory framework, all sources consulted, research and field methodology, setting, and findings. In addition, the report discusses the proposed project's potential to impact historical resources under CEQA and will provide recommendations as appropriate. Acting as architectural historian, conducted pedestrian surveys and coauthored the technical report. (2021–Present)

Mira Mesa CPA Historic Context Statement and Focused Reconnaissance Survey, City of San Diego, California. Dudek prepared a historic context statement identifying the historical themes and associated property types important to the development of Mira Mesa, accompanied by a reconnaissance-level survey report focused on the master-planned residential communities within the Mira Mesa CPA. This study was completed as part of the comprehensive update to the Mira Mesa CPA and Programmatic Environmental Impact Report. While the historic context statement addressed all development themes and property types within the community, the scope of the survey was limited to residential housing within the CPA constructed between 1969 and 1990. Acting as architectural historian, coauthored and completed the historic context statement, the survey document, and all associated archival research efforts. (2020–Present)

University CPA Historic Context Statement and Focused Reconnaissance Survey, City of San Diego, California. Dudek prepared a historic context statement identifying the historical themes and associated property types important to the development of the University CPA, accompanied by a reconnaissance-level survey report focused on the master-planned residential communities within the University CPA. This study was completed as part of the comprehensive update to the University CPA and Programmatic Environmental Impact Report. While the historic context statement addressed all development themes and property types within the community, the scope of the survey was limited to residential housing within the CPA constructed between the 1960s and 1990s. Acting as architectural historian, coauthored and completed the historic context statement, the survey document, and all associated archival research efforts. (2020–Present)

Coronado Citywide Historic Resources Inventory and Historic Context Statement, City of Coronado, California. Dudek is currently in the process of preparing a historic context statement and historic resources inventory survey for all properties at least 50 years old within City of Coronado limits. Following current professional methodology standards and procedures developed by the California Office of Historic Preservation and the National Park Service, Dudek will develop a detailed historic context statement for the City that identifies and discusses the important themes, patterns of development, property types, and architectural styles prevalent throughout the City. Dudek will also conduct a reconnaissance-level survey of all properties within City limits that are at least 50 years old to identify individual properties and groupings of properties (i.e., historic districts) with potential for historical significance under City Criterion C (properties that possess distinctive characteristics of an architectural style; are valuable for the study of a type, period, or method of construction; and have not been substantially altered). Acting as architectural historian, authored the historic context statement and conducted reconnaissance-level surveys of properties within City limits. (2019–Present)

As-Needed Historic Research Consulting Services, City of Coronado, California. Dudek provides as-needed historic consulting services for various projects. Each evaluation involves the creation of an occupancy timeline, supplemental research on occupants, building development research (including architects, builders, and property), a pedestrian survey of the project area, creation of a description of the surveyed resource, and completion of a historical significance evaluation report in consideration of designation criteria and integrity requirements. Acting as project manager and architectural historian, authored HRERs for the following properties: 936 J Avenue, 310 2nd Street, 718 B Avenue, 1027-1029 Orange Avenue, 735 Margarita Avenue, 519 Ocean Boulevard, 1901 Monterey Avenue, 269 Palm Avenue, 1113 Adella Avenue, 1519 4th Street, 745 A Avenue, 451–55 Alameda Boulevard, 503 10th Street, 121 G Avenue, 1152 Glorietta Boulevard, 711 Tolita Avenue, 951 G Avenue, 817 A Avenue, 625 B Avenue, 260 D Avenue, 761 I Avenue, 816 1st Street, 820 A Avenue, 953-57 G Avenue, 725 Adella Avenue, 754 H Avenue, 168-70 F Avenue, 1011 E Avenue, 404 8th Street, and 1421 6th Street. (2019–Present)

Gilroy Citywide Historic Resources Inventory, City of Gilroy, California. Dudek is currently bringing to completion a citywide historic context statement and historic resources inventory update of the City of Gilroy's outdated 1986 historic resources inventory. Dudek hosted a public kickoff meeting/outreach session that was well-received by the community, successfully completed a reconnaissance-level survey of more than 3,000 properties on time and within budget, and completed a draft citywide historic context statement. Dudek is also preparing a Public Guide to Preservation that provides an overview of the City's existing policies, what it means to live in a designated property/a district contributor, answers to commonly asked questions concerning restrictions on alterations, and clarification of common misconceptions about property owner requirements. Acting as surveyor, utilized Dudek's architectural survey application to record the features, alterations, and photographs of historic-era buildings throughout the City. Additionally, assisted in the data management and cleanup of the majority of the DPR Forms produced for each of the surveyed buildings. This process included assigning status codes, editing descriptions, choosing an accurate photograph, and adding proper narrative significance. (2020)

955 Hancock Avenue, City of West Hollywood, California. Dudek completed a City-compliant Historical Resource Assessment for a single-family residential property located at 955 Hancock Avenue in West Hollywood. The property was built in 1910 and did not appear to have been previously evaluated for historical significance. This study included a pedestrian survey of the property by a qualified architectural historian, building development and archival research, development of an appropriate historic context for the property, and recordation and evaluation of the property for historical significance and integrity in consideration of NRHP, CRHR, and City of West Hollywood Register eligibility requirements. Acting as architectural historian, assisted in the completion of the assessment as the primary writer. (2018)

Transportation

Keller Road/Interstate 215 Interchange Project, California Department of Transportation, Murrieta and Menifee, California. The project proposed to construct a new, full interchange and auxiliary lanes at Interstate 215 and Keller Road in Riverside County. Acted as architectural historian for the project, coauthoring the HRER. Preparation of the report included a site visit, archival research, historic context development of Murrieta and Menifee, building feature descriptions of six historic-era resources, and historical significance evaluations. (2018)

Water/Wastewater

Southern First Aqueduct Structures Rehabilitation Project, San Diego County Water Authority, San Diego, California. Dudek conducted a Phase I Cultural Resources Inventory (including both archaeological and built environment) for the Southern First Aqueduct Rehabilitation Project, located along a 21-mile stretch of the First San Diego Aqueduct, east of Interstate 15 from the City of Escondido in the north to the Goodan Ranch/Sycamore Canyon County Preserve west of San Vicente Reservoir. As part of this effort, the San Diego Water Authority will be

applying for a Letter of Permission under its Programmatic Master Plan Permit with the U.S. Army Corps of Engineers (ACOE), pursuant to Section 404 of the Clean Water Act. ACOE is the federal lead agency responsible for overseeing compliance with Section 106 of the NHPA, as this project is exempt from review under CEQA. Acting as architectural historian, coauthored the Phase I Cultural Resources Inventory Report and authored the analysis of potential adverse effects. (2021)

Historic Context Statement for Reservoirs, City of San Diego Public Utilities Department, San Diego, California. Dudek completed a survey and historic context statement for the City's surface water storage system, including 10 dam complexes and the Dulzura Conduit. Dudek also prepared detailed impacts assessments for proposed modification to dams, as required by the Department of Safety of Dams. The project involves evaluation of 10 dam complexes and conduit for historical significance in consideration of NRHP, CRHR, and City designation criteria and integrity requirements. The evaluation required extensive archival research and a pedestrian survey. Acting as architectural historian, evaluated five resources, including the Dulzura Conduit, Upper Otay Dam, Murray Dam, Sutherland Dam, and Miramar Dam. (2020)

Historical Resources Impacts Assessment for Maintenance on the Morena Dam Spillway, City of San Diego, California. Acted as the primary author for an impacts assessment of proposed project activities, including maintenance to the Morena Dam, which is considered a historical resource under CEQA and a historic property under Section 106 of the NHPA. (2019)

Specialized Training

- Specialized Certificate in CEQA Practice, UC San Diego Extension, 90 hours of study, March 2022.
  - BUSA40739: California Environmental Quality Act (CEQA), UC San Diego Extension, Summer 2019.
  - ENVR-40008: Writing Effective CEQA Documents, UC San Diego Extension, Winter 2021.
  - ENVR-40010: CEQA in Practice, UC San Diego Extension, Spring 2021.
  - ENVR-40009: Advanced CEQA, UC San Diego Extension, Winter 2022.

Allison Lyons, MSHP

SENIOR ARCHITECTURAL HISTORIAN

Allison Lyons (*AL-ih-suhn LYE-ons; she/her*) is an architectural historian with 12 years' experience throughout the western United States in all elements of cultural resources management. Her expertise includes the preparation of environmental compliance documents in accordance with the California Environmental Quality Act (CEQA) and Section 106 of the National Historic Preservation Act, focusing on the evaluation of historical resources and analysis of project impacts. As a historic preservation consultant, she has been involved in the preparation of numerous large-scale historic resources surveys, Historic American Buildings Survey/Historic American Engineering Record recordation, Federal Rehabilitation Tax Credit and Mills Act Historic Property Contract applications, local landmark nominations, and evaluations of eligibility for a wide variety of projects and property types throughout California. She is highly experienced in writing National Register of Historic Places (NRHP) nominations and historic context statements for local governments.

Education

Columbia University, MS, Historic Preservation, 2010

Scripps College, BA, European Studies, 2006

Ms. Lyons meets the Secretary of the Interior's Professional Qualifications Standards for history and architectural history pursuant to Title 36, Part 61, of the Code of Federal Regulations, Appendix A.

Previous Experience

Section 106 and CEQA

Los Angeles Department of Water and Power Century Trunk Line, Los Angeles Department of Water and Power, City of Los Angeles, California. Dudek was retained by Los Angeles Department of Water and Power to prepare an Avoidance and Protection Plan for Air Raid Siren No. 150. The resource is eligible for the NRHP and California Register of Historical Resources and as a City of Los Angeles Historic-Cultural Monument under Criteria A/1/1 and C/3/3 for its association with World War II and Cold War military infrastructure, and is a historical resource under CEQA. Ms. Lyons is serving as a senior architectural historian, providing quality assurance/quality control for the Post-Construction Monitoring Report. (2021–Present)

Long Beach Airport Section 106 Review, Historic Property Evaluation Report, Long Beach, California. The Long Beach Airport Terminal Area Improvement Project is a multi-phase project that includes the construction of buildings and structures surrounding the existing passenger Terminal Building. The project includes the rehabilitation of the Terminal Building in compliance with the Secretary's Standards for the Treatment of Historic Properties. Ms. Lyons prepared a Historic Property Evaluation Report for Long Beach Airport Terminal Building, seeking State Historic Preservation Officer concurrence on the Area of Potential Effects (APE) for airport and assessment of impacts for the rehabilitation of the historic Terminal Building. Additional work in subsequent phases of the project included additional assessment of impacts for the Quick-Turnaround rental car lot. (2018–2020)

William Mead MOU extension, Los Angeles, CA, 2020, 2020, Housing Authority of the City of Los Angeles Mitigation, Los Angeles, California. Ms. Lyons assisted the Housing Authority of the City of Los Angeles with the extension of their Memorandum of Understanding. The extension was required for continuing projects at multiple, historically significant housing projects across Los Angeles. (2020)

Olive View Medical Center Section 106 Review, Sylmar, California. Ms. Lyons prepared a Section 106 completion report for archeological and Native American monitoring phases of the project that involved the FEMA-financed construction of three new buildings following a fire. (2015)

Vista Irrigation District Reservoirs E2 and F Historical Resource Evaluation Historical Resource Evaluation Report, Vista, California. Ms. Lyons evaluated components of a historic irrigation district in northern San Diego County. Two concrete reservoirs dating to the early twentieth century were recorded and evaluated for historical significance. The significance evaluation included conducting fieldwork and archival research for the reservoirs and completion of a historic context. The reservoirs were evaluated for historical significance and determined not eligible for inclusion in the National Register of Historic Places, California Register of Historic Resources, or the County Register. (2015)

West Los Angeles Veteran's Administration Solar Photovoltaic System, Section 106 Review, Los Angeles, California. Ms. Lyons co-conducted fieldwork, research, and assisted with the preparation of the historic resource evaluation to determine impacts of Solar Photovoltaic System installation on the Veterans Administration campus in West Los Angeles. (2012)

Arcadia City Hall Window Upgrades Section 106 Review, Arcadia, California. Ms. Lyons prepared a historical resource evaluation of Arcadia City Hall to determine if the installation of new windows would impact a historical resource. (2011)

Section 106 and CEQA (Transportation)

Atwater-Merced Expressway Historical Resource Evaluation Report, Merced, California. The Merced County Association of Governments proposed the construction of an expressway linking the communities of Atwater and Merced. Ms. Lyons conducted fieldwork and documented properties in the pathway of the proposed roadway construction. (2021)

San Joaquin Rapid Transit District Solar Installation Project Section 106 Review, Stockton, California. The San Joaquin Rapid Transit District proposed to add solar charging stations and electric buses to support the sustainability of the transit system. Ms. Lyons helped to analyze potential impacts to historical resources at the transit district's three proposed solar installation locations across the City of Stockton. She conducted fieldwork and identified potential impacts to historical resources for the Environmental Impact Report. (2020)

California Department of Transportation District 12, Silverado Canyon Bridge Replacement Project Section 106 Review, Finding of No Adverse Effect Without Standard Conditions, Silverado Canyon, Orange County, California. The California Department of Transportation (Caltrans) proposed to widen a bridge in Silverado Canyon. Ms. Lyons conducted research, site visits, and photographic documentation for the purposes of the Finding of No Adverse Effect without Standard Conditions, which evaluated properties in the APE to determine if the project had the potential to impact historic resources. Property types in the APE included residential properties not visible from the public right-of-way presumed to be eligible due to age. (2020)

Bureau of Engineering Complete Streets, APE Map, Los Angeles, California. The Bureau of Engineering in the City of Los Angeles Complete Streets Division is responsible for the expedited design and construction of street reconstruction projects to maximize public safety. Ms. Lyons reviewed Areas of Potential Effects for proposed projects to identify historical resources in the vicinity of proposed roadwork. (2020)

Los Angeles County Metropolitan Transportation Authority North Hollywood to Pasadena Bus Rapid Transit Corridor Project Historic Resources Technical Report, Los Angeles, California. The North Hollywood to Pasadena Transit Corridor (NoHo to Pasadena Bus Rapid Transit) extends approximately 18 miles and is a key regional connection between the San Fernando and San Gabriel Valleys with connections to the Metro B (Red), G (Orange), and L (Gold) Lines, as well as Metrolink and other municipal bus lines. The corridor passes through four different cities: Los Angeles, Burbank, Glendale, and Pasadena. Ms. Lyons helped define the Historical Resources Project Area, conducted fieldwork, and identified potential impacts to historical resources for the Environmental Impact Report. (2019–2020)

California High-Speed Rail Authority Project Burbank to Los Angeles; Los Angeles to Anaheim, Historical Resource Evaluation Report, Los Angeles, California. The California High-Speed Rail Authority is proposing to construct a high-speed train from Burbank to Anaheim to provide the public with electric-powered, high-speed rail service that provides predictable and consistent travel times between major urban centers and connectivity to airports, mass transit, and the highway network from Los Angeles Union Station to the Anaheim Regional Transportation Intermodal Center in Anaheim. Completed geographic information system (GIS) mapping to identify historic resources within the APE and assisted with completing State of California Department of Parks and Recreation Series 523 Forms (DPR forms). (2015–2020)

Caltrans District 6, Avenue 376 Historical Resource Evaluation Report, Traver, California. Ms. Lyons completed fieldwork documentation and historic resource evaluations for a bridge and irrigation infrastructure. She also conducted a survey to establish the APE. (2019–2019)

Caltrans District 3, Railroad Street Historical Resource Evaluation Report, Elk Grove, California. Completed fieldwork documentation and historic resource evaluations for multiple properties from the late nineteenth and early twentieth centuries that were adjacent to new development. Also included fieldwork survey for adjacent residential neighborhoods to establish the APE. (2019)

Caltrans District 4, Leimert Bridge Historical Resource Evaluation Report, Oakland, California. The City of Oakland, in cooperation with Caltrans, proposed to retrofit and rehabilitate the Leimert Street Bridge over Sausal Creek and Dimond Canyon in the city of Oakland. Ms. Lyons peer-reviewed a supplemental Historic Property Survey Report prepared to analyze and evaluate two properties for NRHP listing – the Leimert Bridge and a segment of the channelized Sausal Creek. (2018)

Caltrans District 4, Bohemian Highway Bridge over Russian River Replacement Historical Resource Evaluation Report, Monte Rio, Sonoma County, California. The Sonoma County Department of Transportation and Public Works proposed to replace the existing Monte Rio Bridge over the Russian River in the community of Monte Rio, on Bohemian Highway, in western Sonoma County. The existing bridge was constructed in 1934. The bridge was previously determined not eligible for the National Register of Historic Places; however, the structure was designated locally as a County Landmark in 2003. Ms. Lyons prepared the National Register of Historic Places evaluations for three historic properties to inform construction plans for a new bridge. Ms. Lyons conducted research, site visits, and photographic documentation for the purposes of the Historic Resource Evaluation Report and DPR forms, which evaluated properties in multiple preliminary alternatives to determine if the project would have the potential to impact historic resources. Property types studied were a locally designated 1934 concrete bridge, a c. 1949 Quonset hut theater, and an early twentieth-century commercial building. (2018–2021)

Caltrans District 7, Central Avenue Pedestrian Improvements Historical Resource Evaluation Report, Ventura, California. The County of Ventura proposed to construct approximately 2,000 linear feet of Portland cement concrete sidewalk on the north side of Central Avenue, connecting existing sidewalks from Joan Way to Rio Mesa High School, filling in the gap in the sidewalk system in the unincorporated Ventura County community of El Rio. Ms. Lyons completed fieldwork documentation to assist with preparing an Area of Potential Effects map and Historic Property Survey Report. (2018)

Caltrans District 2, Sacramento River Trail Bridges Historical Resource Evaluation Report, Redding, California. The City of Redding, in coordination with the U.S. Bureau of Reclamation and Federal Emergency Management Agency, proposes to rebuild four pedestrian bridges along the Sacramento River Trail that were destroyed by the 2018 Carr Fire. The trail follows a portion of the former Southern Pacific Railroad Shasta Division railroad. Assisted with the documentation of the evaluation of the bridges and former railroad for listing in the NRHP. (2018)

Caltrans District 4, Weyand Canal Historical Resource Evaluation Report, Vacaville, California. The Solano Irrigation District, in cooperation with the U.S. Bureau of Reclamation, proposed to demolish and reconstruct four existing reinforced concrete check structures in the Weyand Canal. Peer-reviewed the evaluation of the Weyand Canal both as a potential individual historic property and as a potential contributor to the overall potential Solano Project Historic District. The State Historic Preservation Officer concurred with GPA's recommendation the Weyand Canal is ineligible for listing in the NRHP. (2018)

Caltrans District 7, SR-150 and SR-33 Pedestrian and Bicycle Improvements Historical Resource Evaluation Report, Ojai, California. Caltrans, in cooperation with the City of Ojai, proposed to make improvements to a segment of SR-150 between Maricopa Highway and Gridley Road, and a segment of SR-33 between El Roblar Drive and Ojai Avenue. Ms. Lyons assisted with fieldwork to identify and document historical resources within the APE. Ms. Lyons also created figures and maps for the Section 106 report using GIS. (2017–2018)

Caltrans District 3, E. Rio Bonito Bridge over the Sutter-Butte Canal Historical Resource Evaluation Report, Biggs, California. The County of Butte proposed to widen a bridge over the Sutter-Butte Canal. Ms. Lyons conducted research, site visits, and photographic documentation for the purposes of the HRER, which evaluated properties in the APE to determine if the project had the potential to impact historic resources. Property types in the APE included two residential properties. (2017)

Los Angeles County Metropolitan Transportation Authority, Interstate 605/State Route 60 Corridor Improvement Historical Resource Evaluation Report (Caltrans), Los Angeles, California. The Los Angeles County Metropolitan Transportation Authority, Caltrans, Gateway Cities Council of Governments, and San Gabriel Valley Council of Governments proposed highway improvements along the Interstate (I) 605 Corridor, as well as improvements to State Route (SR) 60 and I-5 related to the interchanges. Assisted with the historic context, DPR forms, GIS tasks for the APE map, and peer-reviewed historic work products. (2017–ongoing)

Los Angeles Metropolitan Transportation Authority, SR-710 Finding of Effect Historical Resource Evaluation Report (Caltrans), Los Angeles, California. The Los Angeles County Metropolitan Transportation Authority, in cooperation with Caltrans, proposed transportation improvements to improve mobility and relieve congestion in the SR-710 North Study area, which is in Los Angeles County and broadly bound by SR-2 and I-5, I-10, I-210, and I-605. Assisted with the Finding of Effect by writing descriptions of individual and district properties within the APEs of four alternatives. Summarized information from existing technical reports on noise, vibration, and other construction- and project-related impacts. (2017)

Caltrans District 10, Capital Southeast Connector – Segment B2 Historical Resource Evaluation Report, Elk Grove, California. The City of Elk Grove proposed to widen a highway segment. Ms. Lyons conducted research, site visits, and photographic documentation for the purposes of the Historical Resources Evaluation Report, which evaluated properties in the APE to determine if the project had the potential to impact historic resources. Property types in the APE included three residential and agricultural properties. (2016–2017)

Caltrans District 10, McHenry Avenue Widening Historical Resource Evaluation Report, Modesto, Stanislaus County, California. The County of Stanislaus proposed to widen the existing two-lane McHenry Avenue to a total of five lanes (two northbound lanes, two southbound lanes, and one continuous left turn/median lane) from the intersection of Ladd/Patterson Road to 0.25 miles south of the intersection with East River Road. Conducted research, site visits, and photographic documentation for the purposes of the HRER, which evaluated properties in the APE to determine if the project had the potential to impact historic resources. Property types in the APE included agricultural-related properties from the 1910s through 2000, historic designed landscapes, a country club, and ranch-style houses. Also completed DPR Forms for the project. (2016–2017)

Los Angeles County Metropolitan Transportation Authority, East San Fernando Valley Transit Corridor Historical Resource Evaluation Report (Caltrans), Los Angeles, California. The Los Angeles County Metropolitan Transportation Authority, in cooperation with the City of Los Angeles, conducted an Alternatives Analysis, Environmental Impact Report/Environmental Impact Statement, and related engineering for the East San Fernando Valley Transit Corridor Project. Prepared evaluations of properties previously identified as eligible within the APE. (2015)

Historic Context Statements and Resource Surveys (Chronological)

City of West Hollywood Residential Properties in the R2, R3, and R4 Multiple-Family Zoning Districts Historic Context Statement, West Hollywood, California. In 2020, the City of West Hollywood began a phased project to update the 2008 citywide survey of Residential Properties in the R2, R3, and R4 Multiple-Family Zoning Districts. Ms. Lyons co-authored the historic context statement prepared as the first part of the project. (2020–2021)

City of West Covina Historic Resources Survey and Context Statement Update, West Covina, California. The City of West Covina was primarily developed during Southern California's post-World War II housing construction boom. The City of West Covina Historic Context Statement, 1945-1978, and Historic Resource Inventory Update report presented the results of a project that updated the City's existing historic context statement (HCS); reviewed properties previously identified for historical significance; and identified, citywide, properties from 1945 to 1978 that have historical significance. The City of West Covina commissioned this project to inform and implement their General Plan Policy updates. The information generated from the Historic Resources Inventory (HRI) Update was intended to assist in the identification of potential historical resources dating from 1945 to 1978. Ms. Lyons served as the project manager. She co-conducted the fieldwork, co-authored historic context statement, documented potential historic resources on inventory forms using Microsoft Access database, prepared final survey report, performed project management duties, and presented findings at public hearings. (2018–2019)

City of Fremont Postwar Development and Architecture in Fremont, Historic Context Statement and Historic Resources Survey (Reconnaissance), Fremont, California. The purpose of the City of Fremont, Postwar Development and Architecture Historic Context Statement, 1945-1970 was to assist the City in the identification, evaluation, and protection of potential historic resources representing the City's development and architecture dating from the post-World War II period through 1970. Ms. Lyons was the lead author of the Context Statement. She conducted research, authored a historic context statement, co-conducted a reconnaissance survey, and identified properties for further study. (2015-2018)

City of West Hollywood Commercial Properties Historic Context Statement and Historic Resources Survey (Intensive), West Hollywood, California. The City of West Hollywood completed the Commercial Survey as an update to the initial citywide survey conducted in 1986. The Commercial Survey focused on commercial, institutional, and industrial structures built before 1975. The project was completed in the fall of 2016. Ms. Lyons conducted research, co-conducted fieldwork, co-authored historic context statement, documented potential historic resources on inventory forms using the RuskinARC database, and prepared the final survey report. She

presented multiple times at public meetings for the project. In conjunction with the project, a new website was developed. The project was awarded the California Governor's Historic Preservation Award and the California Preservation Foundation Preservation Design Award. (2015–2017)

New Monterey Historic Context Statement and Reconnaissance Survey, Monterey, California. The City of Monterey received a $25,000 grant from the State Office of Historic Preservation (OHP) for the preparation of a Historic Survey and Context Statement for the New Monterey commercial and residential neighborhood. The historic context statement identified the themes in the historical development of this area significant at local, state, and national levels, established periods of historical significance, identified associated property types with their character-defining features, and established evaluation criteria and integrity thresholds for important property types sufficient to provide a framework for evaluating resources individually and as district contributors for the National, California, and local registration programs. Ms. Lyons conducted research, co-conducted a reconnaissance survey, created GIS files for integration with the city's map system, drafted sections of historic context statement, and documented potential historic resources on DPR forms. (2012)

Alta Heights Historic Resources Survey (Intensive), Napa, California. The Alta Heights Neighborhood of Napa is located on the east side of the Napa River. It was originally settled primarily after the turn of the century. After the Great Quake of 1906 in San Francisco, many Italian families moved to an area in northern Alta Heights, which came to be known as Little Italy. The neighborhood has varied architecture representing multiple periods of development. As part of a historical resources survey of the neighborhood, Ms. Lyons conducted research, co-conducted fieldwork, and documented potential historic resources on DPR forms. (2011)

SurveyLA, Los Angeles Citywide Historic Context Statement, Los Angeles, California. Los Angeles's citywide historic context statement provides the framework for identifying and evaluating the City's historic resources. The document, created as part of SurveyLA, identifies important themes in the City's history and development. In addition to work on the fieldwork surveys, Ms. Lyons conducted research and authored several themes within the context. She was the lead author for two themes addressing architectural styles and all sub-themes: "Period Revival, 1919-1950" and "Late 19th and Early 20th Century Residential Architecture, 1865-1950." She also contributed to themes developed for two ethnic and cultural communities in Los Angeles. For the "African-Americans in Los Angeles" theme she wrote sub-themes on "Health and Medicine" and "Social Clubs." For the theme addressing "Jews in Los Angeles," she wrote sub-themes on "Religion and Spirituality," "Social Clubs," and the "Entertainment Industry." Ms. Lyons also peer-reviewed "American Colonial Revival, 1895-1960." During Group 1 surveys she identified and named a sub-theme "Asian Eclectic, 1920-1980," which was later developed for the "Exotic Revival, 1900-1980" theme. (2015–2019)

SurveyLA: Group 5 Survey, Westchester-Playa Del Rey Community Plan Area Historic Resources Survey (Intensive), Los Angeles, California. As part of SurveyLA, Ms. Lyons conducted research, co-conducted the fieldwork, and recorded the eligible historic resources using FiGSS, a custom-designed GIS-based database. Following fieldwork, Ms. Lyons wrote the survey report for the Community Plan Area. (2013)

SurveyLA: Group 4 Survey, South San Fernando Valley Community Plan Areas Historic Resources Survey (Intensive), Los Angeles, California. As part of SurveyLA, Ms. Lyons conducted research, co-conducted the fieldwork, including reconnaissance surveys, and recorded eligible historic resources using FiGSS, a custom-designed GIS-based database. She served as manager for North Hollywood-Valley Village Community Plan Area. Following fieldwork, Ms. Lyons wrote the survey report for the Community Plan Area. (2012–2013)

SurveyLA, Bullet-Point Description Database Feature Historic Resources Survey (Intensive), Los Angeles, California. SurveyLA, the City of Los Angeles' comprehensive historic resources survey, utilized a custom-designed,

GIS mobile field survey database called the Field Guide Survey System, or FiGSS. The Citywide context statement was converted into data fields and preloaded into the FiGSS. Ms. Lyons worked with the app developers from the Getty Institute and GIS specialists from the City of Los Angeles to create a supplemental data entry window for FiGSS to generate DPR forms using drop-down menu options to standardize building descriptions and evaluations of significance. (2011–2012)

SurveyLA: Group 2 Survey, South and Southeast Los Angeles Community Plan Areas Historic Resources Survey (Intensive), Los Angeles, California. As part of SurveyLA, Ms. Lyons conducted research, co-conducted the fieldwork, and recorded eligible historic resources using FiGSS, a custom-designed GIS-based database. Following fieldwork, Ms. Lyons wrote the survey report for the Community Plan Area. (2011–2012)

SurveyLA: Group 1 Survey, West Adams- Baldwin Hills - Leimert Park Community Plan Area Historic Resources Survey (Intensive), Los Angeles, California. As part of SurveyLA, Ms. Lyons conducted research, co-conducted the fieldwork, and recorded eligible historic resources using FiGSS, a custom-designed GIS-based database. Following fieldwork, Ms. Lyons wrote the survey report for the Community Plan Area. (2010–2011)

Hollywood Redevelopment Project Area Historic Context Statement and Historic Resources Survey (Intensive), Los Angeles, California. The Community Redevelopment Agency of the City of Los Angeles developed historic context statements and intensive-level assessment surveys for three areas of Los Angeles: Hollywood, Westlake, and Wilshire/Koreatown. Firms worked closely with the City's Office of Historic Resources staff to dovetail survey findings into the SurveyLA project that began two years later. As an intern with Chattel, Inc., Ms. Lyons contributed to the Hollywood Historic Context Statement, writing themes on education, film noir, and radio. She also assisted with fieldwork and documentation of potential historic resources. (2008–2009)

San Vicente Apartment District Historic Resources Survey (Intensive), Santa Monica, California. The San Vicente Apartment District comprises several blocks of courtyard apartments built between the 1930s and 1970s. Ms. Lyons completed fieldwork, photo documentation, and preliminary research on the district to determine if the buildings retained integrity to merit further evaluation as a potential historic district in the vicinity of a development site. (2008)

Folk Victorian Cottages of Memphis Historic Resources Survey (Reconnaissance), Memphis, Tennessee. As an intern at the Memphis Landmarks Commission, conducted research, photographed representative properties, and drafted a brief report on typical Folk Victorian Cottages in the City of Memphis. (2007)

Historical Resource Technical Reports, Historical Resource Evaluations, and Impacts Analysis

Redevelopment Site Historical Resource Evaluation and Impacts Analysis

150 E. Colorado Boulevard Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Pasadena, California. Ms. Lyons complete a completed historic resource evaluation of a commercial office building proposed for demolition. The building dated to the late 1970s. Ms. Lyons also analyzed the potential for a proposed new residential development on the site to impact adjacent historical resources. (2021)

1161 Virginia Road Rehabilitation Project Historical Resource Evaluation with Character-Defining Features Identification, San Marino, California. Ms. Lyons completed a historic resource evaluation of a Beaux-Arts mansion designed by master architect Robert Farquhar. The report included sections that clarified the construction history of the property and identified character-defining features to help inform designs for alterations to the property. (2020)

2862 S. Campus Avenue Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Ontario, California. A new residential development was proposed for a site occupied by a dairy farm with buildings dating to the early 1920s. Ms. Lyons completed a historic resource evaluation of the dairy farm to determine if the development would result in impacts on historical resources. (2020)

676 Moss Street Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Chula Vista, California. Ms. Lyons completed a historical resource evaluation and impacts analysis for a redevelopment site of industrial buildings in Chula Vista. She also identified the potential for the project to cause indirect and/or cumulative impacts to adjacent historical resources. (2020)

City of Hope, Lot G Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Duarte, California. Ms. Lyons completed historical resource evaluations of single-family homes dating from the 1940s and 1950s that were proposed for demolition to construct a new parking lot. (2020)

11th and Hill Street Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons completed a historical resource evaluation and impacts analysis for a redevelopment site in downtown Los Angeles. She also identified the potential for the project to cause indirect and/or cumulative impacts to adjacent historical resources. (2019)

5101 Ocean Blvd/Ripples Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Long Beach, California. Ms. Lyons wrote a Historical Resource Evaluation Report for a substantially altered building in Long Beach that had historical associations with early drag bars and gay clubs in Long Beach. (2019)

8377 Blackburn Avenue Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Three apartment buildings dating to the 1930s were proposed for demolition. Ms. Lyons prepared a historic resource evaluation to verify that the project site did not contain historic resources and the project would not have a significant impact on adjacent properties previously identified as historic resources. (2019)

City of Hope New Hope Village Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Duarte, California. The City of Hope hospital proposed to construct a hotel and meeting room in the northwest section of the City of Hope campus in Duarte. Ms. Lyons evaluated existing buildings dating to the 1970s within New Hope Village before their demolition. (2019)

Bridewell Armory/Highland Park Jr. Art Center Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. The California National Guard Armory in Highland Park, also known as the Bridewell Armory, is the only one of the 57 armories constructed throughout California between 1949 and 1954, that was built within the city limits of Los Angeles. It was identified by SurveyLA as eligible for listing on the National Register of Historic Places. The Bridewell Armory was in continual use by the California National Guard until the mid-1990s. Plans were underway for the adaptive reuse of the building as the Highland Park Jr Art Center. Ms. Lyons completed a thorough historic resource evaluation and impacts analysis of the property and the rehabilitation plans. (2018)

1359 N. Western Avenue (Deluxe Hollywood) Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. The Deluxe Hollywood project involved the construction and development of a seven-story mixed-use commercial and residential building with a total of 203 multi-family residential units and up to 14,231 square feet of commercial space at the ground level. Ms. Lyons assisted with the preparation of a Mitigated Negative Declaration, primarily responding to public comments. (2018)

6300 W. Third Street Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons completed a historic resource evaluation of a large commercial development from the 1950s and 1960s proposed for redevelopment. Ms. Lyons also identified historical resources in the vicinity of the proposed project site and analyzed the potential for the proposed project to impact historical resources according to CEQA thresholds for determining impacts. (2018)

Angel's Landing Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons worked with attorneys for the development team behind Angel's Landing, a proposed 64-story skyscraper and a 42-story high-rise located between Bunker Hill and the Historic Core of downtown Los Angeles. Ms. Lyons prepared a historic resource evaluation and impacts analysis for the vacant project site. The evaluation involved the identification of historical resources in the vicinity and assessment of impacts on numerous adjacent historical resources and historic districts listed on the NRHP, including Angel's Flight funicular railway and the Broadway Theater and Commercial District. (2018–2020)

Artisan, 1520 Ivar Avenue Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. The Artisan project involved the construction of a 25-story residential and commercial tower in the center of Hollywood. The project site was mostly a vacant surface parking lot. Ms. Lyons verified that the project site did not contain historic resources and would not have a significant impact on adjacent properties identified as historic resources. Ms. Lyons prepared a Historic Resource Evaluation Report and analysis of project impacts using the Secretary of the Interior's Standards. She also participated in public outreach with Hollywood Heritage. (2018–2021)

Sunset Junction Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. A redevelopment project was proposed for Sunset Junction, a confluence of multiple streets in the Echo Park area of Los Angeles. Development surrounding the proposed project comprised residential and commercial buildings from the 1920s through 1940s. Ms. Lyons completed a historical resource evaluation and impact analysis to determine if the project would impact historical resources on the project site or within the vicinity of the project site. (2018)

Union Street Condominiums Redevelopment Project Historical Resource Evaluation and Impacts Analysis (for CEQA), Pasadena, California. The Union Street Condominiums is a mixed-use development adjacent to the Old Pasadena District, listed on the National Register of Historic Places. Ms. Lyons assisted with analyzing project impacts through a review of proposed project designs for compliance with the Secretary of the Interior's Standards. (2018)

Violet and 7th Street Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons wrote a historic resource evaluation for a large redevelopment site in the Arts District of downtown Los Angeles. She identified historical resources on the project site and in the vicinity of the project and evaluated direct, indirect, and cumulative impacts for the adaptive reuse of a 1910s industrial building. (2018–2019)

1141-43 N. Detroit Avenue Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), West Hollywood, California. Ms. Lyons completed a historic resource evaluation of low-density residential buildings from the 1920s on a project site proposed for redevelopment. The buildings were proposed for demolition. Ms. Lyons also identified historical resources in the vicinity of the proposed project site and analyzed the potential for the proposed project to impact historical resources according to CEQA thresholds for determining impacts. (2017)

4765-73 Hollywood Boulevard Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons prepared a historic resource evaluation to verify that the project site did not contain historic resources and the project would not have a significant impact on adjacent properties identified as historic resources. (2017)

SunWest (Sunset and Western) Multi-Family Residential Building Development Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons prepared a historical resource evaluation to determine if a proposed new residential development would directly or indirectly impact any historical resources subject to CEQA. The evaluation included the identification and assessment of potential impacts on historical resources on the project site and in the vicinity. Existing development included the St. Andrews Bungalow court and a residence previously identified by CRA survey of Hollywood. (2017)

Neill Lehr Cadillac Dealership Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. The Neill Lehr Cadillac Dealership, a Mid-Century Modern showroom, was identified as a historical resource during SurveyLA. A redevelopment project was proposed for the site. Ms. Lyons completed a historical resource evaluation of the 1960s automobile showroom to inform plans about components of the dealership that would be retained as part of the new development. (2016)

1056 La Cienega Boulevard Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons provided research and evaluation assistance for a historic resource evaluation of a Richard Neutra-designed commercial building in the Mid-City area of Los Angeles. (2016)

1440, 1442 and 1452 Gordon Street Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons completed a historic resource evaluation of low-density residential buildings from the 1910s and 1920s on a project site proposed for redevelopment. The buildings were proposed for demolition. Ms. Lyons also identified historical resources in the vicinity of the proposed project site and analyzed the potential for the proposed project to impact historical resources according to CEQA thresholds for determining impacts. (2016)

2222 S. Figueroa Street Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons completed a historic resource evaluation of commercial buildings from the 1920s on a project site proposed for redevelopment. The buildings were proposed for demolition. Ms. Lyons also identified historical resources in the vicinity of the proposed project site and analyzed the potential for the proposed project to impact historical resources according to CEQA thresholds for determining impacts. (2016)

6530 Sunset Boulevard Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. The commercial building at 6530 Sunset Boulevard is a Spanish Colonial Revival style building in Hollywood with storefronts opening onto a courtyard. Since the building was completed, several restaurants and bars had been tenants in the various storefronts. Ms. Lyons conducted substantial research into the historic uses of the commercial building. This research was presented in a memorandum used for a permit application to support the continued use of areas of the building for food and beverage service. (2016)

736-38 and 742 N. Parkman Avenue Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons completed a historical resource evaluation and impacts analysis for a redevelopment site of low-density residential buildings from the 1910s and 1920s. She also identified the potential for the project to cause indirect and/or cumulative impacts to adjacent historical resources. (2016)

Los Angeles Wholesale Flower Terminal Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Alston + Bird proposed to develop the property at 755 Wall Street (also known as 742 Maple Street) in the Central City Community Plan Area of the City of Los Angeles. Ms. Lyons completed a historic resource evaluation of industrial buildings from the 1960s and 1980s. The Flower Terminal was historically associated with a significant organization; however, extant buildings did not reflect this association. (2016–2017)

The 1860, Western Avenue and Franklin Avenue Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons prepared a historical resource evaluation to determine if a proposed new residential development would directly or indirectly impact any historical resources subject to CEQA. The evaluation included the identification and assessment of potential impacts on historical resources on the project site and in the vicinity. Existing development primarily comprised low-density residential buildings from the 1910s and 1920s. (2016)

1309 and 1319 Dexter Avenue Redevelopment Site Historical Resource Evaluation, Seattle, Washington. Ms. Lyons assisted with the preparation of a historic resource evaluation to comply with local landmarks review before the demolition of a residential building from the 1920s. (2014)

954 5th Street Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Santa Monica, California. Ms. Lyons completed a historical resource evaluation and analysis of impacts for a proposed rear addition to a building constructed more the 40 years ago. She participated in substantial design collaboration as part of mitigation measures to ensure the project would not adversely impact historical resources. (2014–2015)

Virginia and 21st Street, Santa Monica Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Santa Monica, California. Ms. Lyons completed a historic resource evaluation of 1950s apartment buildings as part of a local landmarks review. (2014)

Wilshire and Valencia Historic Resources Evaluation Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Ms. Lyons prepared a historic resource evaluation of three buildings before their demolition. (2013)

3945 Whittier Boulevard Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), East Los Angeles, California. Ms. Lyons prepared historic resource evaluation and DPR forms for the community health clinic undergoing substantial alterations. (2011)

YMCA of Redlands Redevelopment Site Historical Resource Evaluation and Impacts Analysis (for CEQA), Redlands, California. In the 1920s, three prominent architects - Marston, Van Pelt, & Mayberry - designed a building for the YMCA of Redlands. As alterations were planned for the building, Ms. Lyons prepared a historic resource evaluation to assist with the local city planner's review of the project for the potential to impact historical resources. (2011)

Rehabilitation Project Historical Resource Evaluation and Impacts Analysis

Times Mirror Square Rehabilitation Project Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. Times Mirror Square comprises buildings and additions constructed for the Los Angeles Times and Time Mirror companies in downtown Los Angeles. The buildings were constructed over several decades. Ms. Lyons worked on several aspects of documentation of Time Mirror Square, including writing historic context sections on the history of the Los Angeles Times, Times Mirror Company, and prominent individuals associated with the company for the CEQA report and Historic Structure Report. Ms. Lyons also assisted with the Historic American Buildings Survey (HABS) documentation of the complex that was completed to fulfill a mitigation measure. (2017)

Morrison Hotel Rehabilitation Project Historical Resource Evaluation and Impacts Analysis (for CEQA), Los Angeles, California. The Morrison Hotel is located in the South Park area of downtown Los Angeles. Built in 1914 and designed by Morgan and Walls, the four-story building was made famous by a Doors album of the same name, which used a picture taken of the band behind a lobby window at the hotel for its cover art. The hotel fell into disrepair after years of use as single room occupancy housing. A new owner proposed a rehabilitation project at the hotel. Ms. Lyons completed a historical resource evaluation of the property, identifying character-defining features to assist with the initial design development and ensure plans would conform with the Secretary of the Interior's Standards for Rehabilitation. (2017)

San Vicente Inn Rehabilitation Project Historical Resource Evaluation and Impacts Analysis (for CEQA), West Hollywood, California. The San Vicente Inn includes a collection of wood-frame buildings dating to the early years of West Hollywood. Ms. Lyons completed supplemental historic resource evaluations and participated in public meetings for local review of a proposed adaptive reuse project for the Inn. (2013–2015)

Historical Resource Technical Report

8730 Sunset Boulevard Billboard Project Historical Resource Assessment Report, City of West Hollywood, California. The 8730 Sunset Boulevard Billboard Project consists of installation and operation of a new billboard and associated façade improvements at the existing "Sunset Towers" building. The Sunset Towers building at 8730 Sunset Boulevard was constructed in the 1950s and 1960s over the course of two phases. A smaller building was constructed on the northern portion of the parcel between 1957 and 1959. Dudek was retained by the City of West Hollywood to complete this Historic Resource Assessment, an intensive-level evaluation, as part of the environmental review of the proposed project in compliance with CEQA. This study included an intensive survey of the exterior of the Sunset Towers building by a qualified architectural historian; building development and archival research; development of an appropriate historic context; and evaluation of the Sunset Towers building for historical significance and integrity in consideration of NRHP, CRHR, and City of West Hollywood Cultural Heritage Preservation Ordinance designation criteria. Ms. Lyons served as a senior architectural historian and main author of the Historic Resource Assessment of the Sunset Towers building. (2021)

Vermont Corridor Development Plan Historical Resource Technical Report, Los Angeles, California. Ms. Lyons prepared a historical resource evaluation to determine if the Vermont Corridor Development Plan would directly or indirectly impact any historical resources subject to CEQA. The evaluation included the identification and assessment of potential impacts on historical resources on the project site and in the vicinity. (2017)

Sixth Street Park, Arts, River, and Connectivity (PARC) Improvements Project Historical Resource Technical Report, Los Angeles, California. The Sixth Street Viaduct Division of the City of Los Angeles Department of Public Works, Bureau of Engineering, in coordination with the California Department of Transportation, proposed to create a public space in areas beneath and around the new Sixth Street Viaduct between Mateo Street to the west and US-101 to the east in the City of Los Angeles. Ms. Lyons worked with the GPA's team of environmental consultants to prepare Section 106 and CEQA technical reports and Cultural Resources Chapter for the project Environmental Impact Report. (2017)

ArtCenter College of Design Master Plan Environmental Impact Report Historical Resource Technical Report, Pasadena, California. The Master Plan for ArtCenter College in the City of Pasadena addressed the school's two campuses: Hillside Campus, designed by noted Modernist Craig Ellwood, and South Campus, a collection of buildings in an urban setting. Ms. Lyons prepared a Historic Resource Technical Report as part of the environmental review, evaluating both campuses to determine the impacts of the proposed master plan on historic resources. (2016–2016)

City of Hope Specific Plan Environmental Impact Report Historical Resource Technical Report, Duarte, California. GPA assisted the City of Hope in preparing a specific plan for their 116-acre campus in the City of Duarte. Ms. Lyons completed a historic context, survey, documentation, and evaluation of buildings more than 45 years of age on a medical campus containing buildings from the 1920s through 2010s. (2015)

San Diego Veterans Administration (VA) Master Plan Historical Resource Technical Report, San Diego, California. Leo Daley worked with the Veterans Administration to develop a master plan for the campus of the VA San Diego Healthcare System. Working with Chattel, Inc., Ms. Lyons assisted with research, historic resource survey, and fieldwork documentation of the Main Building and Administration Building as part of an evaluation of potential historical resource impacts for the new master plan. (2014)

Flintridge Sacred Heart Master Plan Environmental Impact Report Historical Resource Technical Report, La Canada Flintridge, California. The campus of Flintridge Sacred Heart Academic was originally constructed as a hilltop hotel in the 1920s and 1930s. Ms. Lyons completed a historic resource survey and historic resource evaluation identifying significant buildings and character-defining features of the school campus to be retained as part of planning for the new campus master plan. (2013–2014)

Pomona Corridors Specific Plan Area Environmental Impact Report Historical Resource Technical Report, Pomona, California. The Pomona Corridors Specific Plan encompassed an area of varied development. Ms. Lyons conducted a reconnaissance survey and prepared Department of Parks and Recreation forms for eligible historic resources in the Area of Potential Effects of a roadwork project. (2012)

BIOLA University Master Plan Environmental Impact Report Historical Resource Technical Report, La Mirada, California. The campus of BIOLA University in the City of La Mirada dates to the 1960s. As part of a campus-wide master plan, Ms. Lyons completed a historic resource survey of the college campus. (2012)

Claremont McKenna College Master Plan Environmental Impact Report Historical Resource Technical Report, Claremont, California. Claremont McKenna College is a private liberal arts college in Claremont, California. The college was founded in 1946. Working with Architectural Resources Group, Ms. Lyons prepared a Historic Resource Report for the college's proposed Master Plan. Ms. Lyons completed a historic resource survey and documented buildings dating from the campus's initial construction in the 1940s. (2011–2012)

Local Landmark Nominations and Mills Act Contracts

Anne Banning Community House of the Assistance League of Southern California, 1370 St Andrews St. Historic-Cultural Monument Application, Los Angeles, California. Paul R. Williams designed a Community House for the Assistance League of Southern California, a leading Los Angeles philanthropy, in 1961. The two-story, American Colonial Revival-style Anne Banning Community House served the League's need for a business environment combined with gracious, elegant space for entertaining—teas, luncheons, and privately hosted events. Adaptive reuse of the building was proposed in 2017 and Ms. Lyons completed a City of Los Angeles Historic-Cultural Monument application for the building before construction, identifying the property as significant for its association with an important women's club and architecturally significant as a good example of the Late American Colonial Revival style designed by the master architect Paul R. Williams. (2018–2020)

Four Gables Apartment Building Historic Structure Report and Mills Act Contract Application, West Hollywood, California. The Four Gables apartment building was designed by Leland A. Bryant in a French Chateauesque style. The 16-unit apartment building was completed in 1927. Ms. Lyons prepared an Architectural Features and Treatment Recommendations report as part of an application for a Mills Act contract with the City of West Hollywood. (2019)

Haddon Hall Historic Structure Report and Mills Act Contract Application, Los Angeles, California. Haddon Hall is a brick apartment building in the Wilshire/Koreatown area of Los Angeles. It was designed by master architect S. Charles Lee in the 1920s. Ms. Lyons completed a City of Los Angeles Historic-Cultural Monument application, application for a Mills Act contract, and a Historic Structures Report ahead of a renovation project for the building to ensure the changes would not diminish the integrity of the historic building. (2014–2015)

El Royale Historic Structure Report and Mills Act Contract Application, Los Angeles, California. The El Royale is a historic high-rise apartment building in the Hancock Park neighborhood of Los Angeles. It was designed by architect William Douglas Lee and completed in 1929. Ms. Lyons assisted a team in writing a historic structures report for the building as part of the application for a Mills Act contract. (2013)

Mills Act Applicant Inspections, Los Angeles, California. While working as a consultant to the City of Los Angeles for preapproval inspections of houses whose owners were applying for Mills Act contracts, Ms. Lyons recognized a need to inform property owners about the requirements of the Mills Act program and professional standards for rehabilitation. Ms. Lyons proposed the City develop an applicants' workshop, which would educate applicants and streamline the inspection process. The Mills Act contract applicants' workshop increased the quality of the proposed work plans and significantly reduced the time consultants needed to inspect each property. The workshop is now an integral part of the Mills Act program in cities across the state of California. (2013–2015)

Due Diligence

2501-2525 Wilshire Boulevard Due Diligence Memorandum, Santa Monica, California. As part of due diligence for a potential buyer of a one-story commercial block comprising buildings over 45 years of age, Ms. Lyons completed a review of the potential for buildings on the block to be identified as historical resources. (2020)

Orange County Transit Authority Bus Route Due Diligence Memorandum, Anaheim, California. Ms. Lyons completed fieldwork documentation and a reconnaissance survey to inform future planning efforts for transit routes across multiple cities in Orange County. (2020)

15000 Aviation Boulevard Due Diligence Memorandum, Hawthorne, California. Ms. Lyons was part of a team assembled to bid for purchase and redevelop a Federal Aviation Administration building and landscape designed by master architect Cesar Pelli. (2019)

Arcade Cameo Roxie Theaters Due Diligence Memorandum, Los Angeles, California. Ms. Lyons worked with potential buyers who were interested in the adaptive reuse of three historic theaters on Broadway in downtown Los Angeles. (2014)

Green Building Materials Due Diligence Memorandum, New York, New York. As an intern at the New York City Landmarks Preservation Commission, Ms. Lyons conducted research and drafted a memorandum on building materials made from recycled materials for compatibility in New York City's historic districts. (2009)

As-Needed Historic Research Consultant On Call Services, Coronado, California. Dudek is currently working with the City of Coronado Community Development Department to provide historic preservation services on an as-needed basis. Services scoped under the current contract include historic resources surveys; archival research; preparation of evaluation reports in consideration of National Register of Historic Places, California Register of Historical Resources, and City of Coronado designation criteria; attendance at Historic Resource Commission and City Council hearings; and review of projects for conformance with the Secretary of the Interior's Standards for Rehabilitation. Since January 2019, Dudek has completed 20 work orders for the city. Ms. Lyons serves as a senior architectural historian for the historical resource evaluation task orders and is responsible for quality assurance/quality control of specific deliverables. (2021–Present)

Mitigation and Interpretation

Long Beach Armory HABS Documentation, Long Beach, California. The 26,530 square-foot Armory building was built by the California Army National Guard in 1930 and was decommissioned in 2018. A private developer proposed a rehabilitation project that would incorporate the historic Armory building into a larger development of residential buildings with affordable housing. Ms. Lyons helped fulfill a mitigation measure to complete HABS Documentation of the Armory building before the rehabilitation. Ms. Lyons peer-reviewed narrative documentation prepared by colleagues at GPA Consulting and worked with photographer Stephen Schaeffer to establish views for the photographs that were submitted to the Library of Congress. (2019)

Sequoia Field Documentary Film (Mitigation Measure), Visalia, California. Created narrative, research, and filmed a brief documentary film about the history of a World War II pilot training school that became a prison. The property is listed on the National Register of Historic Places. The brief documentary was prepared as part of a mitigation measure before the demolition of some contributing buildings. (2019)

Hughes Industrial Historic District Website (Mitigation Measure), Playa Vista, California. While at GPA Consulting, Ms. Lyons assisted the Ratkovich Company with the redevelopment of the Hughes Industrial Historic District. The former home of Hughes Aircraft, the district had been previously determined eligible for listing in the National Register of Historic Places. GPA prepared a Historic Resource Treatment Plan (HRTP), which documented the history and significance of the district, identified the character-defining features of the eleven contributing buildings and made recommendations for their treatment, and provided guidelines for rehabilitation and new construction. Additional services included reviewing plans for compliance with the HRTP, construction monitoring, and creating a website on the history of the district. Ms. Lyons collaborated with a team of website designers, property owners, and leasing agents to create a website providing information on the history of the Hughes Industrial Historic District, from its association with eccentric company founder Howard Hughes, to its early incarnation as a center of Southern California's defense and aviation industries, and finally to its recent rebirth as a film production facility and the Hercules Campus, a tech campus for several prominent Silicon Beach companies. (2017)

I. Magnin & Company Building, 3240 Wilshire Boulevard HABS Documentation, Los Angeles, California. Ms. Lyons assisted with the mitigation measure calling for documentation of the building following the National Park Service's HABS format. Working with the GPA team and sub-consultants, she prepared written historical records, managed photography (establishing views), and prepared documentation for transmittal. (2017)

Ace Gallery HABS Documentation, Beverly Hills, California. A substantially altered commercial building used as an art gallery was proposed for demolition to accommodate staging areas needed for the construction of the Metro Purple Line Extension along Wilshire Boulevard. The building was constructed in the 1920s. Master architect Sidney Eisenshtat designed a Brutalist concrete façade for the building in the 1970s. Ms. Lyons prepared HABS narrative documentation of the building with Brutalist concrete façade on Wilshire Boulevard, fulfilling a mitigation measure before the demolition. (2016)

James K. Van de Kamp (La Loma Road) Bridge Rehabilitation Historic American Engineering Record (HAER)-like documentation, Pasadena, California. Ms. Lyons prepared a Historic American Engineering Record (HAER) report for the historic La Loma Road bridge in the Arroyo Parks and Recreation National Register Historic District. The report was completed as mitigation in compliance with Section 106. Ms. Lyons' contributions included the preparation of a written historical and descriptive data report as well as coordinating the photographic documentation. Since renamed the John K. Van de Kamp Bridge, the project received a Preservation Design Award from the California Preservation Foundation and a Historic Preservation Awards from the City of Pasadena's Historic Preservation Commission. (2015)

National Register of Historic Places Nomination

Nickerson Gardens National Register of Historic Places Nomination, Los Angeles, California. Nickerson Gardens is an expansive public housing complex designed by master architect Paul Revere Williams and completed in 1955. The complex is owned and managed by the Housing Authority of the City of Los Angeles. Ms. Lyons conducted fieldwork and research, and prepared the NRHP Nomination for the property under the Multiple Property Documentation Form for Garden Apartment Complexes in the City of Los Angeles. (2020)

North Beach Historic District National Register of Historic Places Nomination and Plaque Program, San Clemente, California. Founded in 1925, San Clemente was one of the first new master-planned towns in California. The North Beach Historic District occupies a prominent location as the historic northern tip of the City of San Clemente along North El Camino Real. The North Beach Historic District was listed on the National Register of Historic Places at the local level of significance under Criterion A in the areas of Community Planning and Development and Entertainment/Recreation. The district features five historic contributing resources designed in the Spanish Colonial Revival style with a period of significance between 1927-1946. Ms. Lyons served as project manager for the National Register of Historic Places nomination of the district and a concurrent, Certified Local Government (CLG) grant-funded project with the City of San Clemente to create content and designs for signage across the district and informational postcards featuring historic images. (2020)

Feather Leaf Inn National Register of Historic Places Nomination, review, St. Croix, US Virgin Islands. The Feather Leaf Inn on St. Croix in the US Virgin Islands is located in buildings that remain from a historic sugar plantation. The plantation was listed on the National Register of Historic Places for its architectural significance. The owners of the Feather Leaf Inn wanted to update the nomination to include information about the social history of the property, addressing the history of enslaved people. Ms. Lyons worked with the property owners to begin the process of updating the nomination, primarily identifying resources and archival materials on the Danish colonial history of the US Virgin Islands. (2018–2020)

Great Wall of Los Angeles National Register of Historic Places Nomination, Los Angeles, California. The Great Wall of Los Angeles is one of the world's largest murals and a significant artwork from the 1970s Chicano mural movement. The mural was designed by noted Chicana artist Judith Baca and executed with the help of over 400 community youth and artists coordinated by the Social and Public Art Resource Center (SPARC). It was Baca's first mural and SPARC's first public art project. The mural is painted on the western side of the Tujunga Wash in the Sherman Oaks area of Los Angeles. Ms. Lyons prepared the National Register of Historic Places Nomination for the Great Wall of Los Angeles under the Multiple Property Documentation Form for Latinos in 20th Century California. (2016)

National Chicano Moratorium National Register of Historic Places Nomination, Los Angeles, California. The Chicano Moratorium was a movement of Chicano anti-Vietnam war activists that built a coalition of Mexican-American groups to organize opposition to the Vietnam War, primarily marches. The legacy of the movement, which highlighted the unequal treatment of Mexican-Americans in multiple facets of American society, was the

creation of community organizations that advocated for health and educational services. Ms. Lyons prepared a Multiple Property Documentation form and individual National Register of Historic Places nominations for five buildings and sites associated with the National Chicano Moratorium anti-Vietnam War protests. Sites included routes for marches held in 1969 and 1970, the Silver Dollar Café (site of Ruben Salazar's death), Brown Beret headquarters, and East Los Angeles Free Clinic. (2015–2018)

Intercultural Council Houses at CMC Peer Review of National Register of Historic Places nomination, Claremont, California. The Intercultural Council Houses was a grouping of twelve small homes constructed around a communal yard in 1947. The property comprising all twelve homes was nominated for listing on the National Register of Historic Places under Criterion A for an association with Latino civil rights and anti-segregation movements in greater Los Angeles. Ms. Lyons completed a peer review of the National Register nomination for the owner of the property. (2014)

West Los Angeles Veterans Administration, National Register of Historic Places Nomination, Los Angeles, California. Ms. Lyons assisted with writing updates to the National Register of Historic Places nomination for the Veterans Administration campus comprising over 300 acres. The campus includes a cemetery and buildings dating to several phases of development from the 1890s through the 2010s. (2013–2014)

Memphis Slim House National Register Nomination National Register of Historic Places Nomination, Memphis, Tennessee. Memphis Slim was an American blues pianist, singer, and composer. Born in Memphis, Tennessee, he spent his most productive years in Chicago and Paris. A house in the Soulsville neighborhood of Memphis was thought to be connected to him. Ms. Lyons completed a National Register of Historic Places nomination for the house. (2007)

Professional Peer Review

2550 Peralta Boulevard Historical Resource Evaluation Report Peer Review, Fremont, California. Ms. Lyons completed a peer review of a report evaluating whether or not a building proposed for adaptive reuse as a school was eligible for listing as a historical resource. (2018)

Cloverleaf Family Bowl Historical Resource Evaluation Report Peer Review, Fremont, California. The Cloverleaf Family Bowl was identified as a potential historical resource during fieldwork for the Postwar Development and Architecture in Fremont, Historic Context Statement. Ms. Lyons completed a peer review of a Landmark Evaluation for the property. She attended multiple public hearings related to determine if the building was a historical resource for the purposes of CEQA. (2018)

Historical Resource Treatment Plans, Impacts Analysis (Secretary of the Interior's Standards Compliance Review)

Athens Park Aquatics Facility Renovation Project Historical Resource Treatment Plan and Impacts Analysis (Secretary of the Interior's Standards Compliance Review), Los Angeles, California. The County of Los Angeles proposed a rehabilitation project at the Aquatics Facility at Athens Park, a park determined eligible for listing in the National Register of Historic Places. Ms. Lyons worked with the architect for the project on two phases of work. In advance of the development of project plans, Ms. Lyons prepared a Preservation Plan for the Aquatics Facility to establish the opportunities and constraints for the rehabilitation. After project plans were prepared, Ms. Lyons reviewed the project plans for compliance with the Secretary of the Interior's Standards for Rehabilitation and made recommendations for modifications to ensure the project plans complied with the Standards. (2020–2021)

Rives Mansion Rehabilitation Project Historical Resource Treatment Plan, Impacts Analysis (Secretary of the Interior's Standards Compliance Review), and Construction Monitoring, Downey, California. Working with the City of Downey, Ms. Lyons collaborated with the project architect for a renovation and rehabilitation project at the Rives Mansion, a historic mansion and walnut farm. In advance of the development of project plans, Ms. Lyons prepared a Preservation Plan for the property to establish the opportunities and constraints for the rehabilitation. After project plans were prepared, Ms. Lyons reviewed the plans for compliance with the Secretary of the Interior's Standards for Rehabilitation and made recommendations for modifications to ensure the project plans complied with the Standards. Ms. Lyons also performed periodic construction monitoring. (2019–2021)

433 N. Camden Avenue Secretary of the Interior's Standards Compliance Review, Beverly Hills, California. Ms. Lyons prepared a historic resource evaluation for a building designed by master architect Sidney Eisenshtat and previously identified as a potential historical resource in the City of Beverly Hills (2019)

Farmers & Merchants Bank Historical Resource Treatment Plan, Los Angeles, California. Los Angeles' Farmers & Merchants Bank was first incorporated in 1871. In 1905, the bank constructed a Classical Revival style designed by Morgan & Walls. In the early stages of planning for a potential rehabilitation project of the buildings' interior public spaces, Ms. Lyons acted as a liaison between the design team and the City of Los Angeles' Office of Historic Resources. She guided the team in the preparation of a historic structures report to guide design decisions; engaged in design collaboration with the project team; and prepared a review of plans for conformance with the Secretary of the Interior's Standards. (2017)

Hollywood Roosevelt Hotel Historical Resource Treatment Plan, Los Angeles, California. In the early stages of planning for a potential rehabilitation project of interior public spaces, Ms. Lyons acted as a liaison between the design team and the City of Los Angeles' Office of Historic Resources. She prepared a historic structures report to guide design decisions for hotel renovations; engaged in design collaboration with the project team; and prepared a review of plans for conformance with the Secretary of the Interior's Standards. (2017)

Villa Primavera, 1300 N. Harper Avenue, West Hollywood - parking addition Secretary of the Interior's Standards Compliance Review, West Hollywood, California. This Spanish-style courtyard apartment building was built and designed by noted developers Arthur and Nina Zwebell. It is considered their first architectural and aesthetic triumph. The building is part of a district listed on the National Register of Historic Places. Ms. Lyons assisted the property owner in exploring options for creating additional parking on the site that would comply with the Secretary of the Interior's Standards. (2017)

3003 Runyon Canyon Secretary of the Interior's Standards Compliance Review, Los Angeles, California. Ms. Lyons collaborated with the property owner and architect on a project to construct a new residence on the same hillside parcel as the Headley/Handley House, a designated City of Los Angeles Historic-Cultural Monument designed by master architect Lloyd Wright. After project plans were prepared, Ms. Lyons reviewed the project plans for compliance with the Secretary of the Interior's Standards for Rehabilitation and made recommendations for modifications to ensure the project plans complied with the Standards. She also responded to public comments on the designs. (2016–2018)

3200 West Adams Boulevard Secretary of the Interior's Standards Compliance Review, Los Angeles, California. Ms. Lyons prepared a memo evaluating an ongoing rehabilitation project for conformance with the Secretary of the Interior's Standards for Rehabilitation. The project involved the adaptive reuse of a historic church into a gymnasium (2016)

Scripps College - Residence Halls Secretary of the Interior's Standards Compliance Review, Claremont, California. Listed on the National Register of Historic Places, the campus of Scripps College is an architecturally significant women's college with contributing buildings developed primarily between the 1920s and 1940s. Working with GPA Consulting, Ms. Lyons assisted the campus architect with ongoing projects to adapt the campus buildings and designed landscapes to meet accessibility requirements. Services included preparing a memorandum describing how proposed ADA-related alterations, including new elevator towers and exterior ramps, would comply with the Secretary of the Interior's Standards. Ms. Lyons presented proposed work to the Board of Trustees and student groups. (2015–2019)

Beverly Hills Home Savings Historical Resource Treatment Plan, Beverly Hills, California. Renowned artist and designer Millard Sheets designed several distinctive branches for Home Savings and Loan. Each commission for Home Savings and Loan was unique to its community and recognizable as a modern landmark. The Beverly Hills Home Savings Branch was proposed for designation as a local landmark. Ms. Lyons wrote a supplement to the local landmark designation, describing the history of alterations at the building. The information was essential to clarify the opportunities and constraints for future changes to the building to conform with the Secretary of the Interior's Standards. (2014–2015)

Third Street Promenade Signage, Santa Monica, 2014-2015. Secretary of the Interior's Standards Compliance Review for Certificate of Appropriateness Application, Santa Monica, California. As part of an application for a Certificate of Appropriateness, Ms. Lyons reviewed a proposed new signage plan at a historic commercial building for conformance with the Secretary of the Interior's Standards. (2014–2015)

Miramar Hotel Historical Resource Treatment Plan and Impacts Analysis (Secretary of the Interior's Standards Compliance Review), Santa Monica, California. The Fairmont Miramar Hotel is a historic hotel in Santa Monica. Ms. Lyons acted as a liaison with the hotel's management company and materials conservator to develop a treatment plan for deteriorating terra cotta cladding on a wing of the historic hotel. (2013–2014)

Sunkist Building Historical Resource Treatment Plan and Impacts Analysis (Secretary of the Interior's Standards Compliance Review), Los Angeles, California. The Sunkist Building was designed by the master architecture firm A.C. Martin and Associates in 1970. The distinctive brutalist building is shaped like an inverted pyramid and surrounded by expansive surface parking lots. As part of a proposed residential development for the parking lots, Ms. Lyons completed a historic resource evaluation of the Sunkist Building and analyzed the impacts of new buildings proposed as part of the site redevelopment plan. Ms. Lyons participated in substantial design collaboration with the development team. (2013–2015)

Santa Monica Post Office Historical Resource Treatment Plan and Impacts Analysis (Secretary of the Interior's Standards Compliance Review), Santa Monica, California. In August 2012, the United States Postal Service (USPS) approved the closure of the 1938 Santa Monica Post Office at 1248 Fifth Street. In December 2013, Skydance Productions purchased the 1938 Santa Monica Post Office intending to convert it to creative office space for the film production company. Before the purchase, Santa Monica City Council agreed to accept a preservation covenant for the post office's exterior and lobby. In 2014, the site was designated a Santa Monica Landmark. Ms. Lyons participated in substantial design collaboration for the adaptive reuse of historic post office building and prepared a Historical Resource Treatment Plan making recommendations to ensure the adaptive reuse of the historic building would be in conformance with the Secretary of the Interior's Standards for Rehabilitation. (2013–2015)

Federal Investment Tax Credit

Elks Lodge/The MacArthur/Park Plaza Federal Investment Tax Credit, Part 1, Los Angeles, California. The MacArthur was originally built in 1925 for the Benevolent and Protective Order of Elks. The 11-story building contained highly decorative meeting rooms and a tower of hotel rooms. The ornate building was designed by master architect Claud Beelman and the elaborate interior murals and decorative paintings were designed by Anthony Heinsbergen and Co, noted painter of numerous Los Angeles cultural landmarks. After the Elks sold the building, it operated as a hotel and filming location, but had generally fallen into disrepair. Ms. Lyons completed a Part 1 Federal Investment Tax Credit application to accompany the rehabilitation of the building into a hotel and restaurant space. (2016–2020)

Grether & Grether Building, 730 S. Los Angeles Street Federal Investment Tax Credit, Part 1 and Historic-Cultural Monument Application, Los Angeles, California. The Grether & Grether Building is a seven-story, Beaux-Arts-style building in downtown Los Angeles. Constructed in the 1920s, the building contained a large dry good retail space on the primary and mezzanine floors with office spaces and garment manufacturing on the upper floors. The owners of the building planned adaptive reuse, changing the upper floors to residential uses. Ms. Lyons completed a Los Angeles Historic-Cultural Monument application for the building, an application for a Mills Act contract, and a Part 1 Federal Investment Tax Credit application. (2013–2015)

Linda Vista Hospital, Rehabilitation Federal Investment Tax Credit, Part 2, Los Angeles, California. Linda Vista Community Hospital was originally constructed for employees of the Santa Fe Railroad. It was one of four employee hospitals run by the railroad Santa Fe Employees Hospital Association. The hospital in the Boyle Heights area of Los Angeles comprised the main hospital building and an adjacent nurses' dormitory building. The hospital closed in 1991. An adaptive reused project to convert the buildings to residential use began in 2011. Ms. Lyons assisted with photography and narrative description for the Part 2 Federal Investment Tax Credit applications for the main hospital and adjacent nurses' dormitory building. (2011–2012)

Archives and Research

Streetscape Design for Linking South L.A. to Downtown: Figueroa Corridor Historic Context Statement, Los Angeles, California. Ms. Lyons completed fieldwork documentation, photography, research, and preparation of presentation book on the history of the Figueroa Corridor and existing historic resources representing phases of the corridor's development for use in public meetings and as a guide for a new, pedestrian-oriented streetscape design. (2010)

Intersection of Wall Street and Broadway Historic Development Report Historic Context Statement, New York, New York. As an intern with Higgins Quasebarth in New York City, Ms. Lyons created a report on the history of the intersection of Wall Street and Broadway from the Dutch colonial period through the present. (2009)

Index of American Design Archival Processing, New York, New York. Ms. Lyons processed archival material from the Index of American Design, a Works Progress Administration documentation program that was a precursor of the Historic American Buildings Survey, for collection at Avery Architectural & Fine Arts Library, Columbia University. Materials included vellum drawings and written historical narratives prepared in the early 1930s. (2009–2010)

James Marston Fitch Papers Archival Processing, New York, New York. James Marston Fitch was an architect and a Preservationist. In 1964, he was one of the founders of the Historic Preservation Program at Columbia University's Graduate School of Architecture, Planning, and Preservation. His archives were donated to the Avery Architectural & Fine Arts Library at Columbia University. Ms. Lyons processed the raw materials and wrote a finding aid to assist researchers. (2009–2010)

Woodland Cemetery Archival Processing, New York, New York. Ms. Lyons worked with several archivists to process correspondence archives of Woodlawn Cemetery in Bronx, New York for Avery Architectural & Fine Arts Library, Columbia University. (2009–2010)

***P3a. Description**: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)
The building is a single-family residence that is irregular in plan and one story in height. The building is utilitarian, with no architectural style and a flat roof with a combination of materials, including a hipped roof projection with red clay tiles on the west and south elevations. Its exterior walls are clad in stucco. Fenestration on the primary (south) elevation includes an irregular arrangement of vinyl replacement windows and a replacement vinyl door. All other elevations were obscured by a fence that surrounds the property.
